Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Few paint a more vivid or varied picture of the joys of riding than this collection of stories from a motorcycling life by Lance Oliver, who has spent more time than most of us thinking about and writing about the art and practicalities of motorcycling. Although Africa is the most under-supplied region of the world for electricity, its economies are utterly dependent on it. There are enormous inequalities in electricity access, with industry receiving abundant supplies of cheap power while more than 80 per cent of the continent's population remain off the power grid. Africa is not unique in this respect, but levels of inequality are particularly pronounced here due to the inherent unevenness of 'electric capitalism' on the continent. This book provides an innovative theoretical framework for understanding electricity and capitalism in Africa, followed by a series of case studies that examine different aspects of electricity supply and consumption. The chapters focus primarily on South Africa due to its dominance in the electricity market, but there are important lessons to be learned for the continent as a whole, not least because of the aggressive expansion of South African capital into other parts of Africa to develop and control electricity. Africa is experiencing a renewed scramble for its electricity resources, conjuring up images of a recolonisation of the continent along the power grid. Written by leading academics and activists, *Electric Capitalism* offers a cutting-edge, yet accessible, overview of one of the most important developments in Africa today - with direct implications for health, gender equity, environmental sustainability and socio-economic justice. From nuclear power through

prepaid electricity meters to the massive dam projects taking place in central Africa, an understanding of electricity reforms on the continent helps shape our insights into development debates in Africa in particular and the expansion of neoliberal capitalism more generally.

Modern Motorcycle Technology offers motorcyclists an up-to-the-minute technical overview and explanation for all the major mechanical and electrical systems comprising their motorcycle. Whether you ride a sport bike, cruiser, tourer, dual-sport, or off-road machine you'll learn precisely how your bike works, which will help you keep your motorcycle in top condition. Author Massimo Clarke takes you through all the major components of your motorcycle focusing on subjects such as engine architecture, fuel systems, transmission, and chassis. The detailed text is accompanied by revealing photos and diagrams that illuminate precisely how these systems work. Whether new to motorcycling or a road-seasoned veteran rider, you'll find page after page of fascinating information. Modern Motorcycle Technology is the single reference you'll return to again and again.

If you're red-blooded and somewhere between 35 and 50 the chances are that your first bike was a sports moped. This book takes you on a nostalgic full throttle trip back to the heady days of the 1970s and early 80s when these fabulous little superbikes were available to 16 year-olds. Packed with photos from past and present, this book will revive wonderful memories of the machines, the people, the fashions, and even the

This book critically reflects on the international function of the Bologna Process by exploring motivations and interests behind its 'global strategy' as well as how the reforms have been perceived and applied beyond Europe. Since its initiation in 1999, the Bologna Process has evolved into an important example of regional higher education policy coordination. Now with 48 signatory states both within and outside the European Union, the Bologna reforms have pushed forward an ambitious agenda for a European Higher Education Area (EHEA), and the EU specifically as it aims to consolidate its knowledge-economy. Alongside its regional focus, the Bologna Process has also promoted an international reach through its 'global strategy'. Through this externalisation, the Bologna Process has become a point of reference for higher education internationalisation worldwide. Featuring examples of Bologna's 'reach' from Oceania to North America and in between, the book offers a timely contribution to the understanding of the reform's global influence. As a whole the contributions offer important insights to the understanding and conceptualisation of the EU's global influence, comparative regionalism and global higher education development more broadly. This book was originally published as a special issue of the European Journal of Higher Education.

Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human–animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from, or in addition to, spoken language.

Triumph's Bonneville and its single-carbed sibling, the TR6, are two of the most revered models in all of motorcycling. Distinguished by their handsome lines and pace-setting performance, the Bonneville and Tiger ruled the streets and race tracks from their

introduction in the late 1950s through Triumph's golden age in the 1960s. Devotion to the marque remained strong even as the sun slowly set on the company's fortunes in the late 1970s and early 1980s. The original Triumph's demise in 1983 simply served to cement the legendary status of its long-lived top guns, the Bonneville and TR6.

Maria Costello is one of the most instantly recognisable faces in British motorsport. Blonde, petite, pretty and bubbly, she is the opposite of most people's image of a motorbike racer. Yet Maria has competed on equal terms in this most demanding man's world for over a decade, smashing the Isle of Man TT lap record. This is her story.

When scholars discuss the medieval past, the temptation is to become immersed there, to deepen our appreciation of the nuances of the medieval sources through debate about their meaning. But the past informs the present in a myriad of ways and medievalists can, and should, use their research to address the concerns and interests of contemporary society. This volume presents a number of carefully commissioned essays that demonstrate the fertility and originality of recent work in Medieval Studies. Above all, they have been selected for relevance. Most contributors are in the earlier stages of their careers and their approaches clearly reflect how interdisciplinary methodologies applied to Medieval Studies have potential repercussions and value far beyond the

boundaries of the Middle Ages. These chapters are powerful demonstrations of the value of medieval research to our own times, both in terms of providing answers to some of the specific questions facing humanity today and in terms of much broader considerations. Taken together, the research presented here also provides readers with confidence in the fact that Medieval Studies cannot be neglected without a great loss to the understanding of what it means to be human.

Jupiter's Travels - Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGregor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in

England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of *Riding Home* and *The Gypsy in Me*.

The ultimate reference for Triumph lovers and fans of British motorcycles, *The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today* collects all of the motorcycles from this iconic brand in a single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives.

The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!

"Falling in love with Ben Kiem, despite his rowdy pranks and bad-news friends, sensible Linda Eicher must make a difficult decision when a heartbreaking misunderstanding comes between them"--

In the last several years, much has been written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to overcome political polarization and to address the challenges of economic restructuring and social divides.
