This is a book for those who love adventure and who are driven to explore the earth God has created. The author draws from his own experiences in the world of sports to offer insight into the thoughts and reflections of athletes as they encounter a world of high drama and, at times, unanticipated beauty. While testing his determination and skill in mountain climbing or deep sea diving, for example, the author observes how biblical truths are as applicable in the wilds of nature as they are in a serene church setting on Sunday morning. No matter how extreme our lifestyle, God is there with those who honor him.

All the world's a stage--literally so, given the ubiquitous presence of webcams recording daily life in cities. This footage, allegedly documentary, recreates cities as cinematic environments as people interact with the multitudes of cameras and screens around them. Paula Albuquerque's original research and experimental films, presented in this groundbreaking book, expose fictionalizing elements in archival webcams and explore video surveillance as an urban condition that influences both perceptions of the past and visions of the future.

For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them--slavery, conscription, taxes, corvee labor, epidemics, and warfare. This book, essentially an anarchist history, is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of internal colonialism. This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott's work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.
