In the desire and quest to make sense of the world and our existence, three great sirens have lured men and women into a lull with the empty promise to make their lives meaningful. The great king of Israel, Solomon, though the wisest man, was not immune to their song. But at the end of his life, Solomon, in all of his God-given wisdom, stopped to contemplate on all that competed for his attention. He wrote his conclusions in the Book of Ecclesiastes. Tommy Nelson continues his study of Solomon's writings by taking an in-depth look at Ecclesiastes. In a world such as ours, where the search for meaning and purpose propels mankind to try everything under the sun, Solomon's conclusions ring louder than ever for a people who need answers more than ever.

While white racism has global dimensions, it has an unshakeable lease on life in South African political organizations and its educational system. Donnarae MacCann and Yulisa Maddy here provide a thorough and provocative analysis of South African children's literature during the key decade around Nelson Mandela's release from prison. Their research demonstrates that the literature of this period was derived from the same milieu -- intellectual, educational, religious, political, and economic -- that brought white supremacy to South Africa during colonial times.

This volume is a signal contribution to the study of children's literature and its relation to racism and social conditions.

Alice in Wonderland (also known as Alice's Adventures in Wonderland), from 1865, is the peculiar and imaginative tale of a girl who falls down a rabbit-hole into a bizarre world of eccentric and unusual creatures. Lewis Carroll's prominent example of the genre of "literary nonsense" has endured in popularity with its clever way of playing with logic and a narrative structure that has influenced generations of fiction writing.

The qualifications are based on one syllabus and guarantee that individuals who have gained either the ECDL or the ICDL have reached a certain level of competence. They therefore assure employers that both their staff and potential employees have the necessary computer skills for the job, and can in turn speed up employment procedures. To gain the ECDL/ICDL qualification the applicant must pass one theoretical and six practical tests which are administered throughout the world by accredited Test Centres. The tests cover the seven ECDL/ICDL modules, all of which are covered in the book: 1. Basic concepts of Information Technology 2. Using the computer and managing files 3. Word Processing 4. This book brings together the work of scholars from around the world – UK, Pakistan, US, South Africa, Hungary, Korea, Mexico – to illustrate and celebrate the many ways in which Roz Ivani? has advanced the academic study of writing. Focusing on writing in different formal contexts of education, from primary through to further and higher education in a range of national contexts, the twenty one original contributions in the book critically engage with theoretical and empirical issues raised in Ivani?'s influential body of work. In their exploration of writers' struggles with the demands of dominant literacy the authors significantly extend understandings of writing practices in formal institutions. Organized around three themes central to Ivani?'s work – creativity and identity; pedagogy; and research methodologies – the twelve chapters and nine personal and scholarly reflections reveal the powerful ways in which Ivani?'s work has influenced thinking in the field of writing and continues to open up avenues for future questioning and research.

The IFIP World Computer Congress (WCC) is one of the most important conferences in the area of computer science and a number of related Human and Social Science disciplines at the worldwide level and it has a federated structure, which takes into account the rapidly growing and expanding interests in this area. Human-Computer Interaction is now a mature and still dynamically evolving part of this area, which is represented in IFIP by the Technical Committee 13 on HCI. We are convinced that in this edition of WCC, which takes place for the first time in Italy, it will be interesting and useful to have a Symposium on Human- Computer Interaction in order to present and discuss a number of contributions in this field. There has been increasing awareness among designers of interactive systems of the importance of designing for usability, but we are still far from having products that are really usable, and usability can mean different things depending on the application domain. We are all aware that too many users of current technology feel often frustrated because computer systems are not compatible with their abilities and needs with existing work practices. As designers of tomorrow technology, we have the responsibility of creating computer artefacts that would permit better user experience with the various computing devices, so that users may enjoy more satisfying experiences with information and communications technologies.

This supplement to standard children's literature textbooks will be a help to instructors as they engage their students in discussions about selection of materials, censorship, dealing with curricular issues, the need to understand administrative policies, community beliefs, and their responses to these issues. It is designed to help instructors discuss books in ways that inspire collegiality, collaboration, and scholarship in book evaluation and selection. Using actual case studies, resource reviews and/or scenarios of censorship, religion, violence, ethnicity and other issues, the instructor will be able to encourage discussion and reflective thought about real issues faced by teachers and librarians as they select materials for classroom or school library use. This supplement to standard children's literature textbooks will be a help to instructors as they engage their students in discussions about selection of materials, censorship, dealing with curricular issues, the need to understand administrative policies, community beliefs, and their responses to these issues. It is designed to help them discuss books in ways that inspire collegiality, collaboration, and scholarship in book evaluation and selection. Using actual case studies, resource reviews and/or scenarios of censorship, religion, violence, ethnicity and other issues, the instructor will be able to encourage discussion and reflective thought about real issues faced by teachers and librarians as they select materials for classroom or school library use. Guides for possible resources for help in researching situations will be included. This will prove a very valuable resource in teaching children's literature courses in schools of education and library schools, and useful to practicing teachers and librarians as well. Though the book is slanted toward the use of books as classroom materials, it will be a valuable asset to a school library's professional collection and certainly valuable to the training of pre-service teachers and school librarians. Each chapter begins with a bibliographic essay that introduces the topic to the reader. The essay is designed as a starting point for further discussion and research. A list of references for each chapter is provided at the end of the chapter. These references represent sources teachers can use to conduct further research to find multiple perspectives about books.

A systematic, in-depth approach to assessing emotional functioning during infancy and early childhood. It enables clinicians, educators, and caregivers to assess the child's functional, emotional, developmental level and create a treatment plan based on the child's individual profile and measure his or her progress. The FEAS not only delineates the emotional functioning of the infant and child, but also captures the richness of the interactions between the child and his or her caregivers.
