Anti-black racism avows reason is white while emotion, and thus supposedly unreason, is black. Challenging academic adherence to this notion, Lewis R. Gordon offers a portrait of Martinican-turned-Algerian revolutionary psychiatrist and philosopher Frantz Fanon as an exemplar of "living thought" against forms of reason marked by colonialism and racism. Working from

his own translations of the original French texts, Gordon critically engages everything in Fanon from dialectics, ethics, existentialism, and humanism to philosophical anthropology, phenomenology, and political theory as well as psychiatry and psychoanalysis. Gordon takes into account scholars from across the Global South to address controversies around Fanon's writings on gender and sexuality as well as political violence and the social underclass. In doing so, he confronts the replication of a colonial and racist geography of reason, allowing theorists from the Global South to emerge as interlocutors alongside northern ones in a move that exemplifies what, Gordon argues, Fanon represented in his plea to establish newer and healthier human relationships beyond colonial paradigms.

Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century.

The book is written around parallel text translations of classical Chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist.

Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.
