"This is a very important book. Assessment is one of the most technically and professionally challenging of topics for new teachers. Val Brooks has brought her own impressive technical expertise to bear, and sets out the key professional demands in a thorough, logical and clear way. The book draws extensively on practical examples which exemplify and develop the argument. New teachers will find it an invaluable guide; experienced teachers will find that it widens their understanding of assessment as a tool for learning" - Chris Husbands, University of Warwick "Mentors will find much to aid their sessions with student teachers, while senior staff responsible for professional development will have a sound, easily read source of material. Highly recommended" - British Journal of Educational Studies

How can new teachers use assessment to enhance their teaching? How can assessment help pupils to learn? What are the arrangements for testing and examinations and the statutory assessment requirements at secondary school level? This book is aimed at students who are preparing to teach in secondary schools, and newly qualified teachers in their induction year. The entire text is devoted to assessment and therefore it is able to offer an in-depth consideration of aspects of assessment which exercise teachers at the beginning of their career, for example the relationship between assessment and learning, how assessment contributes to planning, ways of marking pupils' work, writing reports for parents and meetings with parents. Although it is informed by theory and research, the text has a practical orientation. It provides practical examples for readers to consider in developing their own practices and makes suggestions for activities intended to help beginning teachers to develop their own ideas and insights into assessment. The text is written for a graduate and undergraduate audience and aims to promote a thoughtful, well-informed approach to assessment and critical awareness

of issues which arise out of practice.

Activate is a new Key Stage 3 Science course for the 2014 curriculum, designed to support every student on their journey through Key Stage 3 to Key Stage 4 success. This student book will spark students' curiosity in science, whilst gradually building the maths, literacy and working scientifically skills vital for success in the new GCSEs.

This workbook accompanies the new Key Stage 3 Year 7 English Coursebook. The questions test understanding of the topics covered in the coursebook, helping to reinforce and consolidate learning and develop skills.

The questions are accessible to pupils working at the lower levels, but provide enough scope to be challenging to pupils working at level 7 and above.

This book consists of introduction to academic achievement assessment, international comparison of academic achievement assessment and reference, as well as theoretical system and practice strategy of academic achievement assessment. The study indicates that the development trends of foreign academic achievement assessment are: establishing a complete education quality monitoring system; paying more attention to the function and value of independent education quality monitoring institution and intermediary organization; the orientation based on the integrated development of students growing more apparent; marching from “evaluation of study” to “evaluation for study”; and placing educational equity in a prominent position. This book is easy to understand and readable for professionals like teachers, educational researchers

Science is central to our modern technological society, yet many of the most able pupils who could become the scientists of tomorrow turn away from science as soon as they have a choice in their studies. Science is often seen to be difficult or boring, and fails to engage or challenge those who are most suited to excel in scientific studies. This book asks what classroom teachers can do to make sure that their science teaching is stimulating and challenging for their students. Topics covered include: what do we mean by gifted and able children? gifted children that slip through the net challenging science through modelling asking questions in science exploring topical issues challenging science through talk after-school enrichment. Set in the wider context of debates about the provision for those labelled 'gifted' and 'exceptionally able', this book explores the meaning of these categories, and considers what they may

imply in such approaches as setting, streaming, acceleration and enrichment.

10 minute topic tests on KS3 Science content for retrieval practice to internalise knowledge students need to build on for GCSE 9-1 Science. Based on key knowledge from Years 7-9 KS3 Science, these standalone tests are not linked to any scheme, so can be used for independent formative assessment. Over 80 tests test and recall knowledge in Biology, Chemistry and Physics from the National Curriculum 2014 to help with long term memory for GCSE 9-1 Science. Any content from the AQA KS3 Science syllabus is flagged within the tests. Use and repeat tests in any year to find gaps in knowledge. Save time with ready-prepared tests and mark quickly with simple mark schemes and record sheets. Fit into lessons easily with 10 minute tests that require short answers and use command words from GCSE 9-1. Photocopiable with a free editable download, you can adapt the tests for your school. This volume contains everything students need to know for Key Stage 3 English. The text is laid out in 'sound bite' boxes to aid recollection, with clearly labelled diagrams to add visual clarity and further demonstrate the subject matter.
