CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."

Throughout history, religion has been used as a tool of female subjugation. Women have been deemed less worthy than men, have been prevented from owning property, and worse--all in the name of a higher power. In recent decades, women have made progress in terms of equal rights with men, at least in Western democracies, but still, why has the United States never had a female president? Why aren't more women heads of Fortune 500 companies? Why do politicians in the West continue to attack women's reproductive rights? As this volume explores, it would be hard to find a bigger culprit than religion when identifying the last cultural barriers to full gender equality. With topics ranging from the subjugation of women in the Bible to the shame and guilt felt by women due to religious teaching, this volume makes clear that only by rejecting the very system that limits their autonomy will women be fully liberated from its malignant influences, not just in codified law but also in cultural practice.
