and Conservation of StoneElsevier

The conservation of historic monuments, sites and structures constitutes an inter-professional discipline co-ordinating a range of aesthetic historic, scientific and technical methods. Conservation is a rapidly developing field, which, by its true nature, is a multidisciplinary activity with experts respecting one another's contributions and combining to form an effective team. Conservation is an artistic activity aided by scientific and historical knowledge. Main topics at this Congress included: - the most appropriate methodology for the assessment of the degree of weathering of stone - development of new methods and instruments for the diagnosis of the state of conservation, for the study of alteration mechanisms and for conservation treatments. - the definition of Technical European Standard Methods for the evaluation of conservation treatments of artistic and historic stone objects and monuments.

Obesity is officially recognised as a major worldwide public health problem. "Progress in Obesity Research: 9" fulfils the need for an accessible and fundamental research, highly recommended towards a better understanding of

obesity. It will prove an indispensable resource for all those involved in the research, prevention and treatment of obesity.

June 15-16, 2017 London, UK Key Topics : Cancer genomics, Functional Genomics, Next Generation Sequencing, Biomarkers, Pharmacogenomics, Clinical Genomics, Micro RNA, mRNA Analysis, Bioinformatics in Genomics, Comparative Genomics, Plant Genomics, Genome Engineering, Microbial Genomics, Future trends in Genomics, Genome Medicine, Genomics Market, Proteomics, Human Genomics,

The proceeding is a collection of research papers presented, at the 9th International Conference on Robotics, Vision, Signal Processing & Power Applications (ROVISP 2016), by researchers, scientists, engineers, academicians as well as industrial professionals from all around the globe to present their research results and development activities for oral or poster presentations. The topics of interest are as follows but are not limited to: • Robotics, Control, Mechatronics and Automation • Vision, Image, and Signal Processing • Artificial Intelligence and Computer Applications • Electronic Design and Applications • Telecommunication Systems and Applications • Power System and Industrial Applications • Engineering Education
