The inclination towards two wheelers is not newer to the world. From the very beginning, two wheelers are recognized as a mark of triumph, independence and joy. These are considered fast, safe and easy mode of transportation with worthy fuel economy. With the arrival of automation and electronics in two wheelers, the study gained more momentum, which led Two and Three Wheeler Technology to emerge as a new discipline of automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in preparing them for examination by self-assessment method. Primarily designed for the

petrol/gasoline engine as fitted to the Toyota 40, 55

and 60 Series four wheel drive vehicles. This repair

manual has been prepared to provide information

covering general repair for 2F Gasoline engine as

fitted to the TOYOTA LAND CRUISER. Per Toyota

Motor Sales Co., LTD. The Toyota 2F engine was

one of the "F" series of OHV inline-6 cylinder

engines produced by Toyota between 1955-1992.

"F" Series engines are known for their high amount

of torque at low RPM, massive cast iron blocks and

heads and also their high reliability. The 2F Engine

had one of the longest production runs of any Toyota

engine. The "F" Series engines all incorporate

overhead valves actuated by pushrods from a gear

driven camshaft in the lower portion of the engine.

The engine was first introduced in the Toyota FJ40

Land Cruiser, and in many countries, was the only

gasoline engine offered in the Landcruiser until

1993. Although it's commonly badged as the Land

Cruiser engine, it was used in a variety of other large

truck applications as well, such as in fire trucks and

the Toyota FQ15 trucks. It was also used in the

Crown based Japanese Police Patrol Cars FH26 and

FS20-FS50.
