

Mcq For Haematology With Answer

There are plenty of MCQ books around but most combine mainstream subjects such as gastroenterology and renal medicine, which most Senior House Officers find relatively straightforward. Few MCQ books, however, focus on the subjects that many candidates find difficult those in which they are least likely to have had good clinical experience. Infectious disease, haematology and clinical chemistry are three such subjects. Candidates feel uneasy about tackling MCQs in these areas, and these questions often become the deciders leading to success or failure. This new book from Galvani et al contains 150 five-part MCQs with full answers and explanations, for these three difficult areas.

Hematology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering all topics that appear on the Hematology Certification Exam. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the exam and highlights topic areas that are often found on the test. For hematology and oncology fellows as well as practicing clinicians needing a refresher before taking MOC, this handy study guide provides succinct overviews of all blood disorders, syndromes and diseases with practice questions on the go. Each disorder or disease-based chapter provides the same structure for ease of use beginning with the epidemiology, and followed by the etiology and risk factors, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. The authors provide the most accurate and up-to-date information, including well-established treatment regimens for a variety of blood disorders, including iron disorders, bone marrow failure syndromes, platelet and megakaryocytic disorders, hemostasis, thrombosis, and hematologic malignancies. Later chapters review other major subspecialty areas found on the exam including transfusion medicine and hematopoietic cell transplantation. With 200 board-style questions and answers with detailed rationales, Hematology Board Review is the go-to, quick review for any trainee preparing for initial certification and for hematologists or oncologists preparing for recertification. Key Features: Includes 200 board-style questions and answers with rationales Provides key point summaries of each topic area for quick study and easy recall Thorough coverage of hematologic malignancies, blood disorders, transfusion medicine, hematopoietic cell transplantation, and standard treatment regimens Tables providing key data and information related to staging, treatment options, and disease classifications

The aim of this Self-Assessment Program is to provide a comprehensive, yet concise overview of the dynamic and rapidly evolving disciplines of adult and pediatric hematology. It is intended for Fellows in training, both as a review and as a resource to prepare for Subspecialty Board Certification. It will also be an ideal reference for the practicing hematologist as an update in the discipline, for acquisition of continuing medical education credit, and for recertification board

preparation. The format includes both pediatric and adult perspectives, with introductory chapters on the molecular and cellular biology foundations of hematology. The major benign and neoplastic disorders as well as stem cell transplantation, transfusion medicine and laboratory haematology are represented in subsequent chapters. A section on consultative haematology synthesizes and integrates the management of patients with blood disorders. Case vignettes within the chapters serve to focus the discussion on issues and applications in clinical practice. Core knowledge is well represented, and every effort has been made to identify recent advances and promising areas of ongoing clinical and basic research. Over 200 case-based, multiple-choice questions with detailed critiques are provided for CME credit and board preparation. An accompanying website provides links to Blood, The ASH Education Program Books and the ASH Image Bank. Special prices are available for members and trainees. The Self-Assessment Program is offered to American Society of Hematology members for US\$250 and trainees for US\$200. Those eligible for discount prices must contact customer service at 800-216-2522 or orders@aidcvt.com to order.

For those preparing for certification or recertification in hematology or oncology, Hoffman and Abeloff's Hematology-Oncology Review is a single-volume source of authoritative, up-to-date exam preparation. This unique question and answer review helps you succeed on today's board exams with more than 1,000 board-style questions, answers, and rationales; comprehensive coverage of essential exam topics, and online practice tests. Includes 1,000+ board-style questions with answers and rationales explaining both correct and incorrect answers. Covers a broad range of topics compiled by experts in hematology and oncology, including cancer biology and genomics, immunotherapy, hematologic malignancies, solid tumor malignancies, non-malignant hematology, and supportive care. Uniquely designed as both a standalone review and a study companion to Abeloff's Clinical Oncology and Hematology: Basic Principles and Practice.

NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes - all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For courses in hematology and coagulation. Comprehensive survey of laboratory hematology, for both MLT and MLS students Clinical Laboratory Hematology balances theory and practical applications in a way that is engaging and useful to medical laboratory technician and science (MLT/MLS) students, at all levels. Detailed technical information combined with a running, realistic case study provide ample opportunities to analyze and synthesize information, answer questions and solve problems, and consider real-world applications. The 4th edition has been thoroughly updated

with the latest advances in laboratory medicine and with updated content on iron metabolism and myelodysplastic syndromes. *Clinical Laboratory Hematology*, 4th Edition, is also available via Revel(tm), an interactive learning environment that enables students to read, practice, and study in one continuous experience. *Paediatrics at a Glance* provides an introduction to paediatrics and the problems encountered in child health as they present in primary, community and secondary care, from birth through to adolescence. Thoroughly updated to reflect changes in understanding of childhood illness over the last 5 years, the 4th edition of this best-selling textbook diagrammatically summarises the main differential diagnoses for each presenting symptom, while accompanying text covers important disorders and conditions as well as management information.

Paediatrics at a Glance:

- Is an accessible, user-friendly guide to the entire paediatric curriculum
- Features expanded coverage of psychological issues and ethics in child health
- Includes more on advances in genetics, screening and therapy of childhood illness
- Contains new videos of procedures and concepts on the companion website
- Includes a brand new chapter on Palliative Care - an emerging area in the specialty
- Features full colour artwork throughout
- Includes a companion website at www.ataglanceseries.com/paediatrics featuring interactive self-assessment case studies, MCQs, videos of the procedures and concepts covered in the book, and links to online resources

Paediatrics at a Glance is the ideal companion for anyone about to start a paediatric attachment or module and will appeal to medical students, junior doctors and GP trainees as well as nursing students and other health professionals.

This book provides 300 hematology MCQs divided into three practice papers. Correct answers follow, accompanied by short referenced notes drawing from recent important journal articles, major critical care textbooks and selected internet resources.

Make sure you are thoroughly prepared to work in a clinical lab. Rodak's *Hematology: Clinical Principles and Applications*, 6th Edition uses hundreds of full-color photomicrographs to help you understand the essentials of hematology. This new edition shows how to accurately identify cells, simplifies hemostasis and thrombosis concepts, and covers normal hematopoiesis through diseases of erythroid, myeloid, lymphoid, and megakaryocytic origins. Easy to follow and understand, this book also covers key topics including: working in a hematology lab; complementary testing areas such as flow cytometry, cytogenetics, and molecular diagnostics; the parts and functions of the cell; and laboratory testing of blood cells and body fluid cells. UPDATED nearly 700 full-color illustrations and photomicrographs make it easier for you to visualize hematology concepts and show what you'll encounter in the lab, with images appearing near their mentions in the text to minimize flipping pages back and forth. UPDATED content throughout text reflects latest information on hematology. Instructions for lab procedures include sources of possible errors along with comments. Hematology instruments are described, compared, and contrasted. Case studies in each

chapter provide opportunities to apply hematology concepts to real-life scenarios. Hematology/hemostasis reference ranges are listed on the inside front and back covers for quick reference. A bulleted summary makes it easy for you to review the important points in every chapter. Learning objectives begin each chapter and indicate what you should achieve, with review questions appearing at the end. A glossary of key terms makes it easy to find and learn definitions. NEW! Additional content on cell structure and receptors helps you learn to identify these organisms. NEW! New chapter on Introduction to Hematology Malignancies provides and overview of diagnostic technology and techniques used in the lab. Best of Five MCQs for the Acute Medicine SCE is a new revision resource designed specifically for this high-stakes exam. It contains over 350 Best of Five questions with explanatory answers, each accurately reflecting the layout of questions in the exam.

