Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

The year 1991 was a turning point in the history of the Indian economy. Liberalization saw a tremendous increase in competition from multinationals in almost all industrial sectors. This book examines how a few 'Good' Indian companies became 'Excellent' by withstanding the onslaught of competitive pressures and flourishing despite a fast-changing and unpredictable economic environment. The author uses a three-tier filtering process with increasingly strict criteria for narrowing down from the initial 144 companies to the 23 researched cases, and then to the final seven exceptional organizations. In the quest to find the answer to what made these companies perform exceptionally, the author proposes a business model based on strategy, execution excellence and leadership, which provides a compelling explanation for the superlative performance of these outstanding companies.
