Blade of Fortriu is the second book in Juliet Marillier's Bridei Chronicles. Five Winters have passed since young king Bridei ascended the throne of Fortriu. Five years, in which the people have felt a contentment unknown for generations. But the security of a people can vanish in a heartbeat, for wolves are often drawn to fields filled with fattened sheep. Bridei is determined to drive the Gaelic invaders from his lands once and for all. And so, with his land secure and his house in order, he prepares for war. And one of Bridei's plans to win the war to come involves the beautiful young Ana. A princess of the Light Isles, she has dwelt as a hostage at the court of Fortriu for most of her young life. Despite being a pawn of fortune, she has bewitched all at court and is dearly loved by Bridei and his queen. But Ana understands her duty. And so she will travel north, to make a strategic marriage with a chieftain she has never seen, in the hopes of gaining an ally on whom Bridei's victory relies. For secrecy's sake, Ana must travel at a soldier's pace, with a small band led by the enigmatic spymaster Faolan. Bridei implores Ana to trust see the good in Faolan...but Ana cannot see beyond his cold competence and killer's eyes. Then, when she arrives at the chieftain Alpin's stronghold in the mysterious Briar Woods, her discomfort and unease increase tenfold, for this is a place of full of secrets and her betrothed is an enigma himself. The more Ana tries to uncover the truth of her new life, the more she discovers a maze of polite diversions that mask deadly lies. She fears Faolan, but he may prove to be the truest thing in her world. Or her doom. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 Phd Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org).

Since Aristotle, genre has been one of the fundamental concepts of literary theory, and much of the world's literature and criticism has been shaped by ideas about the nature, function and value of literary genres. Modern developments in critical theory, however, prompted in part by the iconoclastic practices of modern writers and the emergence of new media such as film and television, have put in question traditional categories, and challenged the assumptions on which earlier genre theory was based. This has led not just to a reinterpretation of individual genres and the development of new classifications, but also to a radically new understanding of such key topics as the mixing and evolution of genres, generic hierarchies and genre-systems, the politics and sociology of genres, and the relations between genre and gender. This anthology, the first of its kind in English, charts these fascinating developments. Through judicious selections from major twentieth-century genre theorists including Yury Tynyanov, Vladimir Propp, Mikhail Bakhtin, Hans Robert Jauss, Rosalie Colie, Fredric Jameson, Tzvetan Todorov, Gérard Genette and Jacques Derrida, it demonstrates the central role that notions of genre have played in Russian Formalism, structuralism and post-structuralism, reception theory, and various modes of historical criticism. Each essay is accompanied by a detailed headnote, and the volume opens with a lucid introduction emphasising the international and interdisciplinary character of modern debates about genre. Also included are an annotated bibliography and a glossary of key terms, making this an indispensable resource for students and anyone interested in genre studies or literary theory.

Awesome Man can shoot positronic rays out of his eyeballs, fly as straight as an arrow, and hug mutant Jell-O! Even villains like Professor Von Evil and the Flaming Eyeball are no match for this caped crusader. But Awesome Man also has a secret. . . . Can you guess what it is? The first picture book from Pulitzer Prize-winning novelist Michael Chabon perfectly captures the fantasy life of young superhero fans.

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

The biology, biotechnology, chemistry, pharmacy and chemical engineering students at various university and engineering institutions are required to take the Biochemical Engineering course either as an elective or compulsory subject. This book is written keeping in mind the need for a text book on afore subject for students from both engineering and biology backgrounds. The main feature of this book is that it contains the solved problems, which help the students to understand the subject better. The book is divided into three sections: Enzyme mediated bioprocess, whole cell mediated bioprocess and the engineering principle in bioprocess. Dr. Rajiv Dutta is Professor in Biotechnology and Director, Amity Institute of Biotechnology, Lucknow. He earned his M. Tech. in Biotechnology and Engineering from the Department of Chemical Engineering, IIT, Kharagpur and Ph.D. in Bioelectronics from BITS, Pilani. He has taught Biochemical Engineering and Biophysics to B.E., M.E. and M.Sc. level student carried out advanced research in the area of Ion channels at the Department of Botany at Oklahoma State University, Stillwater and Department of Biological Sciences at Purdue University, West Lafayette, IN. He also holds the position of Nanion Technologies Adjunct Research Professor at Research Triangle Institute, RTP, NC. He had received various awards including JCI Outstanding Young Person of India and ISBEM Dr. Ramesh Gulrajani Memorial Award 2006 for outstanding research in electro physiology.