• What causes hypertension in children? • Is it common for epileptic patients to have post-ictal vomiting? If so, how often does this occur? • Why is the incidence of parkinsonism less common in smokers? • What is the role of urine examination in diabetic control? Where do you turn to when you have a difficult medical question that needs answering? The 'Ask the Author' online feature from the best-selling textbook Kumar & Clark's Clinical Medicine has collected a wealth of questions and comments directly from medical students and doctors about topics that are of particular interest or difficulty to them. Kumar and Clark have brought together over 1000 of the questions they have been asked along with their answers. It will appeal to the many fans of Kumar & Clark, from first-year students to practising doctors, and will provide a useful and interesting sounding board to help ensure best practice. This unique book will provide you with a quick and easy way to discover the answers to your own medical questions...! The writing style is appealing and conversational, designed to entertain as well as instruct. Carries the 'Kumar & Clark' stamp of authority. All questions fully indexed for ease of reference. Covers topics that are easily misunderstood in medicine – good preparation for medical students, senior house officers/interns and specialists in training/residents preparing for written or oral exams.

This second edition of '320 Single Best Answer Questions for Final Year Medical Students' is an invaluable resource for medical students preparing for their final examinations. Additionally, the breadth of topics covered and detailed answers expands the versatility of this book to a larger audience including doctors preparing for postgraduate exams and other allied healthcare professionals who will be examined in general internal medicine. This improved edition contains updated and new questions that are in line with the most recent developments in clinical guidelines as well as being written in accordance with the recent changes to medical school examinations. The 320 questions are divided into 11 commonly tested areas of medicine, surgery and sub-specialities. They are designed to provide a comprehensive coverage of the medical school curriculum and to allow practice by speciality or random selection. The questions are written in the format of medical final examinations. The answers provide detailed explanations as to how the correct answer is reached, followed by a clear discussion of how the incorrect answers are ruled out and supplementary information about other important aspects of each question. The answers are designed to allow the reader to further enhance their clinical knowledge, understanding and single best answer technique, thus making this book an excellent aid for exam preparation. An invaluable self-assessment tool for emergency medicine trainees in Australasia.

Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian

Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice – from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app – a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Q & A format/reviews visual optics/ocular structure & function/appropriate drug actions/clinical techniques etc.

The EHRA Book of Interventional Electrophysiology is the second official textbook of European Heart Rhythm Association (EHRA). Using clinical cases to encourage practical learning, this book assists electrophysiologists and device specialists in tackling both common and unusual situations that they may encounter during daily practice. Richly illustrated, and covering electrophysiological procedures for supra-ventricular and ventricular arrhythmias, the book enables specialists to deepen their understanding of complex concepts and techniques.

Tracings, covering supra-ventricular and ventricular arrhythmias, are presented with multiple-choice questions to allow readers to hone their skills for interpreting challenging cases and to prepare for the EHRA certification exam in electrophysiology. Cases include Orthodromic AVRT, PV Isolation, VT ablation, and Atypical left atrial flutter to name a few. The EHRA Book of Interventional Electrophysiology is a wide-ranging, practical case-book, written by leading experts in the field and edited by members of the EHRA education committee: an essential companion for electrophysiologists and trainees alike.

Companion v. to: Medicine at a glance. 3rd ed. 2010.

This book contains 500 best of five multiple choice questions for preparation for any clinical medical examination. The author has used recent publications from the medical literature to compile questions involving a large number of topics from clinical medicine. This book is ideal for any undergraduate students or postgraduate doctors in training who are studying for examinations. Detailed answers are provided and are fully referenced. The areas covered include COVID-19, haematology, cardiology, gastroenterology, respiratory medicine, endocrinology, neurology, infectious diseases, oncology, radiology, nephrology and medical statistics.

Offers revision for the Applied Knowledge Test (AKT). Featuring over 300 questions and with chapters mirroring the GP syllabus, this book provides practice of various questions format used in the exam. It presents answers with explanations to help develop learning and understanding.

