Power: Police Officer Wellness, Ethics, and Resilience collectively presents the numerous psychic wounds experienced by peace officers in the line of duty, including compassion fatigue, moral injury, PTSD, operational stress injury, organizational and operational stress, and loss. Authors describe the negative repercussions of these psychic wounds in law enforcement decision-making, job performance, job satisfaction, and families. The book encompasses evidence-based strategies to assist law enforcement agencies in developing policy programs to promote wellness for their personnel. The evidence-based techniques presented allow officers to get a more tangible and better understanding of the techniques so that they apply those techniques when on and off-duty. With forewords authored by Dr. John Violanti (Distinguished Police Research Professor) and Dr. Tracie Keese, Vice President of the Center of Policing Equity, this book is an excellent resource for police professionals, police wellness coordinators, early career researchers, mental health professionals who provide services to law enforcement officers and their families, and graduate students in psychology, forensic psychology, and criminal justice. Platinum Award Winner 2019, Homeland Security Awards - American Security Today Provides reader with evidence-based strategies to promote officer wellness Covers compassion fatigue, moral injury, PTSD, operational stress, and more Written by established scholars and professionals from a law enforcement context

Many methods for analyzing clustered data exist, all with advantages and limitations in particular applications. Compiled from the contributions of leading specialists in the field, Topics in Modelling of Clustered Data describes the tools and techniques for modelling the clustered data often encountered in medical, biological, environmental, and social science studies. It focuses on providing a comprehensive treatment of marginal, conditional, and random effects models using, among others, likelihood, pseudo-likelihood, and generalized estimating equations methods. The authors motivate and illustrate all aspects of these models in a variety of real applications. They discuss several variations and extensions, including individual-level covariates and combined continuous and discrete outcomes. Flexible modelling with fractional and local polynomials, omnibus lack-of-fit tests, robustification against misspecification, exact, and bootstrap inferential procedures all receive extensive treatment. The applications discussed center primarily, but not exclusively, on developmental toxicity, which leads naturally to discussion of other methodologies, including risk assessment and dose-response modelling. Clearly written, Topics in Modelling of Clustered Data offers a practical, easily accessible survey of important modelling issues. Overview models give structure to a multitude of approaches, figures help readers visualize model characteristics, and a generous use of examples illustrates all aspects of the modelling process.

Complete First Certificate is a new course for the 2008 revised FCE exam. Informed by the Cambridge Learner Corpus and providing a complete FCE exam paper specially prepared for publication by Cambridge ESOL, it is the most authentic exam preparation course available. Complete First Certificate combines the very best in contemporary classroom practice with first-hand knowledge of the challenges students face. There are exercises to help students avoid repeating the typical mistakes that real FCE candidates make, as revealed by the Cambridge Learner Corpus. This topic-based course covers every part of the FCE exam in detail, ensuring that students are fully equipped to tackle each part of every paper. In addition, the accompanying free CD-ROM enables students to focus on their own particular areas of difficulty and work at their own pace. There is a Student's Book with answers and CD-ROM edition so students can study on their own or in class. The Teacher's Book offers plenty of time-saving consolidation and extension material, including photocopyable resources such as tests and activities.

