English for Vocational Purposes provides a linguistic description of English in the context of the trades and investigates how this specialist language is used in real-world contexts. As the demand for English-speaking workers in the trades grows internationally, a major gap in the research on language in the trades is evident. Based on courses in construction and engineering at a polytechnic in New Zealand, this book offers an empirical response to this gap in research. Features of this book include: new research on linguistic features of written and spoken texts in trades education, with a special focus on discourse, visual elements of written texts and vocabulary; real-life examples of the language in context, along with implications for teaching and learning and a chapter devoted to putting research findings into practice; qualitative and quantitative data to support examples and shed light on the most complex aspects of English as a trades language; supplementary material online which includes technical word lists in areas of carpentry, plumbing, automotive technology and fabrication (welding). Paving the way for a new research agenda in the field of ESP, English for Vocational Purposes is key reading for advanced students, researchers and practitioners in the areas of ESP, trades education and vocational education.

Important insight into the work of a truly great songwriter. Updated to include the albums *Western Stars* and *Letter To You* and packed full of insightful stories from Springsteen's long career, *Bruce Springsteen: The Stories Behind the Songs* takes a detailed look at each and every one of his tracks, providing a unique look at this rock legend's method, as well as some of the many anecdotes and tales that are prolific in his long music history. The legend of Bruce Springsteen may well outlast rock 'n' roll itself. And for all the muscle and magic of his life-shaking concerts with the E Street Band, it comes down to the songs – music that helped define the best version of the United States for itself and the rest of the world; that bridged the gap between Bob Dylan and James Brown, between Phil Spector and Hank Williams; and that somehow managed to make New Jersey seem like a promised land. Deeply researched, laced with insight from decades of fandom and original reporting, this book is an exhaustive and unique look at the writing, recording and significance of Springsteen's singular catalog of songs – the first book to cover every officially released track, from hits to obscurities, from 1974's *Greetings From Asbury Park, N.J.* to 2014's *High Hopes*. This SpringerBrief answers the question on how birds recognize their predators using multidisciplinary approaches and outlines paths of the future research of predator recognition. A special focus is put on the role of key features to

discriminate against predators and non-predators. The first part of the book provides a comprehensive review of the mechanisms of predator recognition based on classical ethological studies in untrained birds. The second part introduces a new view on the topic treating theories of cognitive ethology. This approach involves examination of conditioned domestic pigeons and highlights the actual abilities of birds to recognize and categorize.

This amazing work, first published in 1909, is divided into five parts. The first is a discussion of ancient beliefs and the unifying truths that are found in all of them. The second concentrates on the basic concepts of spiritism such as the immortality of the soul, the purpose of life, reincarnation, God, and death. The third section explores deeper spiritist concepts such as fluids and magnetism, spiritual phenomena, nature and science, evolution of the spirit, dangers of Spiritism, and charlatanism. The fourth part discusses related topics to the spiritual world such as errant souls, higher life, inferior spirits, providence, free will, and hell. The last section discusses ethical topics such as moral life, faith, consolation, wealth, poverty, and charity.

What do *How to Win Friends and Influence People* and *Sell!* have in common (other than Dale Carnegie)? They're both based on the premise that **RELATIONSHIPS** are what matter. In this age, where media is social and funding

This work brings together the pivotal, scholarly essays responsible for the present resurgence in rhetorical studies. Assembled by one of the most respected senior scholars in the field of rhetoric, the essays chart a course from tradition-based theory of civic rhetoric to ongoing issues of figuration, power, and gender. Together with a lucid introductory essay, these studies help to integrate the still-volatile questions at the core of humanities scholarship in rhetoric. This book discusses the role of public-private partnerships (PPPs) in global transportation infrastructure. Seen as a way to provide vital services in an era of shrinking government budgets, public-private partnerships have become an increasingly important part of travel infrastructure worldwide. This book describes and analyzes the structure of various models of PPPs in various countries, evaluating their effectiveness, and drawing policy implications for future use. Written by leading international researchers and practitioners in the transportation field, each chapter is a case study on the adoption, implementation, and outcome of transportation services in different municipalities. Taken together, these diverse case studies provide an integrated framework for evaluating and using PPPs. Providing rigorous empirical analysis of PPPs in transportation, this volume will be of interest to researchers in

