Covering—the musical practice of one artist recording or performing another composer's song—has always been an attribute of popular music. In 2009, the internet database Second Hand Songs estimated that there are 40,000 songs with at least one cover version. Some of the more common variations of this "appropriationist" method of musical quotation include traditional forms such as patriotic anthems, religious hymns such as Amazing Grace, Muzak's instrumental interpretations, Christmas classics, and children's songs. Novelty and comedy collections from parodists such as Weird Al Yankovic also align in the cover category, as does the "larcenous art" of sampling, and technological variations in dance remixes and mash-ups. Film and television soundtracks and advertisers increasingly rely on versions of familiar pop tunes to assist in marketing their narratives and products. The cover phenomenon in popular culture may be viewed as a postmodern manifestation in music as artists revisit, reinterpret and re-examine a significant cross section of musical styles, periods, genres, individual records, and other artists and their catalogues of works. The cover complex, with its multiple variations, issues, contexts, and re-contextualizations comprises an important and rich popular culture text. These re-recordings represent artifacts which embody artistic, social, cultural, historical, commercial, biographical, and novel meanings. Through homage, allusion, apprenticeship, and parody, among other modes, these diverse musical quotations express, preserve, and distribute popular culture, popular music and their intersecting historical narratives. *Play it Again* represents the first collection of critical perspectives on the many facets of cover songs in popular music.

(Guitar Reference). Until the launch of the Flying V and Explorer in 1958, electric guitars were supposed to look like...guitars. Suddenly, Gibson turned conventional design upside down, almost literally, by using straight lines and angular body shapes, changing the way electrics could look and, in the process, creating a set of rare future collectables. Flying V, Explorer, Firebird tells the story of those first peculiar instruments and goes on to describe Gibson's second attempt at nonstandard designs with the Firebird of the early '60s. The book shows how most of these were a commercial failure at first and goes on to detail the influence of the designs on guitar-makers such as Hamer, Jackson, Dean, Ibanez, and BC Rich, all of whom embraced Gibson's original weird-is-good design ethic. In parallel with the story of the makers is an absorbing account of the players who discovered these odd-shaped instruments, including Zakk Wylde (Black Label Society), the Edge (U2), and Rick Nielsen (Cheap Trick). Interviews with players and makers illuminate the story of this fascinating assortment of electric guitar innovations, alongside specially commissioned images of every key model and brand and an enviable collection of guitar memorabilia, plus a gallery of leading guitarists photographed in action with their instruments. If it's weird and has strings, it's in Flying V, Explorer, Firebird.

Music for Life: Music Participation and Quality of Life of Senior Citizens presents a fresh, new exploration of the impact of musical experiences on the quality of life of senior citizens, and charts a new direction in the facilitation of the musical lives of people of all ages. Authors Fung and Lehmborg clearly define the issues surrounding music education, music participation, quality of life, and senior citizens, discussing the most relevant research from the fields of music education, adult learning, lifelong learning, gerontology, medicine, music therapy, and interdisciplinary studies. At the heart of the book is Evergreen Town, a retirement community in the southeastern U.S.A., that serves as the backdrop for three original research studies. The first of these is in two phases, a survey and a focus group interview, that examines the histories and rationales for the music participations and non-participations of community residents. The second and third case studies take an in-depth look at a church choir and a bluegrass group, two prominent musical groups in the community, and include the perspectives of the authors themselves as group members and participant-observers. Fung and Lehmborg conclude with a challenge for the profession of music education: to act on this research and on the current advances in the field, to enable all people to benefit from the richness of music as a substantial contributor to quality of life.
