

Diario Di Sabet

This book explores the importance of local courts in enacting positive social and economic reform in Brazil and Mexico.

The urgent need to professionalize Mexican police has been recognized since the early 1990s, but despite even the most well-intentioned promises from elected officials and police chiefs, few gains have been made in improving police integrity. Why have reform efforts in Mexico been largely unsuccessful? This book seeks to answer the question by focusing on Mexico's municipal police, which make up the largest percentage of the country's police forces. Indeed, organized crime presents a major obstacle to institutional change, with criminal groups killing hundreds of local police in recent years. Nonetheless, Daniel Sabet argues that the problems of Mexican policing are really problems of governance. He finds that reform has suffered from a number of policy design and implementation challenges. More importantly, the informal rules of Mexican politics have prevented the continuity of reform efforts across administrations, allowed patronage appointments to persist, and undermined anti-corruption efforts. Although many advances have been made in Mexican policing, weak horizontal and vertical accountability mechanisms have failed to create sufficient incentives for institutional change. Citizens may represent the best hope for counterbalancing the toxic effects of organized crime and poor governance, but the ambivalent relationship between citizens and their police must be overcome to break the vicious cycle of corruption and ineffectiveness.

With Mexico's War on Crime as the backdrop, *Making Things Stick* offers an innovative analysis of how surveillance technologies impact governance in the global society. More than just tools to monitor ordinary people, surveillance technologies are imagined by government officials as a way to reform the national state by focusing on the material things—cellular phones, automobiles, human bodies—that can enable crime. In describing the challenges that the Mexican government has encountered in implementing this novel approach to social control, Keith Guzik presents surveillance technologies as a sign of state weakness rather than strength and as an opportunity for civic engagement rather than retreat.

Sarà nella neve e nella solitudine che la caccia che lo Stato ha dato a Sabet avrà fine. Nonostante tutto ha fatto del suo meglio per proteggere l'Ospite venuto da là fuori. La sua vita e i suoi ricordi affidati al computer portatile che contiene il suo diario, l'unica cosa che potrà dire cos'è accaduto veramente. E là fuori qualcuno si ricorderà di lei

This volume focuses on the specific relationship between the institutional impunity, lack of public safety and public space in failing to prevent organized sexual murder. The murder of women on the U.S.-Mexican border is a complex phenomenon with multiple geographic, economic, political, sociological, and psychological causes.

Ciudad Juárez has recently become infamous for its murder rate, which topped 3,000 in 2010 as competing drug cartels grew increasingly violent and the military responded with violence as well. Despite the atmosphere of intimidation by troops, police, and organized criminals, women have led the way in civil society activism, spurring the Juárez Resistance and forging powerful alliances with anti-militarization activists. An in-depth examination of *la Resistencia Juareense*, *Courage, Resistance, and Women in Ciudad Juárez* draws on ethnographic research to analyze the resistance's focus on violence against women, as well as its clash with the war against drugs championed by Mexican President Felipe Calderón with the support of the United States. Through grounded insights, the authors trace the transformation of hidden discourses into public discourses that openly challenge the militarized border regimes. The authors also explore the advocacy carried on by social media, faith-based organizations, and peace-and-justice activist Javier Sicilia while Calderón faced U.S. political schisms over the role of border trade in this global manufacturing site. Bringing to light on-the-ground strategies as well as current theories from the fields of sociology, political anthropology, and human rights, this illuminating study is particularly significant because of its emphasis on the role of women in local and transnational attempts to extinguish a hot zone. As they overcome intimidation to become game-changing activists, the figures featured in *Courage, Resistance, and Women in Ciudad Juárez* offer the possibility of peace and justice in the wake of seemingly irreconcilable conflict.

This brief fills a gap in the studies of organized crime in Mexico (Kan 2012, Ríos 2011, Dell 2011) by documenting and mapping the post-2008 assassination of Mexican border police chiefs. It traces out a “systematic” of law-enforcement assassination in Northern Tier Mexico, showing how the selective, often sequential, hits by cartels on chiefs in border towns and along key drug-trafficking corridors has proven an effective strategy by organized crime elements to serve several goals: (1) to retaliate for federal, state and local prosecution, (2) to try and neutralize police chiefs, (3) to achieve intermittent local governance and/or to seed corrupt police chiefs at the municipal level, and, (4) to reduce local governmental capacity to obtain greater freedom for movement of goods. It is argued that the tactical advantage of organized crime elements gives them relatively easy physical access to law enforcement targets and thus is thus one prime element facilitating the use of assassination as a strategy. U.S. and Mexican legal, political and judicial institutions have not been able to adequately restrict opportunity for law-enforcement assassinations. The inability to reduce access to weapons and officials, to increase security for police personnel, to reduce corruption and punish offenders sets the stage for the assassination of local law enforcement. Yet, it is the goals of organized crime elements (to clear drug-smuggling routes and to try and gain more pliant governance at the municipal level) that ultimately motivate such killings. Integrate global learning activities in your elementary classrooms today with this easy-to-use guide! This smart, all-in-one resource from widely acclaimed authors Homa Tavangar and Becky Morales provides hundreds of easy, stand-alone activities, resources, and projects to help busy educators: Seamlessly integrate global awareness themes into existing K-5 Common Core curriculum Recruit parent and community volunteers and organizations Use social media for student global collaboration projects Plan international events, after-school clubs, and cross-curricular activities Includes a 12-month timeline, backmapping tips, 50+ ready-to-start projects, and online links.

Across the world, developing countries are attempting to balance the international standards of intellectual property concerning pharmaceutical patents against the urgent need for accessible and affordable medicines. In this timely and necessary book, Monirul Azam examines the attempts of several developing countries to walk this fine line. He evaluates the experiences of Brazil, China, India, and South Africa for lessons to guide Bangladesh and developing nations everywhere. Azam's legal expertise,

concern for public welfare, and compelling grasp of principal case studies make Intellectual Property and Public Health in the Developing World a definitive work. The developing world is striving to meet the requirements of the World Trade Organization's TRIPS Agreement on intellectual property. This book sets out with lucidity and insight the background of the TRIPS Agreement and its implications for pharmaceutical patents, the consequences for developing countries, and the efforts of certain representative nations to comply with international stipulations while still maintaining local industry and public health. Azam then brings the weight of this research to bear on the particular case of Bangladesh, offering a number of specific policy recommendations for the Bangladeshi government—and for governments the world over. Intellectual Property and Public Health in the Developing World is a must-read for public policy-makers, academics and students, non-governmental organizations, and readers everywhere who are interested in making sure that developing nations meet the health care needs of their people. Shares eye-to-eye portrait photographs taken by the amateur photographer in locales ranging from her hometown of Chicago to France, Italy, and Thailand.
