Finding Your Way with Your Baby explores the emotional experience of the baby in the first year, and that of the mother, father and other significant adults. It does so in a way that is deeply informed by psychoanalytic understandings, infant observation, developmental science and decades of clinical experience. Combining the wisdom of many years' work with the freshness of up-to-date knowledge, Dilys Daws and Alexandra de Rementeria engage with the most difficult emotional experiences that are often glossed over in parenting books – such as pregnancy, through birth into bonding, ambivalence about the baby, depression, and the emotional turmoil so often brought to the surface by being a new parent. Acknowledgement and understanding about this darker side of family life offers a sense of relief that can allow parents to harness the power of knowing, owning and sharing feelings to transform situations and break negative cycles and old ways of relating. With real-life examples, references to current thinking and a calm and simple writing style they also provide new insights into the more commonly covered issues such as weaning, sleeping and crying. Finding Your Way with Your Baby is primarily aimed at parents but it will be a helpful resource for all those working with parents and babies including health visitors, midwives, social workers, GPs, paediatricians and childcare workers. It will appeal to parents and professionals who are interested in ideas from psychoanalytic clinical practice and the latest research in developmental psychology and neuroscience.

Terrie and Doug Oxtal gave their lives to a dream. There is no way to begin without telling you the saddest part of the story. It's a love story, and it begins with a positive pregnancy test. But, it doesn't end with a baby."Everything was right on schedule in Brooke Taylor's meticulously planned world. She had checked off every box-the husband, the house, the dogs, the graduate degree, the (modest) savings account-and now, positive pregnancy test in hand, she had checked the most anticipated box of all. As a young couple with every dream seemingly within their grasp, the potential for looming tragedy wasn't even on their radar. The death of a child? That was an unfathomable abstraction, a terrible tragedy that could only happen to someone else.And then, in one fateful moment, the unimaginable became their reality.After 34 weeks of a textbook, uneventful pregnancy while expecting their first daughter, Eliza, in 2010, Brooke and her husband David were shocked when she went into labor weeks before her due date-and then absolutely blindsided when they arrived at the hospital only to be told that their beloved "Baby Duck" no longer had a

heartbeat. This is the story of what comes next: of learning to live with a broken heart that keeps on beating, of picking up the pieces amidst the devastation of earth-shattering grief, and of finding a way to love life again—even when nothing goes according to plan. This is the story of surviving the death of a child, navigating the complexities of life after pregnancy loss, and discovering that grief can somehow become a part of our life without overtaking it completely. *Unimaginable: Life after baby loss* examines what it means to be a parent bereaved through stillbirth, and traces one mother's path back to a hopeful life.

Suddenly her life has changed forever, and Callie's terrified of becoming a mom to the baby she never dreamed of keeping. Even more terrifying are the feelings she's starting to develop for Lucas—feelings that have nothing to do with her hormones...and absolutely everything to do with his scorching kiss!

I was born in Canada in 1940. Pregnancy outside of marriage was a disgrace and young women who found themselves in such situations were whisked away and dumped into convents or hospitals. Babies were taken out of the arms of young mothers, often without their consent and sold to married couples. They were smuggled across the U.S./Canadian Border. Papers were forged or destroyed. They were called "black market babies." I was one of these children. Black Market Baby reveals my life growing up as an adoptee . . . with its inherent sense of rootlessness, abandonment and denial. The writing of this book made my adoption real to me - the shame of unwed mothers, the shame of being different, the shame of being abandoned by my own mother and born of a questionable past. My parents didn't tell me until I was eleven years old, a mistake made by many, and I lived most of my adult life ignoring the fact of my true origins. It wasn't until I was forty-eight that I began to face the truth and start searching. This story exists on many levels: adoption, divorce, politics, mystics and psychics, backpacking into the wilderness to find solace, facing health issues, dealing with three daughters, dropping out of the clichéd housewife existence to living the alternative lifestyle of an artist, which has always been my secret desire. It shows the difficulties of coping with the truth about my life and facing the realities of who I am . . . it is a story of discovery.

Record the first year, from Babys point of view, with space for all the details from homecoming to all Babys firsts and photos. 48 color pages I'd always hoped to have at least one child. My hope died as I passed my 41st birthday but I conceived soon after and gave birth to a beautiful baby. The pregnancy was not aided by fertility treatments (though I had tried Clomid over a year earlier). Was it due to just luck or did I finally get pregnant because of several lifestyle changes I made half a year prior to conceiving? I made some simple but life-altering changes involving nutrition, walking outdoors (for Vitamin D), two short fasts and the practice of two key yoga positions at home. My monthly cycle soon became very regular for the first time in my life, my PMS symptoms disappeared and my wish for a baby came true. The first part of this account is about intimate relationships as I tried to find love and security in my life. The rest is more specifically about how my biological clock went into hyper-mode by age 35, about meeting my husband at 37 and about my three plus years of anxious infertility before conceiving at age forty-one. I hope you will also look into some simple lifestyle changes before (or even during) your trials with fertility treatments. I am so grateful as this really seemed to help me.
