EVERYTHING THERE IS TO KNOW ABOUT SURVIVING IN THE WILD “During my first years of learning survival I took a course in survival and primitive earth skills taught by John and Geri McPherson. I was excited by their unbelievable passion and their intrinsic understanding of survival. Their teachings took me from understanding basic skills to a full-blown love for the ancient technologies that humans developed to survive. John and Geri are the real deal. They don't just teach this stuff, they live it. I loved the experience with them so much I came back a second time a few years later. Now that I have traveled the world as Survivorman—experiencing and filming survival in every ecosystem there is—I can sit back and watch my shows and see John and Geri's teachings peek through in every situation. I have been able to understand survival because of John and Geri, and can highly recommend this book.” --Les Stroud, AKA Survivorman Packed with in-depth instruction and photos, Ultimate Guide to Wilderness Living teaches you the skills need to survive and live in the wild using only those things found in the woods. In the tradition of the million-copy-bestseller SAS Survival Guide, former SAS paratrooper Bear Grylls—the world's most famous survival expert—teaches the necessary skills for eating in the wild. "There's no getting away from it; I've eaten some pretty extreme things in my time—live tarantulas, raw goat testicles, elephant dung, you name it. In a situation when your life depends on it, you need to put your prejudices aside to keep your stomach filled and your strength up. Whether it's mastering the art of foraging and cooking up a tasty feast around the campfire or

learning about the more extreme end of wild food (ever tried a scorpion kebab?), there's a lot to learn when it comes to dinner time in the wild. Extreme Food will teach you all the necessary skills and techniques to get your teeth into meals you might never have thought of as food in the first place—and, crucially, how to recognize plants and animals that might end up doing you more harm than good. In today's world, we rarely need to venture beyond the local supermarket and we turn our noses up at the thought of snacking on bugs and grubs. But out in the wild, Mother Nature has provided us with a plentiful supply of nutritious—if not always delicious—food for the taking. And when needs must, we just have to know where to look. Some of it might take you out of your comfort zone. Some of it might turn your stomach. But it's saved my life more than once. And one day, it might save yours . . .”—BEAR GRYLLES

"Olly's not having fun at camp. His backpack is trying to kill him and building a shelter gives him splinters. But that night a mysterious compass transports Olly onto a glacier, where Bear Grylls, his guide, is watching. The only way home is to trek across frozen lakes and through deep snow drift--and Bear can see that there's a blizzard coming ... Will Olly learn that trying your best can make all the difference, or will the challenge be too much?"--Page [4] cover.

'Just \*wonderful\*. A breath of fresh air in a book. Sal is a story with incredible heart, told so beautifully and with such clarity and grace I can hardly believe it's a debut! I loved it' JOANNA CANNON, author of THE TROUBLE WITH GOATS AND SHEEP AN OBSERVER 'NEW FACE OF FICTION 2018' This is a story of something like survival. Sal planned it for almost a year before they ran. She nicked an Ordnance Survey map from the school library. She bought a compass, a Bear Grylls knife, waterproofs and a first aid kit from Amazon using stolen credit cards. She read the SAS Survival Handbook and watched loads of YouTube videos. And now Sal knows a lot of stuff. Like how to build a shelter and start a fire. How to estimate distances, snare rabbits and shoot an airgun. And how to protect her sister, Peppa. Because Peppa is ten, which is how old Sal was when Robert started on her. Told in Sal's distinctive voice, and filled with the silent, dizzying beauty of rural Scotland, Sal is a disturbing, uplifting story of survival, of the kindness of strangers, and the irrepressible power of sisterly love; a love that can lead us to do extraordinary and unimaginable things.

Presents valuable skills and secret tricks for surviving in the wilderness, discussing knot tying, preparing and lighting a fire, tracking animals, and collecting water.

Outback Survival is a timeless, practical run down on everything you need to know to survive in the outback. Bob Cooper's incredible bushcraft skills have been developed through more than 25 years of experience in Australia's harsh outback. He has picked up tools of survival from the experiences of living with traditional Aboriginal communities, instructing with Special Forces Units, lecturing with the Texas Parks and Wildlife Service on desert survival in the Mexican Desert, delivering wilderness lessons in the UK and learning the skills of the bushmen of the Kalahari Desert in Botswana. Bob has put his own lessons to the test, dropping himself off in the 42C heat of the Australian desert with only a map and soap box sized survival kit, no food, water or sleeping gear, and a 10 day walk across 160km of rough terrain back to safety. He did this alone and showed that with the right knowledge of the land, you can survive in even the harshest of conditions. The outback of Australia is one of the most unforgiving regions of the world, but Bob is committed to protecting and enhancing the experience

people have when venturing out into the bush.

You're alone in the forest on a fine autumn day with nothing but a multitool. You're stuck there for a week. Should you be more worried about finding a source of uncontaminated water or about a bear that might be in the area? Neither, says Les Stroud. The bear will most likely avoid you, and dehydration will affect you faster than parasites in untreated water. Your bigger worry should be shelter—the daytime might be nice, but it's likely going to be cold at night. And that's just the beginning. The concept of Survivorman is simple: left in a remote location, Les must survive for seven days on his own without food, water or equipment. Now, he shares his expert knowledge in *Survive!*, a fully illustrated guide based on his experiences on six continents and filled with field-tested advice. Many books on survival are culled from Second World War—era training techniques that are out-of-date or just plain wrong. *Survive!* debunks these dated myths, exploring basic and advanced tactics that show you how to cope in any survival situation. Brought to life with Les's own anecdotes and the tales of others, *Survive!* is the perfect manual for anyone -- from beginner to armchair traveller to seasoned explorer -- who wants to meet nature's dangers with confidence. ### Bear Grylls Survival Skills

'No one could fail to be gripped by his heartfelt excitement and emotion over what was the adventure of a lifetime' Independent At the age of twenty-three, Bear Grylls became one of the youngest Britons to reach the summit of Mount Everest. At extreme altitude youth holds no advantage over experience, and it is generally acknowledged that younger climbers have more difficulty coping with the adverse effects of mountaineering. Nevertheless, only two years after breaking his back in a freefall parachuting accident, Bear Grylls overcame severe weather conditions, fatigue, dehydration and a last-minute illness to stand on top of the world's highest mountain. Facing Up is the story of his adventure, his courage and humour, his friendship and faith.