Medical-Surgical Nursing at a Glance is the perfect companion for study and revision for nursing and healthcare students from the publishers of the market-leading at a Glance series. This easy-to-read, accessible guide brings together all the key principles of caring for patients with medical and surgical needs. Highly visual, each topic is covered in one two-page spread, making it easy to quickly read up on key information and grasp the essentials of the key aspects of caring for the adult patient. A clear and accessible foundation of the need to know aspects of medicine and surgery for nurses Takes a systems approach exploring nursing care of key medical and surgical conditions and disorders Covers assessment, nutrition, pain, infection control Supported by a companion website with over 300 interactive multiple choice questions Provides need-to-know information in a quick-reference format Written from a UK

perspective, with application to clinical practice A companion website is available at www.ataglanceseries.com/nursing/medsurg featuring interactive multiple choice questions Medical-Surgical Nursing at a Glance is ideal for nursing students looking for a clear and visual summary of care of the adult patient.

Companion volume to: Mayo Clinic internal medicine board review. 10th ed. c2013.

Written to help haematology and general medical trainees evaluate their own knowledge, and particularly useful for those preparing for the Part 1 examination of the Royal College of Pathologists. This exam-centered book will also be of use to core medical trainees preparing for the examinations of the Royal College of Physicians and the Royal Australasian College of Physicians and to haematology and general medicine trainees in other countries where methods of examination are similar. The 150 questions are presented in two formats, Single Best Answer and Extended Matching Question, and comes complete with detailed feedback and, when appropriate, relevant references are given for each question so that those who select the wrong answer will understand why another answer is better. Quick reference question book, ideal for examination preparation Includes 50 SBA questions, ideal for the Part 1 and Part 2 MRCP examinations, which although having a general medical slant, are also appropriate for haematology specialist trainees Includes 70 SBA multiple choice questions appropriate for haematology specialist trainees but also useful to core medical trainees Includes 30 EMQs suitable for those taking Part 1 of the FRCPath examination Questions come complete with fully referenced answers and discussion points This book provides an educational tool for training as well as an ideal way to prepare for examinations and is also of value to those who examine in haematology and haematopathology.

Single Best Answer (SBA) examinations are an increasingly popular means of testing medical students and those undertaking postgraduate qualifications in a number of subject areas.

Written by a final year medical student, junior doctors and experienced clinicians, 500 Single Best Answers in Medicine provides invaluable guidance from authors who understand the subject. Providing a clear explanation of the relevant medical science behind the individual medical specialties, Basic Science for Core Medical Training and the MRCP, is an indispensable part of a candidate's MRCP preparation. Directly linked to the Royal College exam, the book follows the same systems-based approach as the syllabus for accurate and effective revision. With full coverage of basic science for the medical specialities, the book features material on genetics, cellular, molecular and membrane biology, and biochemistry. Content is presented in an illustrated and easy-to-read format, ensuring that the basic science for each medical specialty is more approachable and accessible. A focus on how the basic sciences aid understanding of clinical practice is reinforced through key tables of differential diagnoses and pharmacology. Ten multiple choice questions at the end of each chapter consolidate learning and enable candidates to test their knowledge. The book also covers common examination errors and areas of misunderstanding to aid learning and help candidates avoid common pitfalls.

This book provides a bank of multiple-choice questions for candidates preparing for Part 2 of the Membership examination of the Royal Colleges of Physicians, the MRCP. The questions are arranged by subject area to enable structured revision and allow candidates to focus on particular areas where they feel less confident. The book has been written with a close focus on recent examinations, with the coverage of topics weighted to reflect the frequency with which they have appeared. The book is structured more as a manual than as a mock exam, and includes explanations for both correct and incorrect answers, focusing comprehensively on the fundamental principles of medical practice. As well as candidates for the MRCP, this book will also be of interest to medical students and students of related health sciences.

Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, Essential Neonatal Medicine continues to be an indispensable resource that combines the depth and breadth of a textbook with the efficiency of a revision guide.

Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, Essential Neonatal Medicine is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

As the first revision text aimed specifically at the Knowledge-Based Assessment, Essential Revision Notes for Cardiology KBA is the cornerstone of your revision for this new and compulsory examination. Each chapter exactly maps the core cardiology training curriculum, giving measurable assurance that you are getting the information you need to pass. Each chapter is written by a senior cardiology trainee in collaboration with a senior consultant who has expertise in that specific field, ensuring that the content is both authoritative and accessible. Drawing on the latest guidelines and documents, the concise, bullet-pointed layout allows easy access to and digestion of the key points you'll need during revision. Numerous tables, boxes and figures make this the ideal accompaniment to retaining the large and varied amount of information needed to pass the examination.

The questions used in this book have been developed and continuously updated over 15 years. 'MCQs in Paediatrics' includes questions and detailed answers submitted by paediatricians in all specialties, and covers the widest range of clinical skills and paediatric knowledge. The questions have been used in both undergraduate and postgraduate examinations at the DCH and MRCP level. All questions have been reviewed and refined following the analysis of examination results, and are designed to test the application of knowledge rather than just the facts. The answers are accompanied by detailed explanations which allow the book to be used both for self-assessment and as a guide for further study.

Essentials of Clinical Immunology provides the most up-to-date, core information required to understand diseases with an immunological basis. Clinically focussed, the sixth edition of this classic text presents theoretical and practical information in a simple yet thorough way. Essentials of Clinical Immunology covers the underlying pathophysiology, the signs and symptoms of disease, the investigations required and guidance on the management of patients. Perfect for clinical medical students, junior doctors and medical professionals seeking a refresher in the role of immunology in clinical medicine, this comprehensive text features fully updated clinical information, boxes with key points, real-life case histories to illustrate key concepts and an index of contents at the start of each chapter. A companion website at www.immunologyclinic.com provides additional learning tools, including more case studies, interactive multiple-choice questions and answers, all of the photographs and illustrations from the book, links to useful websites, and a selection of review articles from the journal Clinical and Experimental Immunology. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

Here is the ideal book for preparing for the new Part One of the FRCS exam. To conform to the recently introduced syllabus the questions used are now much more surgically relevant. Answers, many with explanations, are provided to make the use of the MCQs a more useful learning exercise. The book follows the format of the examination and is split into the following sections: Anatomy (including histology, embryology and medical imaging); Physiology and Biochemistry; Clinical Pharmacology; General and Systemic Pathology; Microbiology; Clinical Immunology; Haematology.

Based upon the popular review course from Harvard Medical School, The Brigham Intensive Review of Internal Medicine is a comprehensive study guide for the American Board of Internal Medicine certification or maintenance of certification examination as well as for general practice review by physicians and residents. This authoritative, thorough resource provides in-depth coverage on all specialties of internal medicine, as well as palliative care, occupational medicine, psychiatry, and geriatric medicine. Editors Ajay K. Singh and Joseph Loscalzo recruited leading authorities from Harvard as well as former chief residents at Brigham and Women's Hospital to contribute to this book. Featuring over 600 board review questions, with numerous tables and figures, chapters offer detailed discussions with emphasis on essential learning points. Over 100 chapters are organized into 10 broad sections, with one additional section dedicated to board simulation. As the required content for the American Board of Internal Medicine continues to evolve, studying can prove challenging. The Brigham Intensive Review of Internal Medicine is the ideal study guide for anyone preparing for certification or recertification.

Single Best Answer (SBA) and Extended Matching Question (EMQ) examinations are increasingly popular means of testing medical students and those undertaking postgraduate qualifications in a number of subject areas.

