

## Company Profile Freight Forwarding Clearing

2011 Updated Reprint. Updated Annually. New Zealand Customs, Trade Regulations and Procedures Handbook  
Inhaltsangabe: Introduction: The following thesis was conducted within the confines of Berco Express and seeks to develop a flexibility measurement methodology. Spearheading the introduction of Berco Express, a Logistics Service Provider (LSP), operating in the South African Transportation industry. Company Profile: Berco Express (BE) is part of Berco Logistics Services (BLS), a wholly owned subsidiary of the Berco Group, a privately owned company established in 1992. The vision and passion of all the people of this company is to make BLS the customer's logistics service provider of choice. BE started its courier operation in 1992 and has since grown into a medium sized organisation with 16 branches nationally in South Africa (SA), employing close to 1000 people and over 250 vehicles. Additionally under the BLS umbrella included are the two complimentary divisions Active Warehousing and Clearing & Forwarding. BE standard Courier Services embracing dedicated distribution, domestic and international consignments. In conjunction with the Global Distribution Alliance Network (GDA) all major cities worldwide as well as thousands of towns in more than 220 countries are served. Active Warehousing a newer division is offering in 4 warehouse facilities (Cape town, Durban, Johannesburg and Pretoria) the services below: Receiving, Inventory Management, Order Processing, High Value Store, Value added Services; Services primarily emphasize product flow rather than storage. Revenue contribution from the clearing and forwarding division is based on Business operations in the field of Airfreight, Ocean Freight, Multi-modal solutions, Import & Export and Customs Clearance. The intellectual capital of the BLS group comprises specialists in courier, warehousing, distribution, clearing & forwarding, management information systems, project management and account/contract management. With a contribution of R 210,000,000 to the Total Berco Group Revenue for 2005 and an annual average growth rate of 35% over the previous five years BE has been established a sustainable position within both the Berco Group and the industry. Continuous improvement esteemed as the platform for Excellence has been implemented to guarantee BE's drive towards Service Excellence. SA's transport industry recorded in 2006 a total income of approximately R 160 000 million. This presents an increase of 7.1% p.a. over the income reported to the corresponding survey of 2002. The transport [...]

Marketing is a universal activity that is widely applicable, regardless of the political, social or economic systems of a particular country. However, this doesn't mean that consumers in different parts of the world should be satisfied in the same way. The 4th edition of International Marketing has been written to enable managers and scholars to meet the international challenges they face everyday. It provides the solid foundation required to understand the complexities of marketing on a global scale. The book has been fully updated with topical case studies, examples of contemporary marketing campaigns, the most relevant discussion topics as well as the most up-to-date theories, references and research findings. It is this combination of theory and practice that makes this textbook truly unique, presenting a fully rounded view of the topic rather than an anecdotal or descriptive one alone. The book includes chapters on: \* Trade distortions and marketing barriers \* Political and legal environments \* Culture \* Consumer behaviour \* Marketing research \* Promotion and pricing strategies \* Currencies and foreign exchange Accessibly written and designed, this book is the most international book on marketing available that can be used by undergraduates and postgraduates the world over. A companion website provides additional material for lecturers and students alike.

To manage an effective customer loyalty program, third party logistics service providers (3PLs) must understand the determining factors, as well as cultural background on loyalty. This book develops a model of customer loyalty, which is then validated using empirical data from nearly 800 logistics managers in Germany and the USA. The author reviews the effects of different relational factors on the model, and explores relevant German-US cultural differences.

The 'Trade and Transport Facilitation Assessment' (TTFA) is a tool for identifying inefficiencies in international supply chains that limit a country's ability to compete in international trade. The TTFA examines problems that affect not only exports competitiveness, but also the ability to import and distribute inputs to production and consumer goods. This new TTFA toolkit was developed to meet the growing demand for facilitation and logistics reforms in an environment of increasing global competition and expanded trade in intermediate goods. It reflects practical experience and the change in the nature of demand from developing countries. The TTFA focuses on simplification and harmonization of trade-related procedures and identifies the opportunities for improving logistics services, infrastructure, and the overall performance of specific supply chains. It also outlines practices to develop plans of action with proper interactions with government agencies and stakeholders.