Build, customize, and debug your own Android system About This Book Master Android system-level programming by integrating, customizing, and extending popular open source projects Use Android emulators to explore the true potential of your hardware Master key debugging techniques to create a hassle-free development environment Who This Book Is For This book is for Android system programmers and developers who want to use Android and create indigenous projects with it. You should know the important points about the operating system and the C/C++ programming language. What You Will Learn Set up the Android development environment and organize source code repositories Get acquainted with the Android system architecture Build the Android emulator from the AOSP source tree Find out how to enable WiFi in the Android emulator Debug the boot up process using a customized Ramdisk Port your Android system to a new platform using VirtualBox Find out what recovery is and see how to enable it in the AOSP build Prepare and test OTA packages In Detail Android system programming involves both hardware and software knowledge to work on system level programming. The developers need to use various techniques to debug the different components in the target devices. With all the challenges, you usually have a deep learning curve to master relevant knowledge in this area. This book will not only give you the key knowledge you need to understand Android system programming, but will also prepare you as you get hands-on with projects and gain debugging skills that you can use in your future projects. You will start by exploring the basic setup of AOSP, and building and testing an emulator image. In the first project, you will learn how to customize and extend the Android emulator. Then you'll move on to the real challenge—building your own Android system on VirtualBox. You'll see how to debug the init process, resolve the bootloader issue, and enable various hardware interfaces. When you have a complete system, you will learn how to patch and upgrade it through recovery. Throughout the book, you will get to know useful tips on how to integrate and reuse existing open source projects such as LineageOS (CyanogenMod), Android-x86, Xposed, and GApps in your own system. Style and approach This is an easy-to-follow guide full of hands-on examples and system-level programming tips.

A revealing look at work environments that lead to greater loyalty and an increase in productivity Exploring the premise that the best way to

attract and retain people, and their knowledge, will come from designing environments that turn today's increasingly virtual workplace into an attractive place for people to spend their time, *Management by Design: Applying Design Principles to the Work Experience* shows how the principles of design can be successfully applied to the work experience, making it a rewarding and productive. Reveals why the application of design to the workplace experience can improve the employee/employer relationship Why increased morale and employee loyalty start with a great work environment Explains why it is more important than ever to manage work experiences, especially with the projected work shortages in the coming decades Other titles by Rasmus: *Listening to the Future: Why It's Everybody's Business* This innovative book helps managers and executives connect the dots between employee retention, positive brand expression, and lasting stories that reflect well on an organization.

An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. *Principles of Marketing* keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

The open source nature of the platform has not only established a new direction for the industry, but enables a developer or forensic analyst to understand the device at the most fundamental level. *Android Forensics* covers an open source mobile device platform based on the Linux 2.6 kernel and managed by the Open Handset Alliance. The Android platform is a major source of digital forensic investigation and analysis. This book provides a thorough review of the Android platform including supported hardware devices, the structure of the Android development project and implementation of core services (wireless communication, data storage and other low-level functions). Finally, it will focus on teaching readers how to apply actual forensic techniques to recover data. Ability to forensically acquire Android devices using the techniques outlined in the book Detailed information about Android applications needed for forensics investigations Important information about SQLite, a file based structured data storage relevant for both Android and many other platforms.

The Emily Post Institute, the most trusted brand in etiquette, tackles the latest issues regarding how we interact along with classic etiquette and manners advice in this updated and gorgeously packaged edition. So, you've created a few projects with Arduino, and now it's time to kick it up a notch. Where do you go next? With *Pro Arduino*, you'll learn about new tools, techniques, and frameworks to make even more ground-breaking, eye-popping projects. You'll discover how to make Arduino-based gadgets and robots interact with your mobile phone. You'll learn all about the changes in Arduino 1.0, you'll create amazing output with openFrameworks, and you'll learn how to make games with the Gameduino. You'll also learn advanced topics, such as modifying the Arduino to work with non-standard Atmel chips and Microchip's PIC32. Rick Anderson, an experienced Arduino developer and instructor, and Dan Cervo, an experienced Arduino gadgeteer, will give you a guided tour of advanced Arduino capabilities. If it can be done with an Arduino, you'll learn about it here.

In her bestselling books *Blue Gold* and *Blue Covenant*, world-renowned water activist Maude Barlow exposed the battle for ownership of our dwindling water supply and the emergence of an international, grassroots-led movement to reclaim water as a public good. Since then, the United Nations has recognized access to water as a basic human right—but there is still much work to be done to stem this growing crisis. In this major new book, Barlow draws on her extensive experience and insight to lay out a set of key principles that show the way forward to what she calls a "water-secure and water-just world." Not only does she reveal the powerful players even now impeding the recognition of the human right to water, she argues that water must not become a commodity to be bought and sold on the open market. Focusing on solutions, she includes stories of struggle and resistance from marginalized communities, as well as government policies that work for both people and the planet. At a time when climate change has moved to the top of the national agenda and when the stage is being set for unprecedented drought, mass starvation, and the migration of millions of refugees in search of water, *Blue Future* is an urgent call to preserve our most valuable resource for generations to come.

Whether you're new to Arduino and Android development, or you've tinkered a bit with either one, this is the book for you. *Android*

has always been a natural fit with Arduino projects, but now that Google has released the Android Open Accessory Development Kit (the Android ADK), combining Android with Arduino to create custom gadgets has become even easier. Beginning Android ADK with Arduino shows how the ADK works and how it can be used with a variety of Arduino boards to create a variety of fun projects that showcase the abilities of the ADK. Mario Böhmer will walk you through several projects, including making sounds, driving motors, and creating alarm systems, all while explaining how to use the ADK and how standard Arduino boards may differ from Google-branded Arduinos. You aren't tied to specific hardware with this book; use what you have, and this book will show you how.