Sweet ass! A 200ish-page book about pot and pot-related stuff. Can you believe somebody paid these guys to publish a whole book about *The Chronic*? Man, that is so sick! *The Marijuana-Logues* started as an Off-Broadway show, consisting of these three guys, Arj Barker, Doug Benson, and Tony Camin sitting on stools and elucidating and illustrating the wisdom of weed. Since you probably never got motivated enough to actually go see the show, now is your chance to enjoy such gems as, “Some people say marijuana is a crutch—yeah, crutches help people walk. We think that’s a good thing.” In this sturdy volume (not made from hemp paper, so don’t try to smoke it), you’ll find many highly creative essays on the virtues of that fine fine plant, as well as some herben poetry, “high-ku,” marijuana fun facts, marijuana fun snacks, and other up-here stuff [point to your head].

Some choice buds from *The Marijuana-Logues*:  
**ARJ BARKER’S FIRST TIME** The first time I smoked pot, I was in the back seat of my older brother’s car. It must have been some pretty good weed, too, because I’m an only child.  
**THINGS YOU WILL NEVER HEAR DOUG BENSON SAY WHEN HE IS OFFERED SOME MARIJUANA** No.  
**FEMALE COMPOTABILITY** by Tony Camin My girlfriend thinks that I smoke too much pot. I, on the other hand, don’t think I smoke enough pot, because if I did, I’d be finished. And I’m not. Look, we all have our vices: I like to smoke a little weed; she likes to feed the baby. Different strokes for different

The aim of this book is to examine the transformation of the geography of China in the years since the start of China's policy of reform and opening-up in 1978, as seen through the eyes of Chinese geographers. Throughout that period, Chinese geographers have studied these environmental, economic, political and cultural processes closely, drawing on sources that are far from easy to access, and have published their results in Chinese. Much of this research has underpinned the Chinese government's assessment of policies and the policy choices at different levels, yet it is not well known outside of China. This volume deals with aspects of the socio-economic geography of China's transformation including its changing relations with the rest of the world, although it also deals with the impact of China's development path on the country's ecological systems. Each chapter deals with aggregate trends and specific cases to show the ways in which the particular characteristics of China's economic and social order (economic organization, political system and cultural model and values)

Inspired by Hans Christian Andersen's beloved—yet tragic—fairy tale, “The Little Mermaid,” Coral explores mental health and what it means to be human in a world where humanity often seems lost. Coral has always been different, standing out from her mermaid sisters in a society where blending in is key. Worse yet, she fears she has been afflicted with the dreaded Disease said to be carried by humans—emotions. Her sister had the Disease, and Red Tide took her away. Will it come for Coral next? Above the sea, Brooke has nothing left to give. Depression and anxiety have left her feeling isolated. Forgotten. The only thing she can rely on is the numbness she finds within the cool and comforting ocean waves. If only she weren't stuck at a new group-therapy home that promises a second chance at life. But what's the point of living if her soul is destined to bleed? Merrick may be San Francisco's golden boy, but he wants nothing more than to escape his controlling father. When his younger sister's suicide attempt sends Merrick to his breaking point, escape becomes the only option. If he can find their mom, everything will be made right again—right? When their worlds collide, all three will do whatever it takes to survive. But what—and who—must they leave behind for life to finally begin? Canada’s most engaging banker shares his strategies for operating in a radically different way in our ever-changing business world. Nothing is average or normal at Tangerine (formerly ING Direct)—not the name, not the style of banking, not the leadership. And Peter Aceto is not your average executive. The president and CEO of Tangerine runs his business in an unorthodox and intuitively human way. The bank has no tellers, no lineups, no bricks-and-mortar branches for its customers to visit. But people are at the core of the operation: loyal, happy and engaged employees who help thousands of customers save their money, buy homes and enjoy a healthy financial life. *Weology* provides an in-depth look into the “people-first” leadership strategies that have made Tangerine Canada’s leading direct bank, with more than 1.9 million clients and close to \$40 billion in total assets. As the company’s guiding hand for more than six years, Aceto thrives in his role by relying strongly on transparency, trust and accessibility. He doesn’t have a luxurious corner office (instead, he sits among the other employees), and he often responds to calls and emails from customers directly. Aceto’s relentless focus is on driving a type of radical thinking that delivers

superior and unparalleled results for Tangerine and the financial well-being of Canadians, and that demonstrates largely how business will be led in the future. In Weology, Aceto shares many stories that show how his philosophy and strategies have made him and his business so successful.

