In the gleaming heights of Victorian London, a world of deception awaits an unconventional Society lady whose taste for adventure makes her a most formidable adversary . . . Though Society demands that I make a good marriage, I, Cherry St. Croix, have neither the time nor the interest. I am on the trail of a murder with no victim, a mystery with no motive, and the key to an alchemical formula that could be my family's legacy. Yet the world is not so kind as to let me pursue simple murder and uncomplicated

bounties. Above the foggy drift, an earl insists on my attention, while my friends watch my increasingly desperate attempts to remain my own woman. From the silken demands of the Midnight Menagerie—to whose dangerously seductive ringmaster I owe a debt—to the rigorous pressures of the peerage, all are conspiring to place before me a choice that will forever change my life. The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

Historically in warfare, the majority of all combat deaths have occurred prior to a casualty ever receiving advanced trauma management. The execution of the Ranger mission profile in the Global War on Terrorism and our legacy tasks undoubtedly will increase the number of lethal wounds. Ranger leaders can significantly reduce the number of Rangers who die of wounds sustained in combat by simply targeting optimal

medical capability in close proximity to the point of wounding. Directing casualty response management and evacuation is a Ranger leader task; ensuring technical medical competence is a Ranger Medic task. A solid foundation has been built for Ranger leaders and medics to be successful in managing casualties in a combat environment. The true success of the Ranger Medical Team will be defined by its ability to complete the mission and greatly reduce preventable combat death. Rangers value honor and reputation more than their lives, and as such will attempt to lay down their own lives in defense of their comrades. The Ranger Medic will do no less.
