In this deeply moving collection of short stories and essays, Gordon Lee Johnson (Cupeño/Cahuilla) cements his voice not only as a wry commentator on American Indian reservation life but also as a master of fiction writing. In Johnson's stories, all of which are set on the fictional San Ignacio reservation in Southern California, we meet unforgettable characters like Plato Pena, the Stanford-bound geek who reads Kahlil Gibran during intertribal softball games; hardboiled investigator Roddy Foo; and Etta, whose motto is "early to bed, early to rise, work like hell, and advertise," as they face down circumstances by turns ordinary and devastating. From the noir-tinged mystery of "Unholy Wine" to the gripping intensity of "Tukwut," Johnson effortlessly switches genre, perspective, and tense, vividly evoking people and places that are fictional but profoundly true to life. The nonfiction featured in *Bird Songs Don't Lie* is equally revelatory in its exploration of complex connections between past and present. Whether examining his own conflicted feelings toward the missions as a source of both cultural damage and identity, sharing advice for cooking for eight dozen cowboys and -girls, or recounting an influx of New Age seekers of enlightenment in the Pushcart-nominated "100 White Women," Johnson plumbs the comedy, catastrophe, and beauty of his life on the Pala Reservation to thunderous effect.

The stories written in and about the Imperial Valley, both romantic and real, are the subject of this unique comparative study of both literature and the land.

In 2015, 239 Indian tribes operated 478 casinos, high-stakes bingo halls, and other gambling facilities on Indian reservations in 28 states that collectively earned \$28.5 billion in gross gaming revenue. How did Indian gambling become such a lucrative and commonplace fixture of the American landscape? In *Wampum*, Donald Craig Mitchell tells the never-before-told story. In 1979, the Mafia opened the nation's first high-stakes Indian bingo hall on the Seminole reservation in Florida. Nine years later, Indian tribes were operating bingo halls on reservations in 23 states. Congress enacted the Indian Gaming Regulatory Act to subject gambling on reservations to regulation by the federal government and the states in which the reservations were located. But, while members of Congress who voted for the bill didn't intend for it to do so, the act facilitated the transformation of Indian bingo halls into what they are today—Las Vegas-style casinos whose gaming floors contain more than 352,000 video slot and other gaming machines. On Capitol Hill, Donald Craig Mitchell is a recognized expert on Indian law and history, and the only researcher who had early access to the records of the committees whose members and staff wrote the bills that became the Indian Gaming Regulatory Act. In *Wampum*, he offers readers the first comprehensive look at the forces in Congress and inside the Bureau of Indian Affairs that have created the Indian gaming industry.

Latinas in the United States: A Historical Encyclopedia records the contribution of women of Latin American birth or heritage to the economic and cultural development of the United States. The encyclopedia, edited by Vicki L. Ruiz and Virginia Sánchez-Korrol, is the first comprehensive gathering of scholarship on Latinas. This encyclopedia will serve as an

essential reference for decades to come. In more than 580 entries, the historical and cultural narratives of Latinas come to life. From mestizo settlement, pioneer life, and diasporic communities, the encyclopedia details the contributions of women as settlers, comadres, and landowners, as organizers and nuns. More than 200 scholars explore the experiences of Latinas during and after EuroAmerican colonization and conquest; the early-19th-century migration of Puerto Ricans and Cubans; 20th-century issues of migration, cultural tradition, labor, gender roles, community organization, and politics; and much more. Individual biographical entries profile women who have left their mark on the historical and cultural landscape. With more than 300 photographs, Latinas in the United States offers a mosaic of historical experiences, detailing how Latinas have shaped their own lives, cultures, and communities through mutual assistance and collective action, while confronting the pressures of colonialism, racism, discrimination, sexism, and poverty. "Meant for scholars and general readers, this is a great resource on Latinas and historical topics connected with them." -- curledup.com