Birth is a sudden, traumatic transition of environments. Once the placental oxygen supply ceases, the foetus has only minutes to establish pulmonary oxygen transport, which requires not only inflation of the lungs, but also sudden and sustained changes in the lung circulation. Not long ago, research in this field was largely restricted to morphology and physiology. Now the powerful new tools of cellular and molecular biology have begun to shed light on the physiological processes in the developing lung and its supporting vasculature. In 22 chapters, three main sections explore lung growth and development, vascular cell growth and differentiation, and the mechanisms of hemodynamic control in the neonate; extensive illustrations give a comprehensive picture of pulmonary circulatory development. Factors controlling vasculogenesis and angiogenesis are described by the scientists who pioneered the field. Similarly, the intracellular signaling

cascades that determine proliferation or growth inhibition of fibroblasts, smooth muscle cells, and endothelial cells are also presented in an understandable manner. Finally, the role of substances, such as nitric oxide and endothelin, that control the hemodynamics of the fetal and neonatal circulations are discussed in detail, particularly in relation to the changes occurring at birth. This book will inform basic scientists as well as the clinician and student, and should be of particular interest to pediatric cardiologists, pulmonary medicine physicians, and vascular biologists.

Think and Learn Rich is not just a research study, but a story of about crossing the great divide that separates the workplace and academia. A training and development professional based in Montreal, George Saridakis explores what happens when a popular organizational learning methodology, Accelerated Learning, is co-opted to design a graduate course in educational technology. Saridakis argues for the viability of accelerated learning in traditional university settings and then puts it to the test. What ensues is a firsthand account of the journey, including triumphs and setbacks, participant perspectives and concludes with some compelling insights about the process of conducting an action research project while simultaneously taking on the role of teaching assistant. shift from a rancher-dominated agency to an energy-dominated agency. This shift is analyzed by identifying the conditions under which the expansion of hydraulic fracturing (fracking) in the Rocky Mountain West triggered a political conflict between ranching and energy stakeholder groups. Through scrutiny of federal actions and policies implemented by the Executive Branch between 2004 and 2010, the book sheds light on the emphasis of domestic energy production during this time period, and how the traditional ranching and energy alliance was split by shifting policy interests. The book is meant for policy makers, natural resource agencies, and students and researchers engaged in political science, public administration, and natural resource management. Chapter 1 introduces readers to the case study at hand, and reviews literature on public land agencies and policies. Chapter 2 summarizes the legal history of public land management by the federal government, and the conditions that caused the BLM to favor energy development over ranching in the mid-2000's. Chapter 3 details the role of the Executive Branch (Bush-Cheney administration) in affecting the BLM's domestic energy policies and resource allocation, and chapter 4 analyzes the role of subgovernments in affecting the BLM's motivations too. Chapters 5, 6 and 7 contain first-hand accounts from government officials, state petroleum associations, and ranching supported interest groups to explore the concept of

subgovernment stakeholder domination in policymaking, and analyze the similarities and differences between different policy-making elites. Chapter 8 concludes the text by summarizing subgovernment theory, mapping the behaviors of subgovernment actors, and discussing the implications for future political appointees in the direction of land-management agencies like the BLM. America knew George Zimmer for one of the most famous slogans in television advertising history: "I guarantee it." Zimmer rode his promise to lead the Men's Wearhouse to unimagined success as a retail giant. Now, years removed from his stunning dismissal as leader of the company he founded, I Guarantee It recounts the journey of Zimmer's rise, the fall of the Men's Wearhouse, and his personal renewal. For forty-one years, George Zimmer forged a relationship with American men who wanted to like the way they looked without getting too fussy about it. He made them a promise that came straight from the shoulder: "I guarantee it," he said, and it was ironclad. By the millions, customers walked into The Men's Wearhouse stores in all fifty states and Canada, where they received "quality, service, and a

