Among the topics covered in *Codebuster's CPT-4 Outpatient Coding Reference and Study Guide* are outpatient guidelines, CPT format and conventions, plus terminology. New for 2012 are a new section on Skin Replacement Surgery found in the chapter on the Integumentary System, and significant updates to chapters on the Musculoskeletal, Respiratory, Digestive, and Nervous Systems. This study guide assists HIM professionals prepare for professional coding exams such as the CCS, CCS-P, and CPC exams. The text serves as an excellent resource for coders who need to refresh or expand their CPT-4 coding skills. Coders can look up various diagnoses and procedures for the applicable coding guideline, while having access realistic coding scenarios that are likely to be similar to the coding problems experienced on the job. The book covers the surgery section of CPT-4 and Anesthesiology. Each chapter stands on its own; thus, the reader can go through the chapters in any order. There is a chapter-by-chapter analysis of the various body systems based on the surgery section of the CPT coding book. All chapters contain, in addition to the basic coding guidelines, critical coding questions, coding tips, coding examples, as well as a quiz at the end of each chapter. There is also a section on coding from operative reports. The operative reports are categorized by body system. The book is written in a step-by-step format and is very easy to follow. The content has been chosen to for two purposes: 1. Target the most frequently encountered coding situations in the outpatient setting. 2. Provide the knowledge base to master the outpatient coding concepts tested on the CCS Exam. The text has 236 case scenario short answer questions (CPT codes), 38 operative reports (ICD-9 and CPT codes), and 23 full medical record case studies (ICD-9 and CPT codes). Each question is highly relevant and reflects a coding situation most hospital-based outpatient coders will face. The text strives to ensure the reader understands every diagnosis and procedure discussed: thorough discussion of symptoms, standard treatment protocols, and medications. Coding examples and quizzes help clarify the information presented. 23 Case Studies have been constructed to mimic real-life outpatient medical records. Apply your knowledge from Chapters 1-15

and the Operative Reports to master coding from medical records. Each Case Study presents a complete medical record with associated ancillary documents. The records will test your ability to code in a live setting. Coders can assess their coding efficiency based on their accuracy and speed, critical for on the job practice and exam preparation. The Answer Key contains the rationale for how all codes were determined for the Case Studies. The text is updated every year to reflect the annual CPT coding changes. Linda Kobayashi, BA, RHIT, CCS, has been a coder and coding manager for almost 20 years. Since 1998, Ms. Kobayashi has owned and operated Codebusters, Inc., a nationwide coding consulting company. Widely regarded as a medical coding and auditing expert, she has conducted workshops on a variety of coding topics, including CCS Exam preparation workshops. Throughout her career the author has remained professionally active, as an AHIMA member as well as a member of her state association, CHIA (California Health Information Association). Her formal training includes a teaching credential from California State University Los Angeles, a B.A. degree in English Literature from University of California Los Angeles, an RHIT from AHIMA after completing the RHIT program at East Los Angeles College, and a CCS certificate from AHIMA. Extensive experience as a hands-on coder, auditor and educator, and has given the author the expertise to help coders prepare for the professional coding environment.

Personalized health care to manage diseases and optimized treatment is crucial for everyone to maintain health quality. Significant efforts have been made to design and develop novel nano-enabling therapeutic strategies to cure and monitor diseases for personalized health care. As state-of-the-art, various strategies have been reported to develop personalized nanomedicine to combat against target diseases with no side effects. In this book proposal, we are trying to describe fundamentals of personalized nanomedicine, novel nanomaterials for drug delivery, role of nanotechnology for efficient therapeutics approach, nano-pharmacology, targeted CNS drug delivery, stimuli responsive drug release and nanotechnology for diseases management. This book would serve as a platform for new scholars to understand state-of-the-art of nanotechnology for therapeutics and designing their future research to develop effective personalized nanomedicine against targeted diseases. As of now, various studies have been reported to design and develop nanomedicines of higher efficacy but unfortunately, such products are up to laboratory research only and need to be well-tested using pre-clinical or human models. Our book would be a call for experts to explore multidisciplinary research for developing novel and efficient approaches to explore smart efficient nanocarriers for site-specific on-demand controlled drug delivery to combat against targeted diseases to personalized health care.

Nutrition, defined by Merriam-Webster, is the process of eating the right kind of food so you can grow properly and be healthy. However, making the right food and nutrition choices and finding the best and most accurate nutrition information can be a challenge, especially when a disease or injury is present. There are a wide range of ways that nutrition can be healing, from a simple broth that provides fluids and electrolytes to therapeutic nutrition for diabetes, irritable bowel syndrome, or osteoporosis. Registered Dietitian Nutritionists (RDN) have expertise in disease management and translation of nutrition requirements to foods to consume. However, nutrition care often does not receive the attention in the out-patient setting that is needed to achieve nutrition goals. The purpose of this book is to provide pertinent and concise nutrition care information for Registered Dietitian Nutritionists and other professionals working with individuals outside of the hospital including nurses, pharmacists, and physicians. This book covers screening, assessing, and treating malnutrition; out-patient nutrition care in diabetes, cardiovascular disease, gastrointestinal disease, osteoporosis; and home enteral and parenteral nutrition. In each chapter the reader will learn more about the disease process as well as the management of the disease or therapy. As the number of patients receiving home care nutrition support increases, proper assessment and management of this therapy is crucial, and clinicians need to practice at an advanced level. This book presents advanced and readily applicable information on proper nutrition care of individuals in the outpatient setting and those receiving home nutrition support.

Practical and easy to understand, UNDERSTANDING MEDICAL CODING: A COMPREHENSIVE GUIDE, THIRD EDITION teaches readers everything they need to know about medical coding. Role Development for the Nurse Practitioner, Second Edition is an integral text that guides students in their transition from the role of registered nurse to nurse practitioner.

This is not a book about where to get free or cheap medical care. Another book in this series covers that. This is about different options to buy health insurance, the different types of health insurance and options for hard-to-insure people. There are several issues involved with serious illness and money. Many insurance companies have caps after which you have to pay for your own treatment. Beyond that, employers tend to get rid of employees with serious illnesses. It's like a double whammy. You get sick then you get fired. It's so serious that there are activists and politicians fighting for safety nets for people who get a serious illness. This is why I preach about saving your money and not spending it on frivolous things. Who is gonna care about all that money you spent on hair color and frivolous clothes when you're sick and depleting your life's savings?