Export and Import Management is a well researched student friendly book that proposes to fill the gap between theory and practice for young managers aspiring for challenging positions in international business. The book is a pioneering effort in this area where only manuals or replicas of manuals have ruled for years. Written in essentially textbook fashion, the book presents interesting forays into the exciting world of export and import. The book is divided into 16 comprehensive chapters that take the reader through a sequential journey in export-import management. The students will be exposed to conceptual framework, procedural detail and practical aspects of international transactions. Interesting examples, cases and illustrations with reference to details make it full of life. Each chapter lists its objectives in the beginning and presents practical exercises at the end. The students will be able to relate their progress to the listed goals easily. Practical exercises will encourage them to go to the field as well as search the internet for more information. The unique feature of the book is a complimentary CD that contains all the relevant export-import forms for practical

learning. The book has been planned keeping in view the needs of the students of MBA/PGDM/PGDBM/MIB and other international business courses at PG/UG level. It will also prove to be a good resource for faculty members.

Since it was first published in 1964, Elements of Shipping has become established as a market leader. Now in its ninth edition, Branch's Elements of Shipping, renamed in memory of Alan Branch, has been updated throughout and revised to take in the many changes that have occurred in the shipping industry in recent years, including the impact of the economic crisis, the Panama Canal expansion and new legislation. All tables and data have been brought up-to-date and many new illustrations have been added. The book explains in a lucid, professional manner the basic elements of shipping, including operational, commercial, legal, economic, technical, managerial, logistical and financial considerations. It also explores how shipping markets behave and provides an overview of the international shipping industry and seaports. Filling a gap for the discerning reader who wishes to have a complete understanding of all the elements of the global shipping scene together with the interface with seaports, international trade and logistics, it remains essential reading for shipping executives along with students and academics with an interest in the shipping industry.

Control Engineering and Information Systems contains the papers presented at the 2014 International Conference on Control Engineering and Information Systems (ICCEIS 2014, Yueyang, Hunan, China, 20-22 June 2014). All major aspects of the theory and applications of control engineering and information systems are addressed, including: – Intelligent systems – Teaching cases – Pattern recognition – Industry application – Machine learning – Systems science and systems engineering – Data mining – Optimization – Business process management – Evolution of public sector ICT – IS economics – IS security and privacy – Personal data markets – Wireless ad hoc and sensor networks – Database and system security – Application of spatial information system – Other related areas Control Engineering and Information Systems provides a valuable source of information for scholars, researchers and academics in control engineering and information systems.

Covers various trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, inter modal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This book includes one page profiles of transportation, supply chain and logistics industry firms.

This publication is the ultimate question and answer book for small and medium-sized enterprises interested in exporting automobile components. It contains information on types of automotive parts, export market, and ways to capture the automobile components market. Other topics covered by this publication include the fundamentals of exporting, information sources on industry trends, buyers and suppliers, Internet directories, e-commerce and online procurement, and packaging and labeling.

Nepal: How to Invest, Start and Run Profitable Business in Nepal Guide - Practical Information, Opportunities, Contacts 2011 Updated Reprint. Updated Annually. Azerbaijan Investment and Trade Laws and Regulations Handbook

Georgia Investment and Business Guide - Strategic and Practical Information

Many of the technological and managerial challenges of operating in the international environment are being addressed through global IT applications at the functional level of the organization. Global Information Systems and Technology: Focus on the Organization and Its Functional Areas provides a forum for identifying the specific impacts of IT in each of these areas and for understanding how the various challenges and solutions in the functional areas are being integrated via information technology. With a total of 27 chapters, this book examines several functional areas -- marketing, financial services, accounting, manufacturing and logistics, research and development, human resources -- all within the context of today's international business enterprise.

