Jens Ohlin's Criminal Law is designed to respond to the changing nature of law teaching by offering a shorter, flexible, and more doctrinal approach, with an emphasis on application. Materials are presented, in a visually lively style, via a consistently structured pedagogy within each chapter: Doctrine (treatise-like explanation), Application (cases), and Practice/Policy (questions providing an opportunity for normative critique of the law and exploration of practical and strategic challenges facing criminal lawyers). Theory is integrated into the doctrine section rather than conveyed through law review excerpts, so as to help students make the necessary connections to doctrinal issues. Aggressively-edited cases help keep the length to a minimum, and modern cases will engage younger students and professors. New to the Third Edition: New materials on mass incarceration, the "defund the police" movement, and prison abolition Revised chapter on Felony Murder, taking into account recent doctrinal developments, including California's repeal of the doctrine Revised chapter on Provocation New Problem Case dealing with "Swatting" New chapter on Offenses Against the Administration of Justice, covering obstruction of justice, perjury, bribery, corruption, and contempt of court Professors and students will benefit from: Structure and content which line up with how professors actually teach the course, as opposed to how the course was taught a generation ago Integrated notes throughout the casebook, directing students to view a series of 20 short video clips that bring the doctrinal controversies to life in a fictional courtroom Shorter-than-average casebook length, helping to make it more manageable for professors with reduced course hours Brief chapters, each focusing on a single doctrine Innovative pedagogy emphasizing application of law to facts (while still retaining enough flexibility so as to be useful for a variety of professors with different teaching styles) Theory interwoven into

doctrine materials (rather than rigorous law review excerpts) New, fresh, tightly-edited cases Post-case notes and questions to invite closer examination of doctrine/application and to generate class discussion "Problem Case" boxes (featuring high-profile cases and which include discussion questions) Hypotheticals "Afterward" boxes (following some cases) "Advice" boxes "Practice and Policy" sections in each chapter, urging students to consider how the various actors in the process (prosecutors, defense counsel, judges and juries) make particular decisions and the strategic calculations that informed them, and make this casebook more practice-ready than others Open, two-color design with appealing visual elements (including carefully-selected photographs)

The approach of *A First-Year Course in Criminal Law: Trials, Appeals, Theories*, Third Edition focuses students on preparing to discuss a single case per lecture. The author's philosophy is "Teach one case a day and do it well." To help students understand the big picture as well as the details, the organization strives for unification rather than departmentalization. Rather than treat crimes and defenses as "tubs on their own bottoms," the defenses within the crimes are presented. In other words, the book brings out that crime occurs only in the absence of fully or partially successful exculpatory pleas. Although homicide is the crime that organizes the book, the elements and scope of other crimes are presented within the context of the law of homicide. Comprehension of assault, burglary, kidnapping, mayhem, robbery, and rape is crucial to the cases used to present the law of felony murder. Those crimes are analyzed in the cases, questions, and notes sufficiently to provide students with competency in the grammar of those crimes. New to the Third Edition: More patient explication of chapter introductions and sub-sections Reorganization of questions and notes to improve flow and avoid unintended redundancies Improved internal cross-references Increased emphasis on the function of mental illness in the role of fear in homicide cases Enhanced searchable citations Elaborated index Accounts for intervening changes in the law

This book differs from many other casebooks in two significant ways. First, the cases are included and edited with an eye towards the number of class hours available to teach the course. The chapters are constructed so that the content can be covered in similar blocks of time. For example, one class session covers infancy, intoxication, duress, necessity, and entrapment and two class sessions are devoted to coverage of insanity. The book can be substantially completed in a three-hour course and easily completed in a four-hour course. The other feature of this book is that it is designed to focus students' attention on the problem at hand as illustrated by the case they are studying. Before each case, the student is told why the case has been included and what they should be considering when reading the case. The notes and questions that follow each case are designed to focus the students' attention on some of the more difficult issues raised by the case. This eBook features links to Lexis Advance for further legal research options.

An Interdisciplinary Approach Criminal Law provides students with an integrated framework for understanding the U.S. criminal justice system with a diverse and inclusive interdisciplinary approach and thematic focus. Authors Katheryn Russell-Brown and Angela J. Davis go beyond the law and decisions in court cases to consider and integrate issues of race, gender, and socio-economic status with their discussion of criminal law. Material from the social sciences is incorporated to highlight the intersection between criminal law and key social issues. Case excerpts and detailed case summaries, used to highlight important principles of criminal law, are featured throughout the text. The coverage is conceptual and practical, showing students how the criminal law applies in the "real world"—not just within the pages of a textbook.
