The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new, and updated collection of the most critical and cutting-edge ideas in educational change. Written by the most influential thinkers in the field, these volumes cover educational change at both the theoretical and practical levels. The updated handbook remains connected to the classical concerns of the field, such as educational innovation, reform, and change management, and also offers new insights into educational change that have been brought about by social change and shifting contexts of educational reform. Like the first best selling Handbook, this one will also undoubtedly become an essential resource for people involved in all spheres of education, from classroom teachers, teacher leaders and administrators to educational researchers, curriculum developers, and university professors. No other work provides such a wide-ranging and comprehensive examination of the field of educational change.

How much did the theological arguments of the church affect the copying of the New Testament text? Focusing on issues of textual criticism, this inaugural volume of the Text and Canon of the New Testament series offers some answers to that question and responds to some of Bart Ehrman's views about the transmission of the New Testament text. Revisiting the Corruption of the New Testament will be a valuable resource for those working in textual criticism, patristics, and New Testament apocryphal literature.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Going beyond the dominant orthodox narrative to incorporate insight from revisionist scholarship on the Vietnam War, Michael G. Kort presents the case that the United States should have been able to win the war, and at a much lower cost than it suffered in defeat. Presenting a study that is both historiographic and a narrative history, Kort analyzes important factors such as the strong nationalist credentials and leadership qualities of South Vietnam's Ngo Dinh Diem; the flawed military strategy of 'graduated response' developed by Robert McNamara; and the real reasons South Vietnam collapsed in the face of a massive North Vietnamese invasion in 1975. Kort shows how the US commitment to defend South Vietnam was not a strategic error but a policy consistent with US security interests during the Cold War, and that there were potentially viable strategic approaches to the war that might have saved South Vietnam.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

"Illuminate[s] the lives behind the current debates about Latino immigration." —The New York Times Book Review When fifteen-year-old Maribel Rivera sustains a terrible injury, the Riveras leave behind a comfortable life in Mexico and risk everything to come to the United States so that Maribel can have the care she needs. Their love story sets in motion events that will have profound repercussions for everyone involved. Paul Fisher sees the world from behind glasses so thick he looks like a bug-eyed alien. But he's not so blind that he can't see there are some very unusual things about his family's new home in Tangerine County, Florida. Where else does a sinkhole swallow the local school, fire burn underground for years, and lightning strike at the same time every day? The chaos is compounded by constant harassment from his football-star brother, and adjusting to life in Tangerine isn't easy for Paul—until he joins the soccer team at his middle school. With the help of his new teammates, Paul begins to discover what lies beneath the surface of his strange new hometown. And he also gains the courage to face up to some secrets his family has been keeping from him for far too long. In Tangerine, it seems, anything is possible.

The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of

international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? *International Conflict Resolution After the Cold War* critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

"Masterful. . . . Logevall presents a vivid and tragic portrait of the elements of U.S. decision-making on Vietnam from the beginning of the Kennedy administration through the announcement of the American ground war in July 1965. In the process he reveals a troubling picture of top officials in both the Kennedy and Johnson administrations persisting in efforts to boost the fortunes of successive governments of South Vietnam, even while they acknowledged that their chances for success were remote. In addition, he places the decision-making squarely in the international context."—Robert D. Schulzinger, author of *A Time for War: The United States and Vietnam, 1941-1975* "Stunning in its research and highly sophisticated in its analysis, *Choosing War* is far and away the best study we have of Lyndon Johnson's escalation of the conflict in Vietnam."—George C. Herring "In this fine book, Fredrick Logevall offers the first detailed examination of why diplomacy failed to head off the Vietnam War. Grounding himself in documentary research and other sources from several countries, Logevall comes closer than anyone ever has to explaining what happened. His clear writing and deep analysis may well change our understanding of Vietnam as a quagmire."—John Prados, author of *The Hidden History of the Vietnam War* "A rising star among a new generation of historians, Fredrik Logevall has written the most important Vietnam book in years. By explaining the international context of that tragic conflict, *Choosing War* provides startling answers to the question, Why did the war happen? Controversial yet fair, this account challenges the reader to think through John F. Kennedy's and Lydon B. Johnson's individual responsibility for Vietnam. The effect is compelling, unforgettable history."—Timothy Naftali, co-author of *"One Hell of a Gamble:" Khrushchev, Castro, and Kennedy, 1958-1964*

This Toolkit provides non-technical, practical help to enable officials to recognise conflict of interest situations and help them to ensure that integrity and reputation are not compromised.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

*Reflexive Narrative: Self-Inquiry Toward Self-Realization and Its Performance* is latest addition to the *Qualitative Research Methods* series. Author Christopher Johns describes this unique method and its developmental approach to research to enable researchers' self-realization however that might be expressed. This method focuses on systematizing the reflective process and providing structure while still remaining flexible to the needs of individual researchers and projects. Researchers collect data through reflections on everyday experiences and then selectively use the evidence of researcher's insights. The text starts out with a brief introduction to narrative research and reflexivity, situating the method within the larger context of organizational practices. The next chapters introduce the steps for reflexive narrative research and walk readers through the movements of the reflexive narrative process, writing, reflection, dialogue, guidance, weaving, and audiencing. Additional coverage of ethics and research examples provide a foundation for application of the method to individual research. A chapter on structuring the method for a doctoral thesis furthers the applied nature of this method. Three extracts from studies provide research examples across several social science disciplines, including nursing and education. For students and researchers alike looking for new approaches to reflexive methods and looking to expand their ideas about self-research in a qualitative context, *Reflexive Narrative* provides a starting place for their own examination of self in the context of research.

This paper is one of a series being prepared for the National Research Council's Committee on International Conflict Resolution. The committee was organized in late 1995 to respond to a growing need for prevention, management, and resolution of violent conflict in the international arena, a concern about the changing nature and context of such

conflict in the post-Cold War era, and a recent expansion of knowledge in the field. The committee's main goal is to advance the practice of conflict resolution by using the methods and critical attitude of science to examine the effectiveness of various techniques and concepts that have been advanced for preventing, managing, and resolving international conflicts. The committee's research agenda has been designed to supplement the work of other groups, particularly the Carnegie Corporation of New York's Commission on Preventing Deadly Conflict, which issued its final report in December 1997. The committee has identified a number of specific techniques and concepts of current interest to policy practitioners and has asked leading specialists on each one to carefully review and analyze available knowledge and to summarize what is known about the conditions under which each is or is not effective. These papers present the results of their work.

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Times, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother’s unconventional, unconditional love.

How does a newly democratized nation constructively address the past to move from a divided history to a shared future? How do people rebuild coexistence after violence? The International IDEA Handbook on Reconciliation after Violent Conflict presents a range of tools that can be, and have been, employed in the design and implementation of reconciliation processes. Most of them draw on the experience of people grappling with the problems of past violence and injustice. There is no “right answer” to the challenge of reconciliation, and so the Handbook prescribes no single approach. Instead, it presents the options and methods, with their strengths and weaknesses evaluated, so that practitioners and policy-makers can adopt or adapt them, as best suits each specific context. Also available in a French language version.

Through a series of poems, a young girl chronicles the life-changing year of 1975, when she, her mother, and her brothers leave Vietnam and resettle in Alabama.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Written by a distinguished scholar, this book explores themes of culture, identity, and power as they relate to conceptions of practice in conflict resolution and peacebuilding. Among the topics covered are ethnic and identity conflicts; culture, relativism and human rights; post-conflict trauma and reconciliation; and modeling varieties of conflict resolution practice. Context and Pretext in Conflict Resolution is the winner of the 2014 Conflict Research Society Book of the Year Prize.