good price,” where they bought suits, ties, sports coats, and slacks by the tens of billions of dollars. Then a backstabbing — the handpicked board of directors fired Zimmer from the company he had created and developed into the most successful men’s specialty store in world history. Eight years later, Zimmer is back to tell his story: a man raised by a prosperous and loving family, a fun-loving son of the sixties, a merchant, an entrepreneur, a pitchman for the ages. Zimmer’s ouster devastated but did not destroy him. His is a story of hard work and resilience, about a life in business that succeeded beyond belief and followed the Golden Rule. It’s a story that will teach and inspire. He guarantees it.

Researchers in policy and social sciences from across Europe explore a number of perspectives for developing preventive labor market policies in the continent against the background of existing experience with national strategies and the increasing influence on labor market programs by the European Union. They focus on the extent to which the conditional framework is changing and how programs and instrument must respond, what response mechanisms characterize national strategies, and what learning processes can be triggered by exchanging national experience and what role the European Union organs play in such exchanges. The national Symposium of the Division of Macromolecular Chemistry of the GDCh (Gesellschaft Deutscher Chemiker) in March 2000 was held in Merseburg with a topic of Tailormade Polymers. The scientific program was divided in two parts: contemporary activities in polymer synthesis and the tailoring of polymer properties by suitable modification steps. An excellent insight into contemporary activities in polymer synthesis, modification and characterization was given. A selection of the contributions is presented in this volume. This book analyses policies in eight European countries that aim to intervene in the reproduction of social and educational inequalities. In order to understand why some policies succeed and others fail, it is necessary to look at education systems through cross-national comparison.

This volume presents the proceedings of a Coimbra Group conference on networking across borders and frontiers in European culture and society that took place at the University of Graz in September 2007. Organised by the Task Force on Culture, Arts and Humanities it brought together researches from ten different European countries and an array of disciplines across the Humanities and Social Sciences spectrum, from Cultural Anthropology, European Ethnology, History, Literary Studies and Fine Arts to Peace Studies, Sociology and Political Sciences. It explores the capacity of the frontier-network binary for describing and analysing historical, cultural and political processes in the formation of European cultures and societies past and present, and across national and disciplinary boundaries.

This book offers an empirical view on the topic of globalization adding a historical context to the current state of affairs as well as discussing political and economic factors that attribute to

the status quo. In hindsight, the term globalization was introduced in the 1940s. In addition, the term globalization became widely accepted and even superseded earlier attempts to describe the phenomenon "mondialization" by the French which was not seen as benign. In addition, the word globalization is multifaceted and the scope of overviewing the process of globalization can include political, economic, social and technological factors. To be clearer, globalization involves a wide array of key networks and monetized international channels that are strategically implemented based on cooperation between states. In one instance, globalization is a complex recurrent phenomenon involving the history of human society and strategies towards economic development across regional and geopolitical areas. In efforts to secure economic primacy in the global arena, the United States must compel other nations to respect our borders and stop letting other countries and agents set the rules of commerce. These acts violate our government's sovereignty. Furthermore, this book examines the structure and due diligence of the United Nations in the entity's efforts to promote global peace and security. The global governance model implemented by the United Nations requires cooperation among states yet like any institution there is a hierarchy of powers, wherein there are five main countries with the power to veto a prospective law attempting to be implemented universally. The five permanent members of the UNSC are still the most powerful nations in the world today. They help to maintain normative standards in building a more cohesive international community and ensuring sustainable development with great regard to global human life. Though as we will learn from further reading this book is that the United Nations has had its share of successes and failures.

