No.1 bestseller Michael Palin's epic journey from the North Pole to the South Pole. 'The cracked and fissured ice-pack offers no comfortable reassurance - no glimmer of any reward to the traveller who has made his way to the top of the world. The Arctic Ocean, known to the Victorians as the Sea of Ancient Ice, stares balefully back as we descend towards it, reflecting nothing but the question: Why?' Michael Palin's adventure begins when he is enrolled in the Royal and Ancient Polar Bear Society... Travelling by train, truck, raft, Ski-Doo, barge, balloon and bicycle, Michael Palin experiences every extreme the world has to offer. Braving the cold grip of the Arctic Circle, and the swirling snowstorms of Spitsbergen, Palin has to cope with friendly locals, occasional gunfire and his own unruly digestive system before he can finally stand in Scott's shoes at the South Pole, in the Land of the Midnight Sun.

Then make it better. 'I am 94. I've had an extraordinary life. It's only now that I appreciate how extraordinary. As a young man, I felt I was out there in the wild, experiencing the untouched natural world - but it was an illusion. The tragedy of our time has been happening all around us, barely noticeable from day to day - the loss of our planet's wild places, its biodiversity. I have been witness to this decline. A Life on Our Planet is my witness statement, and my vision for the future. It is the story of how we came to make this, our greatest mistake - and how, if we act now, we can yet put it right. We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited.' All we need is the will to do so.'

A biography of the Scottish missionary and runner who won a gold medal in the 1924 Olympics and went on to do missionary work in China.

Through this assessment of creative (climate) communications, readers will understand what works where, when, why and under what conditions.

Space storms, the manifestation of bad weather in space, have a number of physical effects in the near-Earth environment: acceleration of charged particles in space, intensification of electric currents in space and on the ground, impressive aurora displays, and global magnetic disturbances on the Earth's surface. Space weather has been defined as 'conditions on the Sun and in the solar wind, magnetosphere, ionosphere, and atmosphere that can influence the performance and reliability of space- and ground-based technological systems and can endanger human life'. The 19 chapters of this book, written by some of the foremost experts on the topic, present the most recent developments in space storm physics and related technological issues, such as malfunction of satellites, communication and navigation systems, and electric power distribution grids. Readership: researchers, teachers and graduate students in space physics, astronomy, geomagnetism, space technology, electric power and communication technology, and non-specialist physicists and engineers. As recommended in the United Nations Space & Atmospheric Science Education Curriculum booklet. Please find it amongst classics such as T.J.M. Boyd, J.J. Sanderson, J.K. Hargreaves and M.C. Kelly etc.

No. 1 bestseller and superstar doing what he does best, introducing millions of avid readers to little-known peoples and places. Until the early 1990s, when the Berlin Wall came tumbling down, travelling behind the iron curtain was never easy. In undertaking his new journey through Eastern Europe, breathing in its rich history, and exquisite sights and talking to its diverse peoples, Michael fills what has been a void in his own experience and that of very many others. NEW EUROPE is very much a voyage of discovery, from the snows of the Julian Alps to the beauty of the Baltic sea, he finds himself in countries he'd barely heard of, many unfamiliar and mysterious, all with tragic histories and much brighter futures. During his 20-country adventure Palin meets Romanian lumberjacks, drives the 8.58 stopping train from Poznan to Wolsztyn, treads the catwalk at a Budapest fashion show, learns about mine-clearing in Bosnia and watches Turkish gents wrestling in olive oil. As with all his bestselling books, in his uniquely entertaining style, Palin opens up a new and undiscovered world to millions of readers.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on

the future." —Ralph Nader, Consumer Advocate This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. For almost a year, Michael Palin travelled through 18 countries on the perimeter of the world's largest ocean, in a spectacular journey of contrasts, drama and beauty. From head-hunters in Borneo to a meal of maggots in Mexico, his route takes him to some of the most politically volatile and physically demanding places on Earth. Whether climbing the Exalted Mountains in China, dodging icebergs in Chile, or being taken short on the banks of the Amazon, Michael Palin paints a vivid picture of the people and places around him. 'It was a journey of dazzling surprises and jarring extremes. Beauty and ugliness, sophistication and squalor, unceasing urban noise and monastic tranquility ... This is a record of a year of wonder' Michael Palin.

