The Belief Formula: The Secret to Unlocking the Power of Prayer is an amazing look at the role of the human mind, thought patterns, and the very real power of belief, in the creation process - a continuous process which produces every single moment of your life "according to your thoughts." Most of us grew up being told what to think, believe, and do, but not how to think and believe. The Belief Formula will teach you how you can live the life of your dreams, and how to find what you seek in life. The Belief Formula makes practical sense out of ancient principles, and demonstrates how the latest medical and scientific research offers clinical evidence that our thoughts create our physiology, and every part of our existence. Most people are not aware that there is more than one way to think, and that they unconsciously spend most of the day operating in the least effective part of their brain.

This handbook offers information and tips for librarians on conducting the reference interview. It features models of communication such as sense-making and microtraining, exercises for avoiding common pitfalls, and examples of both successful and problematic interviews.

Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

Rabbits make up a considerable proportion of the caseload in small animal practice, and knowledge of rabbit medicine and surgery has grown rapidly in the past decade such that one BSAVA Manual is no longer enough to do justice to this important pet. The all-new BSAVA Manual of Rabbit Surgery, Dentistry and Imaging concentrates on the major surgical and dental conditions that are so common in rabbits, while its sister volume (BSAVA Manual of Rabbit Medicine) concentrates on common medical conditions. To maximize surgical success, anaesthesia and analgesia are first discussed, including practical advice on different regimes for different situations/risk levels, chemical pain relief and also hospitalization and postoperative care. A section on imaging follows, covering not only radiographic techniques and their interpretation, but also ultrasonography, endoscopy, CT and MRI. The third part of the Manual is devoted to surgical techniques. General principles of rabbit surgery are discussed, as well as specific surgical techniques and procedures, from basic techniques such as neutering to more specialized techniques used in each organ system. The final section is devoted to dental disease and abscessation, including the techniques required for a full dental examination and evaluation. The range of treatment techniques available for cheek tooth overgrowth and dental abscesses is highlighted, and the reader is encouraged to draw their own conclusions as to the correct method to use in each case. Illustrated step-by-step Operative Techniques are provided for surgical and dental procedures, to enable the reader to benefit from the expertise of the international authors.

Early in his relationship with his beloved Border Collie, Jeff Maziarek had a sense that "beneath the fur" there was a sentient being with far deeper insights into life than commonly thought. And, in their last year together some mystical events completely confirmed the accuracy of that feeling. In Codi's Journey, Jeff describes these events within the context of an inspiring and heartfelt narrative illustrating the very challenging circumstances Codi faced during her final 12 months. Any dog owner who has ever shared stories about the "humanness" of their pet, as well as any adult who has ever loved & lost a beloved animal companion, will surely find this work captivating. To provide even greater depth into Codi's story, Jeff details how this feisty canine became a part of his family. He likewise shares many engaging anecdotes about her personality and several of her more memorable adventures over the years. A charming photo gallery with 42 captioned images further brings Codi to life, featuring snapshots from the night she arrived as a 10-week-old puppy to the final week of her life. "Codi's story is one told with great heart; you will care about this dog as you think about your own dogs. Anyone who has ever loved and lost canine companions will definitely identify with this work." - Steve Dale, syndicated radio host: WGN Radio; "Pet World;" syndicated columnist, USA Weekend Contributing Editor "This book captures the dynamics of being a pet owner and the guilt, grief, and commitment that many pet owners go through in loving and losing a pet. As someone who has "been there," it was reassuring that I am not the only one to feel those things, to do whatever it took to save them and, when the time came, to let them go. Any book that can stir laughter as well as tears is a wonderful story. Codi's Journey is awesome." - Terri Wernert, Great Lakes Border Collie Rescue "I've experienced the extraordinary love and grievous loss that comes when we're lucky enough to share our lives with amazing creatures. Codi's Journey tells that story with candor, joy & tears. Since they cannot stay long, our four-legged kids teach so much about the importance of honoring each and every moment we're given with them, a lesson we might do well to apply elsewhere. A friend once told me that dogs are angels sent down to look after us. Codi's Journey affirms that belief " - Catherine Crier, Author, Former Judge, Award-Winning Journalist, and TV Broadcaster "For anyone who has experienced a spiritual canine connection, Codi's Journey is a must read. It's a touching tribute to a man's search for a very special pup and the heart-warming life journey they shared." - Eugenia Last, Internationally Syndicated Astrologist and Author "This is a remarkable story of a man's best friend and the powerful bond between dog and owner that will make you laugh, as you read about Codi's playful way of teaching wisdom, and cry as man & friend prepare for the next steps in life's great journey. It is a definite "must-read" for dog lovers who have lost a dear canine friend." - Pete Koerner, author of "The Belief Formula" Author's Personal Note: My foremost intention with this work is to share an authentic story with two key messages. First, that our pets actually are "sages with fur" with a far greater understanding of life (and us) than commonly thought. Second, that it's perfectly normal to feel intense & long-lasting grief at the loss of a pet. This is particularly so when that animal served as an adult's primary companion for years. In this regard, I sincerely want any reader who also has experienced such a loss to know that someone truly does understand the sadness and emptiness they felt when their beloved pet passed on. Finally, it's my hope that such readers come to understand how important it is to fully process their feelings of grief by really feeling them rather than keepin

Every six months, 450 fifteen-year-olds are kidnapped from their homes across the world. These kidnappings happen in the span of a week, as reliable as clockwork. The victims don't know each other, or their kidnappers. The fifteen-year-olds either end up with a 'missing persons' file gathering dust in a filing cabinet, or they are assumed dead. No one ever discovers what happens to them. The families move

on, forever missing their lost loved one. Unknown to them, their child, grandchild, or sibling, has been taken to the Academy. The Academy, as its members will boast, is the most secretive, powerful organization in the world. The workings of the organization are revealed on a need-to-know basis, and the organization has decided that no one, other than its most trusted members, need to know its true business. Outsiders don't even know it exists. Occasionally, a hunter or hiker will stumble upon the Academy's remote location. They are quickly taken care of. When Asa Palmer, age fifteen, is out running in the woods behind his house, he is taken. Twelve hours later, after being tied and bound, and transported through an underground train station, he finds himself amidst a series of beautifully crafted structures that rest in between a circle of five secluded mountains. He has been chosen as a candidate for the Academy. Each six months, the Academy kidnaps more recruits than they can actually use. For Asa Palmer to live he must undergo body-altering mutations and compete with his cohorts in a series of dangerous and strategy ridden tasks to prove that he is worthy of the Academy's time. This book follows Asa Palmer through his second semester in the Academy. The work is 197,000 words long.
