In winter 2014, a Tibetan monk lectured the world leaders gathered at Davos on the importance of Happiness. The recent DSM-5, the manual of all diagnosable mental illnesses, for the first time included shyness and grief as treatable diseases. Happiness has become the biggest idea of our age, a new religion dedicated to well-being. In this brilliant dissection of our times, political economist William Davies shows how this philosophy, first pronounced by Jeremy Bentham in the 1780s, has dominated the political debates that have delivered neoliberalism. From a history of business strategies of how to get the best out of employees, to the increased level of surveillance measuring every aspect of our lives; from why experts prefer to measure the chemical in the brain than ask you how you are feeling, to why Freakonomics tells us less about the way people behave than expected, The Happiness Industry is an essential guide to the marketization of modern life. Davies shows that the science of happiness is less a science than an extension of hyper-capitalism.

The #1 New York Times–bestselling author of *A Discovery of Witchese* examines the real-life history of the scientific community of Elizabethan London. Travel to the streets, shops, back alleys, and gardens of Elizabethan London, where a boisterous and diverse group of men and women shared a keen interest in the study of nature. These assorted merchants, gardeners, barber-surgeons, midwives, instrument makers, mathematics teachers, engineers, alchemists, and other experimenters formed a patchwork scientific community whose practices set the stage for the Scientific Revolution. While Francis Bacon has been widely regarded as the father of modern science, scores of his London contemporaries also deserve a share in this distinction. It was their collaborative, yet often contentious, ethos that helped to develop the ideals of modern scientific research. The book examines six particularly fascinating episodes of scientific inquiry and dispute in sixteenth-

century London, bringing to life the individuals involved and the challenges they faced. These men and women experimented and invented, argued and competed, waged wars in the press, and struggled to understand the complexities of the natural world. Together their stories illuminate the blind alleys and surprising twists and turns taken as medieval philosophy gave way to the empirical, experimental culture that became a hallmark of the Scientific Revolution. "Elegant and erudite." —Anthony Grafton, *American Scientist* "A truly wonderful book, deeply researched, full of original material, and exhilarating to read." —John Carey, *Sunday Times* "Widely accessible." —Ian Archer, *Oxford University* "Vivid, compelling, and panoramic, this revelatory work will force us to revise everything we thought we knew about Renaissance science." —Adrian Johns, author of *The Nature Book*

What goes on in human beings when they make or listen to music? What is it about music, what gives it such peculiar power over us, power delectable and beneficent for the most part, but also capable of uncontrollable and sometimes destructive force? Music has no concepts, it lacks images; it has no power of representation, it has no relation to the world. And yet it is evident in all of us—we tap our feet, we keep time, hum, sing, conduct music, mirror the melodic contours and feelings of what we hear in our movements and expressions. In this book, Oliver Sacks explores the power music wields over us—a power that sometimes we control and at other times don't. He explores, in his inimitable fashion, how it can provide access to otherwise unreachable emotional states, how it can revivify neurological avenues that have been frozen, evoke memories of earlier, lost events or states or bring those with neurological disorders back to a time when the world was much richer. This is a book that explores, like no other, the myriad dimensions of our experience of and with music.
