

Back In Black The Drum Ninja

In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals:

- How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world
- Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre
- That practice, rather than talent, is the driving force behind musical expertise
- How those insidious little jingles (called earworms) get stuck in our head

A Los Angeles Times Book Award finalist, *This Is Your Brain on Music* will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

Parental alienation arising from disputed hearings in family-court is a devastating problem affecting millions of families around the world. Much as we addressed domestic violence several decades ago, we treat parental alienation as a domestic issue rather than what it is; a crisis affecting communities, school systems, police and court systems, mental-health and financial institutions, and crucially, legislative bodies. Our social, cultural and legal systems sanction and even promote parental alienation at the expense of our children's wellbeing by rewarding lawyers for increasing parental animosity. Malicious Mother syndrome is now a recognized condition, causing child abuse, often at a developmental stage that will leave a lifelong mark on the child of a disputed family-law judgment. This calamitous situation grows progressively worse while legislation exists to encourage and incentivize members of family-law to profit from the easy money family-court offers avaricious, amoral members of family-law to litigate. Undoubtedly financially motivated litigation is never in the child's best interests and always benefits the family-law members, yet no checks and boundaries exist to prevent the abuse of children by inappropriately qualified 'judges' being played by greed motivated lawyers, almost always reflecting gender prejudice in the process.

"We were living through the realities of war and bringing the war onto the stage... Everybody hated us, man" Alan Vega Born out of the city's vibrant artistic underground as a counter-cultural performance art statement, opposing the war by mirroring its turmoil, Suicide became the most terrifyingly iconoclastic band in history, and also one of the most influential. By the time the punk scene they're usually associated with came out of CBGBs in the mid-seventies, Suicide had already been causing havoc in New York's clubs for several years. Working closely with the author, Rev and Vega explain the influences and events which led to the birth of Suicide and their early struggles. They invoke another world and era, peppered with smoky jazz clubs, Iggy Pop in his new-born Stooge persona and even suffer an attack from beat guru Allen Ginsberg. Along with interviewing major figures in the Suicide story, the author reaches back into 40 years chronicling and interviewing major players in New York's musical history, including Blondie, Jayne County, James Chance and the New York Dolls. While the city changes around them, it all adds up to the definitive account of the lives and times of this unique duo.

(Book). Foreword by Neil Peart. Talent, energy, dedication, discipline, passion, innovation, education, drive, mind, body, spirit, vision, honor, truth, and drums make the man: Kenny Aronoff. Voted by *Rolling Stone* magazine as one of the greatest drummers of all time, Aronoff is arguably the most sought-after recording and touring beat master ever. Ignited by the Beatles' appearance on *The Ed Sullivan Show* in 1964, Aronoff's passion for drumming fervently grew and carried him from the kit in his childhood living room in the Berkshires to Bernstein at Tanglewood to Mellencamp, Etheridge, Fogerty, Smashing Pumpkins, the Rolling Stones, the Beatles his heroes and beyond. But none of this would have been possible without his fierce work ethic and unique approach to drumming an integration of all parts of his being, along with meticulous attention to note-for-note detail, feel, and what the song needs . Both a leader and a team player in the mission to realize a greater good an unforgettable recording, a riveting show Aronoff brings it every time. Through any setbacks heartaches, failures, injuries, or plain fatigue from the rigors of the biz Aronoff has stayed the arduous and wild rock 'n' roll course. His tale of what is possible with unrelenting dedication to one's bliss is an inspiration to all. *Sex, Drums, Rock 'n' Roll!* details Aronoff's youth in the Berkshires and the Midwest, from his early inspirations to his serious classical and jazz study, which gave him the foundation to be able to play anything. The failure of a first rock band in his early twenties had a silver lining: it freed him up for an audition that would change his life John Mellencamp. His work with Mellencamp catapulted Aronoff to the top of the charts with such hits as "Hurt So Good," "Little Pink Houses," and "Jack and Diane" and paved the way for session and recording work with droves of remarkable artists: Melissa Etheridge, John Fogerty, Bon Jovi, Stevie Nicks, Smashing Pumpkins, the BoDeans, Paul Westerberg, Celine Dion, Iggy Pop, Elton John, Bob Dylan, Alice Cooper, Brian Wilson, Meat Loaf, Joe Cocker, and countless others. In addition to his work as a world-famous recording and touring drummer, Aronoff finds time to be a dedicated teacher and has shared his expertise with students all over the world, teaching clinics for Tama and Zildjian. Heading into his fourth decade of rocking hard, Aronoff shows no signs of slowing down. Featuring rare photos, testimonials from major artists and from those who know him best, a chronology of live performances, a discography, and a foreword by Neil Peart, this book is the story of one of the greatest musicians of all time.

