Scandinavian popular novels and films have flourished in the last thirty years. In *Crime and Fantasy in Scandinavia*, Andrew Nestingen argues that the growth and visibility of popular culture have been at the heart of the development of heterogeneous publics in Scandinavia, in opposition to the homogenizing influence of the post-World War II welfare state. Novels and films have mobilized readers and viewers, serving as a preeminent site for debates over individualism, collectivity, national homogeneity, gender, and transnational relations. *Crime and Fantasy in Scandinavia* provides insight into the changing nature of civil society in Scandinavia through the lens of popular culture. Nestingen develops his argument through the examination of genres where the central theme is individual transgression of societal norms: crime films and novels, melodramas, and fantasy fiction. Among the internationally known writers and filmmakers discussed are Henning Mankell, Aki Kaurismäki, Lukas Moodysson, and Lars von Trier.

A washed-up, middle-aged British philosopher teams up with an incompetent, one-armed bank robber to plan the ultimate bank job. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. This three-volume work is a must for the bookshelf of anyone interested in Old English magic, medicine, folklore, and heathen practice. Published in 1864-6, it was put together and edited by Thomas Oswald Cockayne (1807-73), a Cambridge graduate, much-published early member of the London Philological Society, and teacher of the philologists Walter Skeat and Henry Sweet. It is a collection of writings and lore from Anglo-Saxon England on plants, medicine and the heavens, mostly in Old English with accompanying modern English translations. Volume 1 begins with a substantial preface outlining the Anglo-Saxon reception of Greek and Latin medical texts. The main work in this volume is an Old English version of the late Latin *Herbarium* formerly attributed to Apuleius, augmented by material deriving from Dioscorides' *De Materia Medica*. The volume concludes with an Old English translation of the fourth-century Roman physician Sextus Placitus' writings on animal-derived medicines, and some short medicinal recipes in Old English and Latin taken from the fly leaves of manuscripts. In this new reproduction of the original work, the announcements and advertisements of the original publisher, having nothing essential to do with the work, have been removed. This does not affect the original page-numbering.

Mystery fiction takes place in a centered world, one whose most distinctive characteristic is motivation (of behavior and signs). Built on a faith in foundations, it insists upon the solidity of social life, the validity of social conventions, and the sanctity of signs. Mystery assures us that motives exist for both words and deeds."

Philosophy, Crime, and Criminology represents the first systematic attempt to unpack the philosophical foundations of crime in Western culture. Utilizing the insights of ontology, epistemology, aesthetics, and ethics, contributors demonstrate how the reality of crime is informed by a number of implicit assumptions about the human condition and unstated values about civil society. Charting a provocative and original direction, editors Bruce A. Arrigo and Christopher R. Williams couple theoretically oriented chapters with those centered on application and case study. In doing so, they develop an insightful, sensible, and accessible approach for a philosophical criminology in step with the political and economic challenges of the twenty-first century. Revealing the ways in which philosophical conceits inform prevailing conceptions of crime, *Philosophy, Crime, and Criminology* is required reading for any serious student or scholar concerned with crime and its impact on society and in our lives.
