Biochemical kinetics refers to the rate at which a reaction takes place. Kinetic mechanisms have played a major role in defining the metabolic pathways, the mechanistic action of enzymes, and even the processing of genetic material. The Handbook of Biochemical Kinetics provides the "underlying scaffolding" of logic for kinetic approaches to distinguish rival models or mechanisms. The handbook also comments on techniques and their likely limitations and pitfalls, as well as derivations of fundamental rate equations that characterize biochemical processes. Key Features \* Over 750 pages devoted to theory and techniques for studying enzymic and metabolic processes \* Over 1,500 definitions of kinetic and mechanistic terminology, with key references \* Practical advice on experimental design of kinetic experiments \* Extended step-by-step methods for deriving rate equations \* Over 1,000 enzymes, complete with EC numbers, reactions catalyzed, and references to reviews and/or assay methods \* Over 5,000 selected references to kinetic methods appearing in the Methods in Enzymology series \* 72-page Wordfinder that allows the reader to search by keywords \* Summaries of mechanistic studies on key enzymes and protein systems \* Over 250 diagrams, figures, tables, and structures

The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all SUBjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support. L. M. Pitman Bibliography Adams, R. (ed.)