soul, by the author of the million-copy bestseller *The Interpretation of Murder*. Under a clear blue September sky, America's financial center in lower Manhattan became the site of the largest, deadliest terrorist attack in the nation's history. It was September 16, 1920. Four hundred people were killed or injured. The country was appalled by the magnitude and savagery of the incomprehensible attack, which remains unsolved to this day. The bomb that devastated Wall Street in 1920 explodes in the opening pages of *The Death Instinct*, Jed Rubenfeld's provocative and mesmerizing new novel. War veteran Dr. Stratham Younger and his friend Captain James Littlemore of the New York Police Department are caught on Wall Street on the fateful day of the blast. With them is the beautiful Colette Rousseau, a French radiochemist whom Younger meets while fighting in the world war. A series of inexplicable attacks on Rousseau, a secret buried in her past, and a mysterious trail of evidence lead Young, Littlemore, and Rousseau on a thrilling international and psychological journey—from Paris to Prague, from the Vienna home of Dr. Sigmund Freud to the corridors of power in Washington, D.C., and ultimately to the hidden depths of our most savage instincts. As the seemingly disjointed pieces of what Younger and Littlemore learn come together, the two uncover the shocking truth behind the bombing. Blending fact and fiction in a brilliantly convincing narrative, Jed Rubenfeld has forged a gripping historical mystery about a tragedy that holds eerie parallels to our own time. Watch a video

During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

In “Jewish Integration in the German Army in the First World War” David J. Fine offers a surprising portrayal of Jewish officers in the German army as integrated and comfortably identified as both Jews and Germans. Looking at how Judaism and Christianity were practiced in the army and how Jewish soldiers reacted to encountering other Jews in the conquered lands of the eastern front, Fine argues that Jews were strongly identified as both Germans and Jews. Finally, utilizing many published and unpublished sources, the author argues that antisemitism was not a primary factor in the war experience of Jewish soldiers.

name. Why does the lure of anonymity have me craving to indulge a stranger? It's the start of everything right. I received a slew of text messages... when everything in my life was wrong. And she made me laugh again. Her: You're probably a creeper. Her: Possibly a stalker. Why do I have the overwhelming need to find this stranger who saved me and make her mine? Him: Take a chance with me. Her: This is crazy. Him: I need to see you. Her: What are we doing? Him: We're about to find out. Her: PHOTO ATTACHED Him: PHOTO ATTACHED

Reviews the ideas of the most influential anthropologists of the past and raises fundamental questions about the relationship between the individual and society Economic thought has suffered, over the past centuries, remarkable progress and, despite the fact that the contemporary world is characterized by the existence of distressing problems in many regions of the planet, such as diseases, misery, hunger, unemployment, incomprehension among peoples leading to wars and the latent state of international tension and violence, understood in its broadest sense, undoubtedly all currents of economic thought, throughout history, from Greek and Roman philosophers, to the scholastics of the Middle Ages, to mercantilists (these not much clearly), by 18th century liberals, by 19th century socialists and more recently, in the 20th century, by John Maynard Keynes (1888-1946) and Milton Friedman (1912-2006), emphasize the

need to seek a more just, free and balanced world where man can have access to growing social well-being, materialized in the continuous meeting of his socio-political-economic needs and in the development of his spirit. The reasons for not fully achieving these goals - despite the remarkable scientific and technological progress achieved by Humanity - may lie in the nature of the human being himself, unequally endowed with aptitudes, desires and goals, an insatiable conqueror and increasingly self-centered. However, this moral and philosophical stance of great thinkers gives encouragement to those who envision a better world and, although the recipes are different - throughout history there has been a huge diversity of ideas and systems, many of them totally antagonistic (some liberal, others centralizing) - the ultimate goal is always the good of humanity. In this book, we present some ideas that we consider fundamental to understand the thinking of four great Men - Adam Smith (1723-1790), Karl Marx (1818-1883), John Maynard Keynes (1883-1946) and Milton Friedman (1912-2006). Sometimes in agreement, almost always divergent, their reading shows us how complex, different and grandiose human thought is and how to interpret the world around him. Put in the form of an "interview", let us pretend that the issues raised here are being said by them today. Without a doubt, we will be surprised to see many of their ideas with remarkable relevance, although none of the four is still