Think Like Leonardo da Vinci, Albert Einstein, & Charles Darwin Great geniuses before us have uncovered certain key principles on their path to greatness. You can learn those principles now, without all of the sweat, tears, and costly mistakes. Imagine that you could tap into the minds of many great geniuses. Think how they could help you solve challenging problems, broaden your mental horizons, and avoid common pitfalls. They actually can, if we study the principles that they lived by, and incorporate them into our lives. Internationally bestselling author I. C. Robledo has identified the principles that the most brilliant people in history have used to make great accomplishments. Inside, you will discover: - (#13) Why you should always have questions - (#15) The importance of listening to people with different perspectives... even when you disagree with them - (#19) How to avoid restricting your genius potential - (#27) That we all have false ways of viewing the world - (#37) How to observe patterns, and the anomalies that do not fit the pattern - 40 Total principles inside! Tap into the greatest minds of all time and use their principles in your life, with The Intellectual Toolkit of Geniuses. Set around 12 German-speaking people and the worlds they live in, WELTEN focuses on the development of communicative competence and literacy through texts in various modalities. WELTEN helps students to acquire and practice functional language abilities while at the same time developing interpretive and analytical competencies and an appreciation of the aesthetic qualities of language. Through current, relevant, and meaningful materials, students learn to use language while seeing the world through the eyes of others, ultimately learning about themselves and the world they live in. With its innovative and integral video program, its contextualized and learner-centered presentation of grammar, and its unique selection of engaging texts from a broad range of genres, WELTEN brings a new approach to introductory German. Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Diese Einführung in die Besonderheiten des bilingualen Unterrichts präsentiert das Sachfach Politik und Wirtschaft. Im Kontinuum von fachlicher Instruktion und Sprachentwicklung findet sich eine Vielfalt von Textsorten, Projekten und authentischen Aufgaben (task-based). Die praxisorientierten Unterrichtseinheiten sind nach unterschiedlichen sprachlichen Anforderungen gestaffelt und auf die Kompetenzskalen A2 bis C1 des Gemeinsamen Europäischen Referenzrahmens für Sprachen bezogen. Sie sind für den bilingualen Zweig in Mittelschulen und Gymnasien geeignet, aber auch für einzelne Jahrgangsstufen verwendbar. Sie können für die eigene Unterrichtspraxis adaptiert werden, mit dem Ziel durch eigene Recherchen authentische CLIL-Aufgaben weiterzuentwickeln.

A smart, funny, poignant, very modern autobiographical coming-of-age novel, written when the author was sixteen years old. Like *Catcher in the Rye*, *Crazy* appeals to the teenager in us all. Benni himself is partially paralyzed and a serial failure (he's been kicked out of four boarding schools in his short life and has just entered his fifth). So he's a little odd, but he's cool and he finds other strange boys to hang with. Together they set out to experience what they can: girls, booze, sex, philosophy, drugs, sex, books, music, sex—pretty much everything whatever. And Benni lets us in on "the crazy life" he figures is the only way to deal with the crazy world.

Prophecy is one of the ways humans have believed to become conversant with what is believed to be superhuman knowledge. The prophetic process of communication involves the prophet, her/his audience, and the deity from whom the message allegedly comes from. Martti Nissinen introduces a wealth of ancient sources documenting the prophetic phenomenon around the ancient Eastern Mediterranean, whether cuneiform tablets from Mesopotamia, the Hebrew Bible, Greek inscriptions, or ancient historians. Nissinen provides an up-to-date presentation of textual sources, the number of which has increased substantially in recent times. In addition, the study includes four analytical comparative chapters. The first demonstrates the altered state of consciousness to be one of the central characteristics of the prophets' public behavior. The second discusses the prophets' affiliation with temples, which are the typical venues of the prophetic performance. The third delves into the relationship between prophets and kings, which can be both critical and supportive. The fourth shows gender-inclusiveness to be one of the peculiar features of the prophetic agency, which could be executed by women, men, and genderless persons as well. The ways prophetic divination manifests itself in ancient sources depend not only on the socio-religious position of the prophets in a given society, but also on the genre and purpose of the sources. Nissinen contends that, even though the view of the ancient prophetic landscape is restricted by the fragmentary and secondary nature of the sources, it is possible to reconstruct essential features of prophetic divination at the socio-religious roots of the Western civilization.

In two places in the First Gospel (Matt 10:5b-6; 15:24) the Messianic mission of Jesus and his disciples is limited to a group called 'the lost sheep of the house of Israel'. In light of Matthew's intense interest in Jesus' Davidic Messiahship and the Jewish Shepard-King traditions surrounding King David it is argued that the 'lost sheep of the house of Israel' refers to remnants of the former northern kingdom of Israel who continued to reside in the northern region of the ideal Land of Israel.
