A companion for visitors to Greece and Rome, and for armchair travelers as well. John Gaskin unfolds the thinking about nature, life, death, and other worlds that informed the culture and society of the classical world—still visible in today’s cityscapes and archaeological sites—and draws out its relevance and interest for the modern reader. It was the Greeks who first asked and discussed in a rational way two fundamental questions that never cease to concern thinking human beings: what is the nature of the universe, and what can I make of my brief time in it? Their answers, developed between the eighth century BC and the fourth century AD, are still relevant to the modern reader and traveler. The author associates each philosopher and his ideas with a particular tourist destination, and a gazetteer describes the sites and notes the people and ideas connected with them.

Youth civic engagement efforts have become common across the globe. With the ratification of the UN Convention on the Rights of the Child, many have turned to civic engagement methodologies to create opportunities for young people to have a voice in decisions that affect them. With the dissemination of youth civic engagement practice, there is a need to evaluate these efforts to satisfy funders, stakeholders, and participants. As a social innovation, youth civic engagement efforts present unique issues to evaluation and invite innovative and participatory evaluation designs. This volume brings together experienced evaluators, evaluation and youth civic engagement scholars, and civic youth workers to inform evaluation designs for youth civic engagement practice and programs. The book uses the US Center for Disease Control's framework for evaluation process, and explores issues, questions, and choices an evaluator can make when designing an evaluation of youth civic engagement practices. The heart of the book includes case studies written by professional evaluators, evaluation and youth scholars, and youth workers to define issues for each stage and provide guidance for others who want to design a robust, rigorous, and responsive evaluation for youth civic engagement initiatives and practices. The final chapters of the book provide straightforward and clear guidance for beginning to intermediate evaluators when designing and conducting evaluation studies.

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

An innovator in contemporary thought on economic and political development looks here at decline rather than growth. Albert O. Hirschman makes a basic distinction between alternative ways of reacting to deterioration in business firms and, in general, to dissatisfaction with organizations: one, “exit,” is for the member to quit the organization or for the customer to switch to the competing product, and the other, “voice,” is for members or customers to agitate and exert influence for change “from within.” The efficiency of the competitive mechanism, with its total reliance on exit, is questioned for certain important situations. As exit often undercuts voice while being unable to counteract decline, loyalty is seen in the function of retarding exit and of permitting voice to play its proper role. The interplay of the three concepts turns out to illuminate a wide range of economic, social, and political phenomena. As the author states in the preface, “having found my own unifying way of looking at issues as diverse as competition and the two-party system, divorce and the American character, black power and the failure of ‘unhappy’ top officials to resign over Vietnam, I decided to let myself go a little.”

Pentecostalism is the fastest growing religious movement of our time. The unexpected birth of the modern-day Pentecostal movement at the doorsteps of the twentieth century is as perplexing as its continuing existence and unprecedented expansion worldwide. Once marginalized from public discourse, Pentecostals have entered into mainstream culture, religion, politics, academia, and social action. However, the unprecedented growth of Pentecostalism in all its diversity has led to characterizations ripe with platitudes, stereotypes, and misrepresentations. This Guide for the Perplexed sheds light on the most persistent contrasts characterizing the Pentecostal movement: the tension between local manifestations and global Pentecostalism, the inconsistency between spiritual discernment and charismatic excess, the gap between rampant denominationalism and the pursuit of Christian unity, the disparity between poverty among many Pentecostals and the popularity of the prosperity gospel, the division between Oneness Pentecostals and their trinitarian counterparts, and the worldview of Pentecostals beyond the confines

of a religious movement. Those tensions form the essence of global Pentecostalism and represent the emergence of a global Christian world.