Haiti Business Law Handbook Volume 1 Strategic Information and Basic Laws

Kenya Investment and Business Guide - Strategic and Practical Information

This book provides an overview of the key transportation management processes from a shipper's perspective. It enables managers to gain quick insight in the added value of transportation as a strategic differentiator, its key drivers, and guidelines on how to use them in an effective and efficient decision-making process. It explains how to identify and eliminate waste using basic Lean tools and proven concepts. The reader is guided on how to start implementing the Lean methodology and best practices in the industry to realize significant savings. Companies such as Adidas and Amazon are using transportation to increase sales by delivering purchased products faster than the competition. These companies do not treat transportation as a cost center. They are not focusing on reducing transportation spending. They allow customers to buy any product that is available in any store or warehouse and have it delivered to their homes. By delivering faster than the competition, they increase sales. At the same time, they lower their total supply chain costs as faster deliveries lead to fewer returns. Reduction of returns means higher sales and lower transportation costs for returns. The result is higher profits while creating more value for the customer. Transportation is moving from a cost center towards a profit center. The traditional logistics service providers are perceived to not innovate fast enough. Top management must understand the transportation management basics and use it in their strategic decision-making. They should be involved in discussions on how to organize the transport management function in the best way and how to use it as a service differentiator. Transportation is more than the efficient movement of supplies, sub-assemblies and final products. In addition, it is more than the key performance indicators on the business-balanced scorecard. Transportation management professionals fail to catch top management's attention due to the use of technical language. It is more difficult to understand transportation key performance indicators such as loading degree, net and gross pick-up and delivery reliability. It is easier to get top management attention when talking about lost sales due to stock-outs, lost tenders due to long delivery times, high inventory holding and scrap costs.

Trade integration contributes substantially to economic development and poverty alleviation. In recent years much progress was made to liberalize the trade regime, but customs procedures are often still complex, costly and non-transparent. This situation leads to misallocation of resources. 'Customs Modernization Handbook' provides an overview of the key elements of a successful customs modernization strategy and draws lessons from a number of successful customs reforms as well as from customs reform projects that have been undertaken by the World Bank. It describes a number of key import procedures, that have proved particularly troublesome for customs administrations and traders, and provides practical guidelines to enhance their efficiency. The Handbook also reviews the appropriate legal framework for customs operations as well as strategies to combat corruption.

Examines problems U.S. airlines experience when operating abroad & efforts of the departments of State & Transportation to eliminate these problems. Recommendations aimed at improving the effectiveness of the U.S. government's efforts to work with foreign governments to eliminate the obstacles U.S. airlines face that reduce their ability to compete with foreign airlines. Charts & tables

The importance of the international maritime transport industry is difficult to overstate. This new book presents an interdisciplinary approach from a wide range of internationally-based experts. International Maritime Transport represents a radical departure from previous works in its structure and approach. The section editors each discuss the state of the art in the opening chapter, before introducing a selection of works providing a wide-ranging analysis of the subject. Wide discretion of approach has provided literary freedom for individual opinion and analysis within the overall framework: this permits a level of innovation which is perhaps stifled by the more standardized model. Whilst each perspective can be seen as exclusive, together they form a comprehensive volume of issues in contemporary maritime transport. Topics covered include: ports as interfaces, logistics, manpower and skills, financial risk and opportunities, the regulatory framework. Each chapter contains an introduction which explains the context of the chapter within the book and the contemporary state of the art. Under the editorship of maritime experts James McConville, Alfonso Morvillo and Heather Leggate, the book is sure to be of interest to students and academics working on maritime studies, as well as being useful to professionals and policy makers in the maritime industry.

This volume of three books presents recent advances in modelling, planning and evaluating city logistics for sustainable and liveable cities based on the application of ICT (Information and Communication Technology) and ITS (Intelligent Transport Systems). It highlights modelling the behaviour of stakeholders who are involved in city logistics as well as planning and managing policy measures of city logistics including cooperative freight transport systems in public-private partnerships. Case studies of implementing and evaluating city logistics measures in terms of economic, social and environmental benefits from major cities around the world are also given.
