While millions of Ford rear-wheel-drive cars are equipped with the durable and simple C4 and C6 transmissions of the 1960s, early in the 1980s Ford replaced those old designs with the AOD transmission for a new generation of cars. Overdrive gears, once popular before WWII, were now becoming popular again, as manufacturers were under increasing pressure to raise fuel economy to meet ever more demanding EPA standards. A nice byproduct of that was more comfortable cruising speeds, where your engine didn't have to work so hard in addition to getting better fuel economy. In Ford AOD Transmissions: Rebuilding and Modifying the AOD, AODE and 4R70W, author George Reid walks you through the process step-by-step, from removing the transmission from the vehicle, to complete disassembly and cleaning, to careful reassembly, to proper re-installation and road testing. Performance modifications are also covered, as well as an ID guide for various model numbers, evolutionary design changes, shift kit installation, and torque converter selection. This book is ideal for people who already have one of these transmissions in their car, as well as enthusiasts who would like to swap one of these more modern units into an older chassis to get all the benefits of overdrive. If you plan on researching or working on any one of these overdrive models, this book is a vital addition to your workbench or library.

This work brings together the pivotal, scholarly essays responsible for the present resurgence in rhetorical studies. Assembled by one of the most respected senior scholars in the field of rhetoric, the essays chart a course from tradition-based theory of civic rhetoric to ongoing issues of figuration, power, and gender. Together with a lucid introductory essay, these studies help to integrate the still-volatile questions at the core of humanities scholarship in rhetoric. The introductory student as well as the seasoned scholar will gain familiarity and footing in this oldest--and still new--liberal art.

Bollywood Sounds focuses on the songs of Indian films in their historical, social, commercial, and cinematic contexts. More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

Considers the contributions and contemporary significance of Alan Watts. Alan Watts—Here and Now explores the intellectual legacy and continuing relevance of a prolific writer and speaker who was a major influence on American culture during the latter half of the twentieth century. A thinker attuned to the spiritual malaise affecting the Western mind, Watts (1915–1973) provided intellectual and spiritual alternatives that helped shape the Beat culture of the 1950s and the counterculture of the 1960s. Well known for introducing Buddhist and Daoist spirituality to a wide Western audience, he also wrote on psychology, mysticism, and psychedelic experience. Many idolized Watts as a guru-mystic, yet he was also dismissed as intellectually shallow and as a mere popularizer of Asian religions (the “Norman Vincent Peale of Zen”). Both critical and appreciative, this edited volume locates Watts at the forefront of major paradigmatic shifts in Western intellectual life. Contributors explore how Watts’s work resonates in present-day scholarship on psychospiritual transformation, Buddhism and psychotherapy, Daoism in the West, phenomenology and hermeneutics, humanistic and transpersonal psychology, mysticism, and ecofeminism, among other areas.

The economic and environmental implications of energy subsidies have received renewed attention from policymakers and economists in recent years.

Nevertheless there remains significant uncertainty regarding the magnitude of the impact of energy subsidies on energy consumption. In this paper we analyze a panel of cross-country data to explore the responsiveness of energy consumption to changes in energy prices and the implications of our findings for the debate on energy subsidy reform. Our findings indicate a long-term price elasticity of energy demand between -0.3 and -0.5, which suggests that countries can reap significant long-term benefits from the reform of energy subsidies. Our findings

also indicate that short-term gains from subsidy reform are likely to be much smaller, which suggests the need for either a gradual approach to subsidy reform or for more generous safety nets in the short term.

February, 1940. In San Francisco's Chinatown, fireworks explode as the city celebrates Chinese New Year with a Rice Bowl Party, a three day-and-night carnival designed to raise money and support for China war relief. Miranda Corbie is a 33-year-old private investigator who stumbles upon the fatally shot body of Eddie Takahashi. The Chamber of Commerce wants it covered up. The cops acquiesce. All Miranda wants is justice--whatever it costs. From Chinatown tenements, to a tattered tailor's shop in Little Osaka, to a high-class bordello

draped in Southern Gothic, she shakes down the city--her city--seeking the truth. An outstanding series debut.

In her exuberant new work, *BOBBED HAIR AND BATHTUB GIN*, Marion Meade presents a portrait of four extraordinary writers--Dorothy Parker, Zelda Fitzgerald, Edna St. Vincent Millay, and Edna Ferber--whose loves, lives, and literary endeavors embodied the spirit of the 1920s. Capturing the jazz rhythms and desperate gaiety that defined the era, Meade gives us Parker, Fitzgerald, Millay, and Ferber, traces the intersections of their lives, and describes the men (F. Scott Fitzgerald, Edmund Wilson, Harold Ross, and Robert Benchley) who influenced them, loved them, and sometimes betrayed them. Here are the social and literary triumphs (Parker's Round Table witticisms appeared almost daily in the newspapers and Ferber and Millay won Pulitzer Prizes) and inevitably the penances each paid: crumbled love affairs, abortions, depression, lost beauty, nervous breakdowns, and finally, overdoses and even madness. These literary heroines did what they wanted, said what they thought, living wholly in the moment. They kicked open the door for twentieth-century women writers and set a new model for every woman trying to juggle the serious issues of economic independence, political power, and sexual freedom. Meade recreates the excitement, romance, and promise of the 1920s, a decade celebrated for cultural innovation--the birth of jazz, the beginning of modernism--and social and sexual liberation, bringing to light, as well, the anxiety and despair that lurked beneath the nonstop partying and outrageous behavior. A vibrant mixture of literary scholarship, social history, and scandal, *BOBBED HAIR AND BATHTUB GIN* is a rich evocation of a period that will forever intrigue and captivate us.

This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*. Technical instructor and HVAC expert Jerry Clemons completely covers both air-conditioning as well as heating systems, so you can save money repairing your own vehicle. Covered is a history of HVAC systems, airflow throughout the system, the principles of refrigerant, diagnosis of common faults in older systems, testing procedures, and finally repair and, in the case of air conditioning, recharging your system. Also included is proper evacuation and disposal of any residual refrigerant in

the system. Components such as compressors, condensers, evaporators and heater cores, pressure switches and climate control electrics and switches are also covered. Finally, for people with older cars, converting from the no-longer-available R-12 to R134a is detailed. Automotive climate controls are a complex system and are difficult to repair without proper instruction. Whether you are trying to get your old classic back to its original form or are just looking to save on expensive repairs, author Jerry Clemons and this book provide the knowledge you will need to get your car back on the road and cruising in comfort.