Written by a final year medical student, junior doctors and an experienced clinician, Single Best Answers and EMQs in Clinical Pathology

Designed for candidates preparing for the MCEM Part A exam, Get Through MCEM Part A: MCQs provides invaluable revision for this new exam, success in which is obligatory for entry into higher specialist training in Emergency Medicine. Over 400 practice questions are presented reflecting the format and content used in the actual exam. Useful revision tips and practical advice on the format of the exam, plus techniques for answering questions are provided to develop candidates' exam skills and build up confidence in readiness for the exam day. Three complete mock exams provide the ultimate last minute revision tool. All the answers are supported with detailed explanations to allow the candidate to assess and supplement their own level of knowledge, and target areas of weakness. Get Through MCEM Part A: MCQs is comprehensive and authoritative: all authors are practising emergency physicians. Featuring questions that specifically address all areas of the College of Emergency Medicine's curriculum, this is the essential revision book for all candidates

preparing for the Part A exam. It also provides valuable revision for trainees sitting the FCEM exam and for medical students revising for clinical exams. Preparing to Pass the FRCA: Strategies for Exam Success equips you with the skills of effective revision and time management to maximise your success. The book takes each element of the FRCA exam and provides tips and techniques on how to approach the different types of questions, and includes worked examples with answers, so that you can undertake your revision accordingly. It will help you to target your revision so you can cover the breadth of topics in the FRCA syllabus and ensure that you structure your revision in an efficient way, as well as helping you to approach the exam and convey your knowledge through writing or speech correctly. Taking many common problems candidates face when preparing for this exam, the book covers motivation, effective studying, managing nerves, and scheduling time to study amongst other commitments. Includes 16 subject-based chapters - covering the Royal College of Physicians' curriculum for Part 1 of the MRCP 1 examination. This title also includes comprehensive answers section that features explanations that enable the reader to develop the knowledge and confidence to pass the exam.

This question-and-answer companion to Mayo Clinic Internal Medicine Board Review, 10th Edition, tests physicians and physicians-in-training on all relevant material related to the goals set forth by ABIM to ensure the success of internal medicine clinicians. By dividing each chapter according to a major subspecialty and with every question structured as a mock clinical interview, Mayo Clinic Internal Medicine Board Review: Questions and Answers is the perfect study tool for physicians-in-training and practicing clinicians preparing themselves for board examinations in internal medicine.

This new edition continues to provide a concise and accessible introduction to haematology. It follows the easy-to-use 'at a glance' format of double-page spreads comprising clear, memorable diagrams illustrating the key facts and essential textual information.

Following the familiar, easy-to-use at a Glance format, Haematology at a Glance, Fourth Edition is a broad and accessible introduction to the study of blood. Fully revised and updated to reflect advances in the field and in clinical practice, this new edition covers essential knowledge, from basic haematological physiology to blood disorders and their diagnosis and treatment. This new edition of Haematology at a Glance:

- Features expanded sections on the underlying mechanisms, diagnostic techniques and management of the malignant haematological diseases. Also incorporates recent advances in knowledge of thrombosis and the newer oral anticoagulants
- Contains the very latest clinical treatments
- Includes updated illustrations and clinical photographs to illustrate concepts and aid understanding
- Features extensive online self-assessment at www.ataglanceseries.com/haematology

This book is an invaluable resource for medical students and health professionals wanting to consolidate and expand their knowledge of haematology.

Academic geriatricians are always looking for an improved objective, quantifiable measure of biological ageing in humans to replace that unphysiological and arbitrary scale 'years survived'. The MCQ may be the nearest we have come yet to achieving this Holy Grail. An individual's facility with the setting and answering of MCQs

separates the medical generations more surely than years. I am only grateful I was educated in a less rigorous but perhaps more 'gentlemanly' era. If one appeared before an examiner neatly dressed with clean finger nails and the examination scripts were literate essays written in fountain pen then you were in - or so it seemed. For the past 20 years we have been evolving towards much more objective and rigorous assessment of knowledge and understanding of medicine of both undergraduate and postgraduate students. This process has been exemplified by the evolution of what is now the seemingly ubiquitous MCQ. When initially presented as objective and quantifiable measures of clinical knowledge MCQs were the subject of scorn - how could they assess the art of medicine - the grey areas of clinical decision making? However they very rapidly overcame this antediluvian scepticism and I believe they have had an effect well beyond the limited area of competence measurement. They have induced or at the very least contributed to a shift towards a more rigorous, dare one say more scientific, approach to clinical medicine.
