Escal-Vigor (1899) is a novel by Georges Eekhoud. Recognized as a groundbreaking work of LGBTQ literature, Escal-Vigor was praised by some of Belgium's leading critics upon publication, but also led to a trial in which Eekhoud was accused of obscenity. Acquitted, he managed to retain his reputation as a leading writer in Belgium and continued publishing novels and stories, often on homosexuality, until his death in 1927. "Henry, whose nature was passionate and philosophy audacious, told himself, not without reason, that through his affinities, he would feel himself at home amid these beautifully barbarous surroundings, where natural instincts reigned." Having lived freely around Europe, Henry Kehlmark returns to his family's ancestral home, ready to settle down in the role of Dykgrave, or Count. Soon, however, his cosmopolitan ways draw the attention of the local villagers, who mistrust Henry and question his intentions. When the Count strikes up a romantic relationship with the burgomaster's son, an impressionable youth, he risks violent reprisal as a homosexual living in proximity to a traditional, insular people. For once in his life, however, Henry feels like he can be himself, living truthfully and without fear, able to separate himself from the pressures that dogged so many of his loved ones, now deceased. When word of their relationship gets out, however, Henry discovers the limits of provincial hospitality. With a beautifully designed cover and professionally typeset manuscript, this edition of Georges Eekhoud's Escal-Vigor is a classic work of Belgian literature reimagined for modern readers.

Who doesn't love a snow day? Gabi and her siblings Adam and Abigail decide to put on their snow gear and play outside in the snow. There is so much to do on a cold winter's day, from making snow angels to making footprints in the snow, but the siblings finally decide to build a snow-woman. Putting everything together isn't easy for three children, but when they all work together, their mom says that this snow-woman is the most beautiful one she's ever seen! Enjoy a snow day with Gabi, Adam, and Abigail as they build their snow-woman and see how they demonstrate importance of family, creativity, and teamwork, all while learning a new language!

Medical texts written in English during the late Middle Ages have in recent years attracted increasing attention among scholars. From approximately 1375 onwards, the use of English began to gain a firmer foothold in medical manuscripts, which in previous centuries had been written mainly in Latin or French. Scholars of Middle English, and editors of medical texts from late medieval England, are thus faced with a huge medical vocabulary which no single volume has yet attempted to define. This dictionary is therefore an essential reference tool. The material analysed in the Dictionary of Medical Vocabulary in English, 1375–1550 includes edited texts, manuscripts and early printed books, and represents three main types of medical writing: surgical manuals and tracts; academic treatises by university-trained physicians, and remedybooks. The dictionary covers four lexical fields: names of sicknesses, body parts, instruments, and medicinal preparations. Entries are structured as follows: (1) headword (2) scribal variants occurring in the texts (3) etymology (4) definition(s), each definition followed by relevant quotations (5) references to corresponding entries in the Dictionary of Old English, Middle English Dictionary, and The Oxford English Dictionary (6) references to academic books and articles containing information on the history and/or meaning of the term.