She was both guardian of the hearth and, on occasion, ruler and warrior, leading men into battle, managing the affairs of her people, sporting war paint as well as necklaces and earrings. She built houses and ground corn, wove blankets and painted pottery, played field hockey and rode racehorses. Frequently she enjoyed an open and joyous sexuality before marriage; if her marriage didn't work out she could divorce her husband by the mere act of returning to her parents. She mourned her dead by tearing her clothes and covering herself with ashes, and when she herself died was often shrouded in her wedding dress. She was our native sister, the American Indian woman, and it is of her life and lore that Carolyn Niethammer

writes in this rich tapestry of America's past and present. Here, as it unfolded, is the chronology of the native American woman's life. Here are the birth rites of Caddo women from the Mississippi-Arkansas border, who bore their children alone by the banks of rivers and then immersed themselves and their babies in river water; here are Apache puberty ceremonies that are still carried on today, when the cost for the celebrations can run anywhere from one to six thousand dollars. Here are songs from the Night Dances of the Sioux, where girls clustered on one side of the lodge and boys congregated on the other; here is the Shawnee legend of the Corn Person and of Our Grandmother, the two female deities who ruled the earth. Far from the submissive, downtrodden "squaw" of popular myth, the native American woman emerges as a proud, sometimes stoic, always human individual from whom those who came after can learn much. At a time when many contemporary American women are seeking alternatives to a life-style and role they have outgrown, *Daughters of the Earth* offers us an absorbing -- and illuminating -- legacy of dignity and purpose.

In *Sovereign Stories*, Annette Angela Portillo examines Native American women's autobiographical discourses and multiple-voiced life stories that resist generic conventional notions of first-person narrative. She argues that these "sovereign stories" and "blood memories" not only reveal the multilayered histories and identities shared by each author, but demonstrate how their narratives are grounded in ancestral memory and land. These autobiographies recall settler-colonialism, deterritorialization, and genocide as the writers and activist-scholars reclaim their voices across cultural, national, and digital boundaries. Portillo provides close readings of memoirs, life stories, oral histories, blogs, social media sites, and experimental multigenre narratives including those by Delfina Cuero, Ruby Modesto, Leslie

This autobiography is typical of the life stories of most of the Indians who had no place to call their own. The men, and those women who were not widowed with small children did not have quite as much difficulty as Delfina. In Delfina's life is seen the destruction of Indian self-sufficiency on the land, of Indian society, culture, and religion.

This volume chronicles the life of a Kumeyaay woman who lives between three cultures and across the boundary of the US and Mexico. She was raised in a small family, who only had a donkey to carry their few possessions. They survived by working small ranches and living in the canyons where they could. Their foraging territory included Mission Valley, the backcountry of SD, Eastside canyons of the US and Mexico and all the way to the Gulf of California. Having no papers, she lost her husband and was forced to make terrible compromises to survive with her children. All this cultural disintegration has a bit of a happy ending when she gets some papers and stays on a reservation near Campo. Cuero demonstrated an encyclopedic knowledge of useful plants and management of the Chaparral environment, making ethnobotanic

Malki-Ballena Press is proud to announce our latest publication, An Artist's Portfolio, The California Sketches of Henry B. Brown, 1851-52. Over a century and a half ago,

during the waning moments of the frenzied search for gold that was in the process of tragically altering California's landscape and the lives of her native peoples forever, an obscure artist named Henry B. Brown set out to capture—in a series of beautifully rendered drawings—the scenery and lifeways to be found in the Sierra foothills and Sacramento Valley. The result was a collection of drawings that depict both a world on the verge of profound change and the agents of that change. Here are pristine landscapes, Native Americans quietly going about their daily lives, turbulent mining camps, and empathetic portraits of some of the men and women that Brown encountered.

