

J 6020 S Just Mfg

Beginning in 1956 each vol. includes as a regular number the Blue book of southern progress and the Southern industrial directory, formerly issued separately.

In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

* Financial Times and McKinsey Business Book of the Year * Winner of the J. Anthony Lukas Book Prize? * 800-CEO-READ Business Book of the Year * A New York Times Notable Book * A Washington Post Notable Book * An NPR Best Book of 2017 * A Wall Street Journal Best Book of 2017 * An Economist Best Book of 2017 * A Business Insider Best Book of 2017 * "A gripping story of psychological defeat and resilience" (Bob Woodward, The Washington Post)—an intimate account of the fallout from the closing of a General Motors assembly plant in Janesville, Wisconsin, and a larger story of the hollowing of the American middle class. This is the story of what happens to an industrial town in the American heartland when its main factory shuts down—but it's not the familiar tale. Most observers record the immediate shock of vanished jobs, but few stay around long enough to notice what happens next when a community with a can-do spirit tries to pick itself up. Pulitzer Prize-winning reporter Amy Goldstein spent years immersed in Janesville, Wisconsin, where the nation's oldest operating General Motors assembly plant shut down in the midst of the Great Recession. Now, with intelligence, sympathy, and insight into what connects and divides people in an era of economic upheaval, Goldstein shows the consequences of one of America's biggest political issues. Her reporting takes the reader deep into the lives of autoworkers, educators, bankers, politicians, and job re-trainers to show why it's so hard in the twenty-first century to recreate a healthy, prosperous working class. "Moving and magnificently well-researched...Janesville joins a growing family of books about the evisceration of the working class in the United States. What sets it apart is the sophistication of its storytelling and analysis" (Jennifer Senior, The New York Times). "Anyone tempted to generalize about the American working class ought to meet the people in Janesville. The reporting behind this book is extraordinary and the story—a stark, heartbreaking reminder that political ideologies have real consequences—is told with rare sympathy and insight" (Tracy Kidder, Pulitzer Prize-winning author of The Soul of a New Machine).

This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the "creative economy", a valuable development opportunity that Latin America, the Caribbean and the world at large cannot afford to miss. The creative economy, which we call the "Orange Economy" in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand and explain what the Orange Economy is and why it is so important. You will also acquire the analytical tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

RNA Silencing: Methods and Protocols facilitates the translation of gene silencing concepts into practical applications, and includes a broad and useful set of RNA silencing protocols. Sections cover the biochemical aspects of silencing machinery, methods for RNA silencing in nonmammalian organisms, design, preparation, and use of RNAs to silence gene expression, several methods for the in vivo delivery of siRNAs and silencing vectors, and methods for the study and use of microRNAs.

Based on the popular Developing Leadership Talent program offered by the acclaimed Center for Creative Leadership, this important resource offers a nuts-and-bolts framework for putting in place a leadership development system that will attract and retain the best and brightest talent. Step by step, the authors explain how alignment with strategic goals and organizational purpose and effective developmental experiences are the backbone of a successful leadership program. An authoritative and useful book, Developing Leadership Talent is an essential tool for any leadership program.

In this book readers will find technological discussions on the existing and emerging technologies across the different stages of the big data value chain. They will learn about legal aspects of big data, the social impact, and about education needs and requirements. And they will discover the business perspective and how big data technology can be exploited to deliver value within different sectors of the economy. The book is structured in four parts: Part I "The Big Data Opportunity" explores the value potential of big data with a particular focus on the European context. It also describes the legal, business and social dimensions that need to be addressed, and briefly introduces the European Commission's BIG project. Part II "The Big Data Value Chain" details the complete big data lifecycle from a technical point of view, ranging from data acquisition, analysis, curation and storage, to data usage and exploitation. Next, Part III "Usage and Exploitation of Big Data" illustrates the value creation possibilities of big data applications in various sectors, including industry, healthcare, finance, energy, media and public services. Finally, Part IV "A Roadmap for Big Data Research" identifies and prioritizes the cross-sectorial requirements for big data research, and outlines the most urgent and challenging technological, economic, political and societal issues for big data in Europe. This compendium summarizes more than two years of work performed by a leading group of major European research centers and industries in the context of the BIG project. It brings together research findings, forecasts and estimates related to this challenging technological context that is becoming the major axis of the new digitally transformed business environment.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

In his trademark straight-talking style, legendary auto executive Lee Iacocca speaks his mind on the most pressing issues facing America today: the shortage of responsible leaders in the business world and in government; the nation's damaged relations with its longtime allies; the challenges presented by the emergence of China and India on the world's economic stage; the decline of the American car business; and the state of the American family. Iacocca shares the lessons he's learned from a lifetime of hard work and adventure, of spectacular successes and stunning defeats, of integrity and grace and good old-fashioned American optimism.
