This brand-new principles of economics text is the most exciting new entry in years. Written by well-known and well-respected economists, Bob Frank, Ben Bernanke, Lars Osberg (Dalhousie University), Melvin Cross (Dalhousie University) and Brian MacLean (Laurentian University) the text seeks to teach introductory students the core economic concepts--the essence of economics-- without overwhelming them with details. A well-articulated short list of core principles is introduced and reinforced by illustrating and applying each principle in several contexts, and then asking students to work exercises to see what they have learned. The text seeks to create "Economic Naturalists"; that is, after reading the text, students will ask (and answer) questions about their economic environment. For example, students will see Braille dots on drive-up ATMs and ask why they are there. Peppered with such thought-provoking examples, Frank/Bernanke not only engage students, but teaches them to see each feature of their economic landscape as the reflection of an implicit or explicit cost-benefit calculation.

Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses. Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. This analytical style, while not ultimately more demanding than the styles of thinking in other disciplines, feels unfamiliar to most students and requires practice. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.

The COVID-19 pandemic has produced levels of unemployment not seen since the Great Depression and has created dramatic changes in the ways we teach across educational institutions at every level. These developments have reinforced our confidence in the instructional philosophy that motivated us to produce our first edition"--
