Liar & Spy meets The Parker Inheritance in this whimsically complex story about human connection and the power we all have to determine our own fate. Is there anything more random than middle school? Sixth graders Oliver and Frankie don't think so. Their first few weeks have been full of weirdness -- lunchtime thievery, free beef jerky, and Matilda, the mysterious new girl who knows everything about them, but has a lot to learn about making friends. But what if none of it is random at all? What if a reclusive genius is keeping an eye on them and making sure the tiny pieces of his puzzle fall into place, one by one, until strange, seemingly unconnected incidents snowball totally out of control? Imagine the odds! First a cardamom shortage takes down the school bully. Then a giant dog leads to some extracurricular spying. Soon Oliver is being followed and Matilda is hacking the FBI. And by the time they discover a gang of angry clowns and the world's largest game of Mousetrap, an insanely brilliant plan has been set in motion that will change their lives forever. Connect the Dots is an intricately plotted story about the power of human connection and a chain of "coincidences" so serendipitous they must be destiny at work.

Connecting the Dots presents three key interconnected areas of focus that will have the most impact on teaching and learning. 1. Building Strong Relationships: creating a sense of belonging, establishing norms and high expectations; and understanding barriers, like unconscious bias and misconceptions, in order to break them down 2. Maximising Memory: managing cognitive load, using effective learning strategies, planning for long term retention and application of knowledge 3. Cultivating Learning Mindsets: building self-efficacy; developing metacognitive skills; and using feedback, goal setting and talk effectively Each of these three chapters lays out the research worth knowing and applies that research to ready-to-use teaching tools for real classrooms. The chapters conclude with detailed guides to support leadership in creating personalised professional learning sessions to turnkey these concepts to school staff.

that rings true now more than ever. We're reveling in information nirvana while relying on outdated learning habits that don't stack up. All the world's knowledge is at our fingertips, we're able to consume whatever we want whenever we want it-but this, unfortunately, doesn't guarantee that we will make the best use of our time or that we will remember what we think we're learning. If we're going to raise the collective intelligence and creativity of the world at large, education must escape the school system and become an activity pursued by people of all ages and from all walks of life. The first step in this process is learning how to learn. Among Connecting the Dot's most valuable insights: - What happens in the brain as we experience and learn - How technology and science are driving a need for continued education - Why our ability to plan and predict rests upon our knowledge - What we should focus on to become an expert - How to avoid the many biases and fallacies in our current learning methodologies Connecting the Dots will lead you on a journey through the brain, the mind, the environment, and the future, providing a well-rounded picture of why learning is essential and how to best achieve it.