What has happened to George Adamski since he wrote the famous incidents in Flying Saucers Have Landed? Since the memorable November 20, 1952, when he first made personal contact with a man from another world? Since December 13, 1952 when he was able to make photographs within 100 feet of the same saucer that had brought his original visitor? Inside The Space Ships is Adamski's own story of what has happened to him since then. It begins with his first meeting, a few months later, with a second man from another world—his first meeting with one who speaks to him. This second visitor brings him to a Venusian Scout (flying saucer) and this, in turn, brings him to a mother ship. Later he is conveyed in both a Saturnian Scout and a Saturnian mother ship. Adamski tells us what transpires in these space craft and what the men and women from other worlds have told him. Adamski's photographs of flying saucers, originally published in Flying Saucers Have Landed, have since become world-famous as other witnesses in other parts of the world have succeeded in taking photographs identical with his. Now, however, in Inside The Space Ships, Adamski gives us 16 photographs and illustrations, no longer of Scouts (flying saucers) mostly, but of the great space ships from which they are launched. The main group of these photographs was taken in April, 1955, and neither the photographs nor a description of them has ever been published before.

This revised textbook provides students with a first exposure to the growing field of medical anthropology. The narrative is guided by unifying themes. First, medical anthropology is actively engaged in helping to address pressing health problems around the globe through research, intervention, and policy-related initiatives. Second, illness and disease cannot be fully understood or effectively addressed by treating them solely as biological in nature; rather, health problems involve complex biosocial processes and resolving them requires attention to range of factors including systems of belief, structures of social relationship, and environmental conditions. Third, through an examination of health inequalities on the one hand and environmental degradation and environment-related illness on the other, the book underlines the need for going beyond cultural or even ecological models of health toward a comprehensive medical anthropology. The authors show that a medical anthropology that integrates biological, cultural, and social factors to truly understand the origin of ill health will contribute to more effective and equitable health care systems.

Bible Women All Their Words and Why They Matter Lindsay Hardin Freeman Women of the Bible have been trapped in dry and dusty literary caskets for centuries. While a few women, such as Mary, Sarah, Elizabeth, and Mary Magdalene, are familiar, many of the women who speak in the Bible have long been ignored. Yet their words are part of God's Word, the Bible, for a reason. Through these women, God spoke, intervened, changed, illustrated, and proclaimed the story of redemption. In this groundbreaking book, Episcopal priest Lindsay Hardin Freeman identifies every woman who speaks in the Bible, providing their words, context, and historical background. We learn which women speak the most (hint: it's not Mary) and which books of the Bible have the fewest words from women. We hear the only conversation in the Bible between a mother and daughter (and it's not pretty), the words of a woman who eats her own child, and the triumphant exclamation of a woman telling the world about the risen Christ. Questions at the end of each chapter encourage individual or small-group reflection about what we might learn from each of these women and how God is speaking through them to us. Step into God's sacred circle of mothers, grandmothers, warriors, prophets, prostitutes, and murderers. You won't come out the same.

Do you feel like you've been missing out on the abundant life? Most people do. If you take a look at the life of Jesus, you see that he called his disciples to follow him - on a physical journey, not just a spiritual one. Hundreds of books talk about our faith walk as a journey. But few delve into the subject of how a physical journey can reinvent and revitalize our spiritual journey with God. Kingdom Journeys is about the journeys we all take, presented in a series of "initiation steps" by disciples who are taking serious the call to leave everything and simply "go." This book is an exploration of an ancient spiritual discipline we must recover - if we're going to truly follow Jesus.