“A gem of historical scholarship!”—Vicki L. Ruiz, author of *From Out of the Shadows: Mexican Women in Twentieth-Century America* How do intimate relationships reveal, reflect, enable, or enact the social and political dimensions of imperial projects? In particular, how did colonial relations in late-eighteenth- and nineteenth-century southern California implicate sexuality, marriage, and kinship ties? In *Colonial Intimacies*, Erika Pérez probes everyday relationships, encounters, and interactions to show how intimate choices about marriage, social networks, and godparentage were embedded in larger geopolitical concerns. Her work reveals, through the lens of social and familial intimacy, subtle tools of conquest and acts of resistance and accommodation among indigenous peoples, Spanish-Mexican settlers, Franciscan missionaries, and European and Anglo-American merchants. Concentrating on Catholic conversion, *compadrazgo*

(baptismal sponsorship that often forged interethnic relations), and intermarriage, Pérez examines the ways indigenous and Spanish-Mexican women helped shape communities and sustained their culture. She uncovers an unexpected fluidity in Californian society—shaped by race, class, gender, religion, and kinship—that persisted through the colony's transition from Spanish to American rule. *Colonial Intimacies* focuses on the offspring of interethnic couples and their strategies for coping with colonial rule and negotiating racial and cultural identities. Pérez argues that these sons and daughters experienced conquest in different ways tied directly to their gender, and in turn faced different options in terms of marriage partners, economic status, social networks, and expressions of biculturality. Offering a more nuanced understanding of the colonial experience, *Colonial Intimacies* exposes the personal ties that undergirded imperial relationships in Spanish, Mexican, and early American California. California is a contentious arena for the study of the Native American past. Some critics say genocide characterized the early conduct of Indian affairs in the state; others say humanitarian concerns. Robert F. Heizer, in the former camp, has compiled a damning collection of contemporaneous accounts that will provoke students of California history to look deeply into the state's record of race relations and to question bland generalizations about the adventuresome days of the Gold Rush. Robert F. Heizer's many works include the classic *The Other Californians: Prejudice and Discrimination under Spain, Mexico, and the United States to 1920* (1971), written with Alan Almquist.

In his introduction, Albert L. Hurtado sets the documents in historical context and considers Heizer's influence on scholarship as well as the advances made since his death. A professor of history at Arizona State University, Hurtado is the author of *Indian Survival on the California Frontier*.

"The Ipai (also known as Kumeyaay) are the native people of northern San Diego County. This book illustrates how one Ipai family's remarkable story forms part of the little-known, yet profoundly significant long-term history of human habitation in the land that only recently has come to be known as southern California. Beginning with the ancestors' accounts of the creation of the world that link the Ipai with the unique characteristics of our region's natural world, the journey then takes readers through the archaeological, historical, ethnographic and contemporary accounts of the dramatic transformations through which the Ipai have persisted and ultimately prospered"--Provided by publisher.

This is the first book that documents poverty systematically for the world's indigenous peoples in developing regions in Asia, Africa, and Latin America. The volume compiles results for roughly 85 percent of the world's indigenous peoples. It draws on nationally representative data to compare trends in countries' poverty rates and other social indicators with those for indigenous sub-populations and provides comparable data for a wide range of countries all over the world. It estimates global poverty numbers and analyzes other important development indicators, such as schooling, health, and social

protection. Provocatively, the results show a marked difference in results across regions, with rapid poverty reduction among indigenous (and non-indigenous) populations in Asia contrasting with relative stagnation - and in some cases falling back - in Latin America and Africa. Two main factors motivate the book. First, there is a growing concern among poverty analysts worldwide that countries with significant vulnerable populations - such as indigenous peoples - may not meet the Millennium Development Goals, and thus there exists a consequent need for better data tracking conditions among these groups. Second, there is a growing call by indigenous organizations, including the United Nations Permanent Forum on Indigenous Peoples, for solid, disaggregated data analyzing the size and causes of the "development gap." First published in 1973, this is an essential work on the corruption of the medical establishment and its historic roots in witch hunts. In this new edition, Barbara Ehrenreich and Deirdre English have written an entirely new chapter that delves into the current fascination with and controversies about witches, exposing fears and fantasies. They build on their classic exposé of the demonisation of women healers and the political and economic monopolisation of medicine, bringing it up to date with today's changing attitudes to these issues. When an angry bear bothers the villagers, they quickly feed him sugar as soon as he arrives to lighten up his mood.

