With stagnated demand in many home economies, the need to internationalize and exploit foreign market opportunities has never been more paramount for businesses to succeed at a global level. However, this process raises a number of

questions, such as: can firms use their knowledge of one market in the next? Can firms pursue internationalization on several fronts at the same time? How should firms handle cultural and institutional differences between markets? This textbook provides students with the core research in international business and strategy, including organization, efficiency, external relationships and the challenges found in an increasingly multicultural world. Each part begins with a presentation of the issues and controversies faced in that particular area, followed by a synthesis of the research which provides avenues for future research. To facilitate and encourage further debate and learning, each part also includes at least one original case study. Compiled by two of the World's leading scholars of international business, and supplemented with critical commentaries and a range of integrative case studies, this comprehensive textbook provides advanced students of international business and strategy with a resource that will be invaluable in their studies and beyond.

In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun,

an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book provides students with the essential information they need to assess business practices through an international lens.

Rethinking Education in Light of Global Challenges discusses challenges to education in Scandinavian welfare states due to global trends like migration, neoliberal strategies and the exploitation of nature. This anthology comprises case studies, theoretical articles and reflective studies, grouped under the headings of Culture, Society and the Anthropocene. This book directly addresses three interrelated global events and their implications for education as seen from Scandinavian perspectives: migration flows, increased cultural diversity and (post)nationalism; the erosion of the welfare state and the global rise of neoliberalism; and the Anthropocene and environmental challenges arising in the wake of the global exploitation of natural ecosystems. In case studies, theoretical articles and reflective studies, researchers from Nordic countries explore how education, education policy and educational thinking in these countries are affected by these global trends, bringing to the fore the different roles education can play in addressing the various issues and different ways of reimagining education. This authoritative volume will be of great interest to researchers, academics and students in the fields of sociology of education, migration and education, environmental education and educational politics.

We live in a globally interconnected but economically divided world where internationally linked businesses can play a significant role in helping and/or obstructing the development of impoverished countries. Through a series of case studies, this volume examines what can be learned, both positively and critically, from the experiences of selected internationally connected firms in Nigeria, Uganda, Ghana, Vietnam, Guyana, and the Nunavik region of northern Canada. This book begins with a set of reflections on the strategies firms might adopt so that they develop both their own assets as well as those of the areas in which they operate. A team of more than two dozen researchers from the developed and developing countries conducted the research on which the essays on this and subsequent volumes are based. Dr Frederick Bird from Concordia University in Montreal directed the overall research project.

"MBS is the untold story of how a mysterious young prince emerged from Saudi Arabia's sprawling royal family to overhaul the economy and society of the richest country in the Middle East--and gather as much power as possible into his own hands. Since his father, King Salman, ascended to the throne in 2015, Mohammed bin Salman has leveraged his influence to restructure the kingdom's economy, loosen its strict Islamic social codes, and confront its enemies around the region, especially Iran. That vision won him fans at home and on Wall Street, in Silicon Valley, in Hollywood, and at the White House, where President Trump embraced the prince as a key player in his own vision for the Middle East. But over time, the sheen of the visionary young reformer has become tarnished, leaving many struggling to determine whether MBS is in fact a rising dictator whose inexperience and rash decisions are destabilizing the world's most volatile region. Based on years of reporting and hundreds of interviews, MBS reveals the machinations behind the kingdom's catastrophic military intervention in Yemen, the bizarre detention of princes and businessmen in the Riyadh Ritz-Carlton, and the shifting Saudi relationships with Israel and the United States. And finally, it sheds new light on the greatest scandal of the young autocrat's rise: the brutal killing of journalist Jamal Khashoggi by Saudi agents in Istanbul, a crime that shook Saudi Arabia's relationship with Washington and left the world wondering whether MBS could get away with murder. MBS is a riveting, eye-opening account of how the young prince has wielded vast powers to reshape his kingdom and the world around him"--

It examines what types of resources are mobilized to overcome such difficulties. The cultural and societal challenges of international management must be considered at different levels, the one of strategy, which the first part of the book is devoted to, but also that of management and business practices, addressed in the third part of the book. Both strategic decisions and daily business practices, however, in the particularly fluctuating and incompletely defined international context, gain from being framed by ethical and corporate social responsibility, which the second part of this book is devoted to. *Cross-cultural Challenges in International Management* provides an analysis of specific situations revealing such cultural or societal challenges. Thus, the reader will benefit not only from advanced theoretical knowledge in the field, but also from practical applications in various professional context and various countries.