Marshall McLuhan was dubbed a media guru when he came to prominence in the 1960s. The Woodstock generation found him cool; their parents found him perplexing. By 1963, McLuhan was Director of the Centre for Culture and Technology at the University of Toronto and would be a public intellectual on the international stage for more than a decade, then linked forever to his two best known coinages: the global village and the medium is the message. Taken as a whole, McLuhan's writings reveal a profound coherence and illuminate his unifying vision for the study of language, literature, and culture, grounded in the broad understanding of any medium or technology as an extension of the human body. McLuhan: A Guide for the Perplexed is a close reading of all of his work with a focus on tracing the systematic development of his thought. The overriding objective is to clarify all of McLuhan's thinking, to consolidate it in a fashion which prevents misreading, and to open the way to advancing his own program: ensuring that the world does not sleepwalk into the twenty-first century with nineteenth-century perceptions.

'Lucid, fluent and compelling' – Observer 'We need writers like Andrews ... These are truths we need to be hearing' – New Statesman Back to Black traces the long and eminent history of Black radical politics. Born out of resistance to slavery and colonialism, its rich past encompasses figures such as Marcus Garvey, Angela Davis, the Black Panthers and the Black Lives Matter activists of today. At its core it argues that racism is inexorably embedded in the fabric of society, and that it can never be overcome unless by enacting change outside of this suffocating system. Yet this Black radicalism has been diluted and moderated over time; wilfully misrepresented and caricatured by others; divested of its legacy, potency, and force. Kehinde Andrews explores the true roots of this tradition and connects the dots to today's struggles by showing what a renewed politics of Black radicalism might look like in the 21st century.

Investigates the appropriation of black popular culture as a symbol of rebellion in postwar Germany

Black Crowes drummer and cofounder Steve Gorman shares the band's inside story in this behind-the-scenes biography, from their supernova stardom in the '90s to exhilarating encounters with industry legends. For more than two decades, the Black Crowes topped the charts and reigned supreme over the radio waves, even as hair bands, grunge, and hip-hop threatened to dethrone them. With hits like "Hard to Handle," "She Talks to Angels," and "Remedy," their massive success launched them to stardom in the early '90s, earning them a place among rock royalty. They were on the cover of Rolling Stone, MTV played their videos 24/7, and Generation X rediscovered the power of classic rock and blues by digging into multi-platinum classics like Shake Your Money Maker and The Southern Harmony and Musical Companion. But stardom can be fleeting. For the Black Crowes, success slowly dwindled as the band members got caught up in the rock star world and lost sight of their musical ambition. Despite the drinking, drugs, and incessant fighting between Chris and Rich Robinson -- the angriest brothers in rock and roll, with all due respect to Oasis and the Kinks -- the band continued to tour until 2013. On any given night, they could be the best band you ever saw (or the most combative). Then, one last rift caused by Chris Robinson proved insurmountable for the band to survive. After that, the Black Crowes would fly no more. Founding member Steve Gorman was there for all of it -- the coke- and weed-fueled tours; the tumultuous recording sessions; the backstage hangs with legends like Robert Plant, Jimmy Page, and the Rolling Stones. As the band's drummer and voice of reason, he tried to keep the Black Crowes together musically and emotionally. In Hard To Handle -- the first account of this great American rock band's beginning, middle, and end -- Gorman explains just how impossible that job was with great insight, candor, and humor. They don't make bands like the Black Crowes anymore: crazy, brilliant, self-destructive, inspiring, and, ultimately, not built to last. But, man, what a ride it was while it lasted.

This book presents a series of delightful interviews in which natural objects such as an electron, a black hole, a galaxy, and even the vacuum itself, reveal their innermost secrets — not only what they are but also how they feel. A hydrogen atom tells us about quantum mechanics and why we live in a non-deterministic world; a black hole explains curved space and naked singularities; and a uranium atom talks of its life on a meteor, its tremendous collision with Earth, and properties of radioactivity — all while grappling with its own mortality. A neutron star gives a personal account of its creation and goes on to discuss quasars and other extraordinary astronomical objects, while an iron atom describes its birth in a remote supernova explosion and its series of adventures on Earth, from its early use in wrought iron processes to its time in a human body, and then to its latest misadventures. The book discusses many fundamental issues in physics and, at times, examines the philosophical and moral issues of society. For example, the interview with the quark reveals the nature of color gauge symmetry, which is interwoven with a discussion on truth and beauty, and shows how these concepts play an integral part in physics and nature, while the uranium atom expresses its horror of the development and use of the atomic bomb. Contents: Interview with a Carbon Atom Interview with an Electron Interview with Jupiter Interview with a Black Hole Interview with a Uranium Atom Interview with a Fermion and a Boson Interview with a Star Interview with a Wimp Interview with a Comet Interview with a Spiral Galaxy Interview with a Neutrino Interview with a Hydrogen Atom Interview with a Neutron Interview with a Quark Interview with a Tachyon Interview with a Quasar Interview with Antimatter Interview with Iron Interview with a Muon Interview with a Neutron Star Interview with a String Interview with Vacuum Readership: Scientists and anyone interested in the natural world.
