This volume presents two works elaborating a general theory of words and their structure written by René de Saussure, younger brother of Ferdinand de Saussure. Although originating in René de Saussure's concerns for the structure of Esperanto, these essays are clearly intended to articulate a general account of word formation in natural language. They appear here in the French original with facing English translations, accompanied by some remarks on René de Saussure's life and followed by essays on the Esperantist background of his analysis (by Marc van Oostendorp), the contemporary relevance of his morphological theory (by Stephen Anderson), and the semantic theory of words underlying his analysis (by Louis de Saussure). These two works have remained essentially unknown to the community of scholars in general linguistics since their publication in 1911 and 1919, respectively, although Esperantists have been aware of them. They develop in quite explicit form a theory of what would later be called morphemic analysis, based primarily on data from French (with some material from German and English, as well as occasional examples from other Indo-European languages). In its fundamental aspect, René's view of word formation differed significantly from that of his brother, who saw the structure of complex words as revealed not through their decomposition into smaller "atomic" units but rather in the relations between words, relations which could be presented in analogical form and which anticipate rule-based theories of morphological structure. The contrast between the two brothers' views thus anticipates basic issues in current theorizing about word structure.

This volume presents a selection of – slightly revised versions – of papers from the third International Conference on the History of the Language Sciences (ICHoLS III), Princeton, 1984. The papers are organized under the following headings: I Generalia; II Classical Period; III Medieval Period; IV Renaissance; V 17th Century; VI 18th Century; VII 19th Century, and VIII 20th Century. Contributors include W. Keith Percival, Aron Dotan, Michael G. Carter, Kees Versteegh, Brian Ó Cuív, Francis P. Dinneen, Manuel Bрева-Claramonte, Douglas A. Kibbee, Joseph L. Subbiondo, Rüdiger Schreyer, Marc Wilmet, Robert H. Robins, Jean Rousseau, Ramón Sarmiento, Edward Stankiewicz, Irmengard Rauch, Talbot J. Taylor, Julie Andresen, and many others.

This work is for comparative linguists and Celticists who are keen to study Breton but may be too daunted to undertake such a venture by the wide variety of orthographical conventions which exist within the language. It discusses points of orthographical contention so that their correlation to the spoken varieties of Breton can be judged by the reader.

Peuple latin, devenu, à partir du VI<sup>e</sup> siècle après J.-C., une " île de latinité entourée d'une mer slave ", les Roumains, après avoir survécu à la " terreur de l'Histoire et de la Géographie ", cherchent, depuis quelques siècles déjà, à se réintégrer dans l'Europe, où ils ont choisi les Français comme modèle. L'espace carpatique-danubien-pontique, leur espace, s'est avéré être le berceau de l'aïeul de l'homo europeus, ainsi que le lieu d'origine de l'écriture de Tartaria, la plus ancienne d'Europe, du Penseur de Hamangia et de l'idée d'" ère chrétienne " (Dionisie de Constantza). De très grands esprits sont issus de la culture roumaine, parmi lesquels beaucoup ont été adoptés par les Français : Enesco, Brancuși, Istrati, Eliade, Cioran, Ionesco, etc. Les surnoms de Petite France

This six-volume collection draws together the most significant contributions to morphological theory and analysis which all serious students of morphology should be aware of. By comparing the stances taken by the different schools about the important issues, the reader will be able to judge the merits of each, with the benefit of evidence rather than prejudice.

A French grammar of modern Eastern Armenian.

Cet ouvrage – qui couvre la période de l'enfance à l'âge adulte – propose une synthèse des recherches actuelles sur les dyslexies-dysorthographies. Il aborde également les conséquences scolaires et psychoaffectives de ces troubles. Unique en son genre, il présente des sujets peu abordés dans les écrits, mais essentiels à une bonne compréhension de ces troubles d'apprentissage de la lecture et de l'orthographe qui peuvent entraîner de faibles compétences en langage écrit. Une clientèle en émergence, soit celle des étudiants universitaires, est de plus en plus touchée par cette réalité, et un chapitre lui est entièrement consacré.

The papers in this volume derive from the 4th International Hamito-Semitic Congress, held in Marburg in 1983. The papers deal with the (morpho)phonology or syntax of individual languages or language (sub)families, and many have a diachronic angle.

This volume publishes the papers given by invitation at the fifteenth Congress of the International Organization for the Study of the Old Testament, which was held at Cambridge in July 1995, under the Presidency of J.A. Emerton. The articles cover a wide range of subjects relevant to the study of the Old Testament, and reflect the ongoing debate on a variety of themes among the world's leading contemporary Old Testament scholars.

This volume presents the main lectures given at the XVIIIth Congress of the International Organization for the Study of the Old Testament (Leiden, August 2004). They are representative of the main trends and progress of current biblical research.
