Why did the US intelligence services fail so spectacularly to know about the Soviet Union's nuclear capabilities following World War II? As Vince Houghton, historian and curator of the International Spy Museum in Washington, DC, shows us, that disastrous failure came just a few years after the Manhattan Project's intelligence team had penetrated the Third Reich and knew every detail of the Nazi 's plan for an atomic bomb. What changed and what went wrong? Houghton's delightful retelling of this fascinating case of American spy

ineffectiveness in the then new field of scientific intelligence provides us with a new look at the early years of the Cold War. During that time, scientific intelligence quickly grew to become a significant portion of the CIA budget as it struggled to contend with the incredible advance in weapons and other scientific discoveries immediately after World War II. As Houghton shows, the abilities of the Soviet Union's scientists, its research facilities and laboratories, and its educational system became a key consideration for the CIA in assessing the threat level of its most potent foe. Sadly, for the CIA scientific intelligence was extremely difficult to do well. For when the Soviet Union detonated its first atomic bomb in 1949, no one in the American intelligence services saw it coming.

There are many issues in the role of firearms and personal violence (suicide and homicide). Do strict gun control laws have a preventive impact on the use of firearms for personal violence? Does the prevalence of firearm ownership impact the use of firearms for personal violence? Do people perceive the different methods for suicide differently? Are there certain types of people and situations that favor the use of guns for personal violence? Are there possibilities for reducing the role of firearms in personal violence other than reducing their prevalence? What is the experience of other nations (Australia and Canada) in coping with the role of firearms in personal violence? This book will explore the answers to these questions.

These seven precedent-setting case studies taken from the files of the Nevada Gaming Control Board and Commission illustrate vital issues addressed in the first decade of Las Vegas' megaresorts.

Many books cater to the fitness and nutritional needs of the general public. But little of this advice is specifically directed toward those who have the literally life-or-death need to keep alcohol, drug, gambling, sex, internet and other addictions at bay. How exercise and diet speed up the recovery process and promote relapse prevention is a case rarely made, even by most treatment facilities! Rebalancing the Addictive Mind is an evidence-based, accessible guide that explains how and why exercise and diet produce faster physical, psychological and emotional recovery from addiction and significantly reduce the chances of relapse. And how anyone, despite almost any age or infirmity, can benefit from the principles outlined in this book. Author Shelley Poerio, a licensed addiction counselor and certified fitness trainer, describes how substance dependence and behavioral compulsions change the brain and body, provides

guidance and solutions to undo the damage, and motivates change in the recovering individual. Family members gain insight into how to support their loved-one in recovery and better understand how addictive thinking and behaviors get out of control. Counseling and medical professionals will appreciate the cognitive-behavioral, solutions-focused therapeutic approach and the integration of exercise and nutritional concepts with 12-step recovery principles. Ms. Poerio bases her case on the biochemical science of addiction. In the early sections of the book, she examines the anatomy and functions of the brain, and explains the ability of substance and behavioral addictions to exploit brain chemistry and create cravings and dependence. A crucially important aspect of this story, for teenagers and their parents, is that teens are particularly susceptible to developing addictions. Fortunately, the biochemistry of addiction can be turned against itself. Many of us know the positive feelings of well-being that result from working out and eating well. Rebalancing the Addictive Mind reveals in detail why this is just what the doctor ordered to fight addictions. Exercise and diet are uniquely qualified to replace the highs produced by drugs and alcohol, and undo the damage they cause. Aerobic and strength training act as safe substitutes that stimulate the brain's neurotransmitters in much the same way that addictive substances do. Exercise promotes improved brain function and neuronal growth. Proper nutrition prevents the mood swings that can provoke a relapse, and corrects the addiction-caused deficiencies that harm major organs and bodily processes. With a bristling arsenal of therapeutic weapons, exercise and diet use restorative biology to fight the biology of addiction, and empower the brain and body to heal themselves. Ms. Poerio – a former track athlete at Stanford University – draws not only on the latest research, but on her own experience. The plans she outlines combine elements of her workouts with future pro

and Olympic athletes at Stanford, and with young (and old) substance abusers as the counseling/fitness-program developer at the Phoenix House of the Mid-Atlantic in Arlington, Virginia. All of her strategies are easy to put into practice, and set realistic goals. They produce encouraging results for the average person in recovery in part because they are simple to do and likely to be used regularly. Above all, however, *Rebalancing the Addictive Mind* speaks to and motivates its readers on a very personal and understanding level. Ms. Poerio, an alcoholic/addict in recovery since 2001, introduces the book by describing her own substance-induced suicidal ideation that forced her on the road to rehabilitation. Her book includes simple anecdotes – about her work to help her clients and herself – that make it clear she has “been there and done that,” and that anyone armed with her book and the willingness to put in some work can do it too.

The book explains the new new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV-to-DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content, market it, and deliver it to consumers in a competitive, global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations, because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.

The Westside Slugger is the powerful story of civil rights in Las Vegas and Nevada through the eyes and experience of Joe Neal, a history-making state lawmaker in Nevada. education, he joined the United States Air Force and later graduated from Southern University—studying political science and the law at a time of great upheaval in the racial status quo. As part of a group of courageous men, Neal joined a Department of Justice effort to register the first black voters in Madison Parish. When Neal moved to southern Nevada in 1963 he found the Silver State to be every bit as discriminatory as his former Louisiana home. As Neal climbed through the political ranks, he used his position in the state senate to speak on behalf of the powerless for more than thirty years. He took on an array of powerful opponents ranging from the Clark County sheriff to the governor of the state, as well as Nevada's political kingmakers and casino titans. He didn't always succeed—he lost two runs for governor—but he never stopped fighting. His successes included improved rights for convicted felons and greater services for public education, mental health, and the state's libraries. He also played an integral role in improving hotel fire safety in the wake of the deadly MGM Grand fire and preserving the pristine waters of Lake Tahoe, which brought him national attention. Neal lived a life that personified what is right, just, and fair. Pushing through racial and civil rights hurdles and becoming a lifelong advocate for social justice, his dedication and determination are powerful reminders to always fight the good fight and never stop swinging.

A fascinating examination of the world of private investigators by a 21st-century private eye. Today's world is complicated: companies are becoming more powerful than nations, the lines between public and corporate institutions grow murkier, and the internet is shredding our privacy. To combat these onslaughts,

people everywhere -- rich and not so rich, in business and in their personal lives -- are turning away from traditional police, lawyers, and government regulators toward a new champion: the private investigator. As a private investigator, Tyler Maroney has traveled the globe, overseeing sensitive investigations and untying complicated cases for a wide array of clients. In his new book, he shows that it's private eyes who today are being called upon to catch corrupt politicians, track down international embezzlers, and mine reams of data to reveal which CEOs are lying. The tools Maroney and other private investigators use are a mix of the traditional and the cutting edge, from old phone records to computer forensics to solid (and often inspired) street-level investigative work. The most useful assets private investigators have, Maroney has found, are their resourcefulness and their creativity. Each of the investigations Maroney explores in this book highlights an individual case and the people involved in it, and in each account he explains how the transgressors were caught and what lessons can be learned from it. Whether the clients are a Middle Eastern billionaire whose employees stole millions from him, the director of a private equity firm wanting a background check on a potential hire (a known convicted felon), or creditors of a wealthy American investor trying to recoup their money after he fled the country to avoid bankruptcy, all of them hired private investigators to solve problems the
