This book examines the global scope of tourism-related grabbing of land and other natural resources. Tourism is often presented as a peaceful and benevolent sector that brings people from different cultural backgrounds together and contributes to employment, poverty alleviation, and global sustainable development. This book sheds light on the lesser known and much darker side of tourism as it unfolds in the Global South. While there is no doubt that tourism has been an engine of economic growth for many so-called developing countries, this has often come at the cost of widespread dispossession and displacement of Indigenous and non-indigenous communities. In many countries of the Global South, tourism development is increasingly prioritised by governments, businesses, international financial institutions and donors over the legitimate land and resource rights of local people. This book examines the actors, drivers, mechanisms, discourses and impacts of tourism-related land grabbing and displacement, drawing on more than thirty case studies from Latin America and the Caribbean, sub-Saharan Africa, South and Southeast Asia, the Middle East and the Southwest Pacific. The book provides solid grounds for an informed debate on how different actors are responsible for the adverse impacts of tourism on land rights infringements, what forms of resistance have been deployed against tourism-related land grabs and displacement, and how those who have violated local land and resource rights can be held accountable. Tourism, Land Grabs and Displacement will be essential reading for students and scholars of land and resource grabbing, tourism studies, development studies and sustainable development more broadly, as well as policymakers and practitioners working in those fields.

This book explores the demise of the grand narrative of European modernity. That once commanding narrative located the meaning of the past in the present and the meaning of the present in an ever-receding future. Today, instead, the present defines both the past and the future. The 'contemporary' has replaced 'modern' and 'post-modern' self-understandings. The times of the past and the future have been transformed into versions of 'now' while the present has acquired its own history. History of the Present describes the emergence of this 'contemporary' historical consciousness across a wide spectrum of cultural phenomena ranging from historiography to heritage and museum studies, and from the globalization of the novel to the rise of science fiction. The culture of the 'contemporary' appears particularly clearly in the merging of high and low culture along with art and fashion. This book will appeal to scholars of sociology, cultural and social theory, museum and heritage studies, and literary history and criticism.

Beginning with general international Web sites the guide is then organized by continent, then by specific country. Sites are divided into five categories within each country - general information, economy, business and trade, business travel and contact information.

network of travelers who've discovered the most enjoyable things to do and can provide guidance on how much to pay for them. The book also tells how to memorialize the adventure through photography and blogging, and even how to earn money from the trip after returning home. Sangster and Leffel are both authoritative and encouraging, drawing on years of experience to help travelers maximize the fun, savings, and security without compromising quality.