Before outsiders arrived, about 100 distinct Indian languages were spoken in California, many of them alive today. Each of these languages represents a unique way of understanding the world and expressing that understanding. *Flutes of Fire* examines many different aspects of Indian languages: languages, such as Yana, in which men and women have markedly different ways of speaking; ingenious ways used in each language for counting. Hinton discusses how language can retain evidence of ancient migrations, and addresses what different groups are doing to keep languages alive and pass them down to the younger generations.

Cecelia Capture Welles, an Indian law student and mother of two, is jailed on her thirtieth birthday for drunk driving. Held on an old welfare fraud charge, she reflects back on her life on the reservation in Idaho, her days as an unwed mother in San Francisco, her marriage to a white liberal, and her decision to return to college. This mixed inheritance of ambition and despair brings her to the brink of suicide. "The Jailing of Cecelia Capture is a beautifully written book. Janet Campbell Hale's gifts are genuine and deeply felt.", Toni Morrison

This book brings together all of the known writings of William Apess, a Native American of mixed Pequot and white parentage who fought for the United States in the War of 1812, became a Methodist minister in 1829, and championed the rights of the Mashpee tribe on Cape Cod in the 1830s. Apess's *A Son of the Forest*, originally published in 1829, was the first extended autobiography by an American Indian. Readable and engaging, it is not only a rare statement by a Native American, but also an unusually full document in the history of New England native peoples. Another piece in the collection, *The Experiences of Five Christian Indians of the Pequo[d] Tribe* (1833), concludes with an eloquent and unprecedented attack on

Online Library Delfina Cuero Her Autobiography An Account Of Her Last Years And Her Ethnobotanic Contributions

Euro-American racism entitled "An Indian's Looking-Glass for the White Man." Also included are Apess's account of the "Mashpee Revolt" of 1833-34, when the Native Americans of Mashpee petitioned the government of Massachusetts for the right to elect their own representatives, and his Eulogy on King Philip, an address delivered in Boston in 1836 to mark the 160th anniversary of King Philip's War. In his extensive introduction to the volume, Barry O'Connell reconstructs the story of Apess's life, situates him in the context of early nineteenth-century Pequot society, and interprets his writings both as a literary act and as an expression of emerging Native American politics.

Since the early 1700s, women of Spanish/Mexican origin or descent have played a central, if often unacknowledged, role in Texas history. Tejanas have been community builders, political and religious leaders, founders of organizations, committed trade unionists, innovative educators, astute businesswomen, experienced professionals, and highly original artists. Giving their achievements the recognition they have long deserved, this groundbreaking book is at once a general history and a celebration of Tejanas' contributions to Texas over three centuries. The authors have gathered and distilled a wide range of information to create this important resource. They offer one of the first detailed accounts of Tejanas' lives in the colonial period and from the Republic of Texas up to 1900. Drawing on the fuller documentation that exists for the twentieth century, they also examine many aspects of the modern Tejana experience, including Tejanas'

contributions to education, business and the professions, faith and community, politics, and the arts. A large selection of photographs, a historical timeline, and profiles of fifty notable Tejanas complete the volume and assure its usefulness for a broad general audience, as well as for educators and historians.

Explores the origins, arguments and impact of the landmark 1987 decision that reasserted the sovereignty of American Indian nations, barred states from interfering with tribes' sovereignty and opened the door for a boom in the Indian-gaming industry.

"The purpose of this project is to provide a resource guide for medical providers and traditional health care practitioners in an effort to better coordinate patient care with traditional practices. This guide will help to illuminate some contraindications of western medicine with Southern California Native American traditional medicine, in hopes of protecting patients from any negative reactions. A secondary purpose ... is to make available information about traditional medicine to anyone interested in disease prevention through Native American knowledge and traditions."--P. 1.
