In the Hugo-award winning, epic New York Times Bestseller and basis for the BBC miniseries, two men change England's history when they bring magic back into the world. In the midst of the Napoleonic Wars in 1806, most people believe magic to have long since disappeared from England - until the reclusive Mr. Norrell reveals his powers and becomes an overnight celebrity. Another practicing magician then emerges: the young and daring Jonathan Strange. He becomes Norrell's pupil, and the two join forces in the war against France. But Strange is increasingly drawn to the wild, most perilous forms of magic, and he soon risks sacrificing his partnership with Norrell and everything else he holds dear. Susanna Clarke's brilliant first novel is an utterly compelling epic tale of nineteenth-century England and the two magicians who, first as teacher and pupil and then as rivals, emerge to change its history.

Buckle up as Douglas Keister takes you for a decidedly retro ride in the world of diminutive travel trailers in *Teardrops and Tiny Trailers*. The demand for vintage trailers--the smaller the better--has risen dramatically in recent years, with the most in-demand trailers being "teardrops," first manufactured in the 1930s and containing just indoor sleeping space and an outdoor exterior kitchen. Also profiled in the book are "canned ham" trailers, whose shape resembles the profile of a can of ham; small-size examples of America's most beloved vintage trailer, the Airstream; miniscule gypsy caravans in Europe; and fiberglass trailers made in Canada. Two hundred color photographs showcase these trailers' sleek exteriors, retro-styled interiors, and, in many cases, the restored classic cars that tow them. *Teardrops and Tiny Trailers* includes a resource section chock-full of places to locate vintage trailers, clubs to join, and rallies to attend. Photographer/writer Douglas Keister has authored thirty-six critically

People who support this movement are happy to live in a downsized home -- their tiny house is a lifestyle that they adopt/adapt and are happy in doing so. While one might argue the disadvantages of living in a tiny space, the financial freedom that it brings along cannot be disregarded. The average size of a house in the United States of America was 1,500 square feet in the 1950's; now, when the family sizes are shrinking, the average house size is 2,400 square feet. The lavish spaces in a 2,400 square foot house lie dormant for most part of the year. One such classic example is the living room, which serves its purpose for a couple of hours during the Christmas season... rest of the time its existence is hardly noticed or acknowledged; ditto for the multiple bathrooms, the huge dining room, bedrooms, and garage parking. The cost one pays for a huge home that is hardly used is hefty -- a mortgage that stretches almost until the end of one's retirement. Add to this the maintenance cost and the carbon footprint of a huge house!
