beginning. Students will learn to speak like a competent, caring nurse and communicate effectively and compassionately with their patients. A unique chart outlines what nurses might be thinking, feeling, and perceiving during encounters with patients, enabling nurses to facilitate more useful discussions and understand their own feelings. Mental health and psychiatric disorders are presented in terms of how they impact Five Domains of Wellness rather than as isolated conditions. Based on the idea that mental health patients do get better, this text offers a human, holistic way to care for patients.

Acclaimed as the most clearly written text on the subject, this title offers nursing issues, theoretical concepts, and perspectives on various disorders and therapies not found in other texts. Topics ranging from nursing ethics and cultural considerations to care plans for the ageing and HIV-infected patient are thoughtfully covered. Treatment modalities for psychotic, sleep, anxiety, and gender identity disorders are fully addressed.

Introducing Mental Health Nursing offers a systematic overview of both the science and the art of caring for people experiencing mental health problems. It addresses the attitudes, knowledge and skills required to provide care for service users across all health-care settings, from specialist mental health services to general hospitals and community care. The authors place the service user at the centre of all aspects of mental health care and emphasise the importance of the therapeutic relationship as the cornerstone of good mental health nursing practice. Emphasis is placed on the role of the nurse as an intrinsic member of the mental health team, and nurses are encouraged to think critically about the perspectives that they bring to their practice. The second edition has been fully revised and updated, with increased focus on Indigenous social and emotional well-being, as well as two new chapters on Recovery and Cultural Safety. A must-have book for undergraduate nursing students, new graduates and professionals changing specialties or simply wishing to refresh their mental health nursing knowledge.
