It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

George S. Patton is one of the most controversial, celebrated, and popular military leaders in American history, and his accomplishments and victories have been greatly documented. Yet Patton spent years in the Army before garnering national attention and becoming a highly-regarded and respected military leader. This work explores Patton's beginnings as a driven and intrepid soldier and his battles leading up to the Great War -- military experiences which would be influential in his development as a commander. Drawing upon Patton's papers and archival documents in the National Archives, this is an early-career biography of the eminent military leader. It begins with his exploits as a relatively junior but ambitious Army officer who, due to his family's wealth and influence, was able to join General John J. Pershing's American Expeditionary Force (AEF). This assignment would ultimately change his life in two ways: it would make Pershing the mentor Patton would emulate for the rest of his life, and it would catapult his military career as the first tanker in the US Army. This study follows Patton's trajectory, from the creation of the Tank Corps and the Light Tank School, to Patton's eventual successes and injuries during the Battle of Saint Mihiel, the attack into Pannes, and the Meuse-Argonne Offensive. Revealed is that the experience Patton gained in World War I was seminal in his evolution as a leader and laid the groundwork for not only his own personal future triumphs but also for the success of the entire United States Army armored forces in World War II.

When World War I disrupted the supply of German chemicals to the United States, American entrepreneurs responded to the shortages and high prices by trying to manufacture chemicals domestically. Learning the complex science and industry, however, posed a serious challenge. This book explains how the United States built a synthetic organic chemicals industry in World War I and the 1920s. Kathryn Steen argues that Americans' intense anti-German sentiment in World War I helped to forge a concentrated effort among firms, the federal government, and universities to make the United States independent of "foreign chemicals." Besides mobilization efforts to make high explosives and war gases, federal policies included protective tariffs, gathering and publishing market information, and, most dramatically, confiscation of German-owned chemical subsidiaries and patents. Meanwhile, firms and universities worked hard to develop scientific and manufacturing expertise. Against a backdrop of hostilities and intrigue, Steen shows how chemicals were deeply entwined with national and international politics and policy during the war and subsequent isolationism of the turbulent early twentieth century.

This book explores how history teaching can support conflict reduction in deeply divided societies. Using Northern Ireland as its case study, the work contributes to how people think about the identity-based conflict that surrounds them and involves them. It also acts as a manual for those who wish to undertake projects to change attitudes about history in post-conflict societies.
