Leonard Livingstone, the reluctant proprietor of a detoxification spa in Logy Bay Newfoundland, hosts German clients, world renown water enthusiasts. His son, Bud, is putting together a summer season of theatre, sponsored by local businesses. Unknown to Leonard and Bud, the German water enthusiasts are the center of an environmental uprising in Indonesia, managed out of Uruguay, watched by local police forces. The collection of narratives is assembled after the main event in the story, and include tales of the riches of Treasure Island and its connection to St. John's Newfoundland, the oldest city in North America, and Britain's first colony. The theft of the Irish Crown Jewels, and the discovery of an ancient Anglo-Saxon burial site are recounted. A comedic take on historical and science fiction, *Troubles in the Colony* explores the stories of Newfoundland.

From Randy Wayne White, the New York Times bestselling author of the Doc Ford series for adults, comes *Fins*, a high-stakes, masterfully plotted story of courage, friendship...and sharks! The world's shark population is in trouble for a sad, simple reason: shark fin soup. And although it's illegal, poachers have been targeting Florida's biannual migration of blacktip sharks. Marine biologist Doc Ford needs some assistance protecting the sharks and enlists the help of three kids—Luke, Maribel and Sabina. Luke is brand-new to Florida from the Midwest; sisters Maribel and Sabina have only recently arrived from Cuba—and all three feel like fish out of water. It's going to take some convincing for them to work as a team and to recognize in themselves the courage, wisdom and tenacity that Doc sees in them. Together they form Sharks, Inc. and are given an important assignment: to set out each day on their small fishing boat in hopes of tagging sharks for Doc's research—and to stay away—far away—from any possible poachers in the area. The trio certainly isn't looking for trouble, but when they come face to face with danger, survival requires them to rely on each of their own unique gifts, and especially on one another.

Once hunted by whalers and now the darling of ecotourists, the gray whale has become part of the culture, history, politics, and geography of Mexico's most isolated region. After the harvesting of gray whales was banned by international law in 1946, their populations rebounded; but while they are no longer hunted for their oil, these creatures are now chased up and down the lagoons of southern Baja California by whalewatchers. This book uses the biology and politics associated with gray whales in Mexican waters to present an unusual case study in conservation and politics. It provides an inside look at how gray whale conservation decisions are made in Mexico City and examines how those policies and programs are carried out in the calving grounds of San Ignacio Lagoon and Magdalena Bay, where catering to ecotourists is now an integral part of the local economy. More than a study of conservation politics, Dedina's book puts a human face on wildlife conservation. The author lived for two years with residents of Baja communities to understand their attitudes about wildlife conservation and Mexican politics, and he accompanied many in daily activities to show the extent to which the local economy depends on whalewatching. "It is ironic," observes Dedina, "that residents of some of the most isolated fishing villages in North America are helping to redefine our relationship with wild animals. Americans and Europeans brought the gray whale population to the brink of extinction. The inhabitants of San Ignacio Lagoon and Magdalena Bay are helping us to celebrate the whales' survival." By showing us how these animals have helped shape the lifeways of the people with whom they share the lagoons, *Saving the Gray Whale* demonstrates that gray whales represent both a destructive past and a future with hope.

Niel Black, a Scot from Argyllshire, arrived in Melbourne in September intending to make his fortune. Ambitious and determined, Black became one of the most successful and energetic squatters in the Western District of Victoria – a livestock breeder and a Member of the Legislative Council. He was also a correspondent extraordinaire, and his letters to family, fellow pastoralists, colonial officials, and his chief UK business partner, Thomas Steuart Gladstone (and first cousin of the British prime minister), offer a unique insight into the time. Black's letters and journals, now held at the State Library Victoria, are the inspiration for this revelatory book written by his great-granddaughter. Battles with local Aboriginal people, other settlers, Commissioners of Crown Lands and bush-fires, along with droughts, family feuds, multiple trips back to Scotland to find a wife and Black's rise to gentrified excess are all vividly brought to life. 'In this vivid, fast-moving book Niel Black comes to life' – Geoffrey Blainey

In *Mapping Abundance for a Planetary Future*, Candace Fujikane contends that the practice of mapping abundance is a radical act in the face of settler capital's fear of an abundance that feeds. Cartographies of capital enable the seizure of abundant lands by enclosing "wastelands" claimed to be underdeveloped. By contrast, Kanaka Maoli (Native Hawaiian) cartographies map the continuities of abundant worlds. Vital to restoration movements is the art of kilo, intergenerational observation of elemental forms encoded in storied histories, chants, and songs. As a participant in these movements, Fujikane maps the ecological lessons of these elemental forms: reptilian deities who protect the waterways, sharks who swim into the mountains, the navigator Mui who fishes up the islands, the deities of snow and mists on Mauna Kea. The laws of these elements are now being violated by toxic waste dumping, leaking military jet fuel tanks, and astronomical-industrial complexes. As Kanaka Maoli and their allies stand as land and water protectors, Fujikane calls for a profound attunement to the elemental forms in order to transform climate events into renewed possibilities for planetary abundance.

Selected as a Top Ten Book of the Year by The Washington Post: the newly discovered last novel by the author of The Three Musketeers. Rousing, big, spirited, its action sweeping across oceans and continents, its hero gloriously indomitable, the last novel of Alexandre Dumas—lost for 125 years in the archives of the National Library in Paris—completes the oeuvre that Dumas imagined at the outset of his literary career. Indeed, the story of France from the Renaissance to the nineteenth century, as Dumas vibrantly retold it in his numerous enormously popular novels, has long been absent one vital, richly historical era: the Age of Napoleon. But no longer. Now, dynamically, in a tale of family honor and undying vengeance, of high adventure and heroic derring-do, The Last Cavalier fills that gap.

25th Anniversary Edition "A magnificent treasure for all cultures and all time." --St. Petersburg Times It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leónidas Trujillo’s dictatorship. It doesn’t have to. Everybody knows of Las Mariposas--the Butterflies. In this extraordinary novel, the voices of all four sisters--Minerva, Patria, María Teresa, and the survivor, Dedé--speak across the decades to tell their own stories, from secret crushes to gunrunning, and to describe the everyday horrors of life under Trujillo’s rule. Through the art and magic of Julia Alvarez’s imagination, the martyred Butterflies live again in this novel of courage and love, and the human costs of political oppression. Julia Alvarez’s new novel, *Afterlife*, is available now.
