

Suamsung Duos Lite User Guide

This is the HARDBACK version. Buck Rogers in the 25th Century (1979-1981) premiered on American television in September 1979. The story followed a twentieth century astronaut revived after 500 years of suspended animation to become Earth's greatest hero. Created by Glen A. Larson and Leslie Stevens, the new series starred Gil Gerard, Erin Gray, and Felix Silla. Gerard looked to the past to prepare for his future production. As Executive Producer of another science fiction series, Battlestar Galactica (1978-1979), the early cancellation of the failed series left him with a quasar of props, costumes, sets, special effects film footage, and even a rejected model spacecraft designed by Ralph McQuarrie. He hit on the idea of recycling the artifacts into a less showy series that premiered to the delight of audiences. Viewers thrilled to a seemingly endless parade of notable guest stars, such as Henry Silva, Joseph Wiseman, Jack Palance, Roddy McDowall, John P. Ryan, Richard Lynch, Cesar Romero, Frank Gorshin, Julie Newmar, Jamie Lee Curtis, Vera Miles, Sam Jaffe, William Smith, Sid Haig, Jerry Orbach, Richard Moll, Ray Walston, Gary Coleman, Amanda Wyss, and Mary Woronov. Join Buck and the galaxy's most beautiful women in a richly researched work that soars at light speed beyond other Buck Rogers books with: Foreword by actress Erin Gray A complete episode guide Interviews with the full regular cast and crew Actors that portrayed characters such as The Space Vampire, The War Witch, and The Satyr tell all about working on the series. Discover a never before explored nebula of back stories: How a nervous film student with no credits wound up directing an episode Which future US President was a friend of Gil Gerard and hosted the premiere Which Buck Rogers guest star was murdered and immediately played in a TV movie by another BUCK ROGERS guest? Why Buck Rogers went to war with his own show's writers Which Buck Rogers guest became a director and discovered Julia Roberts Why Dr. Theopolis and nuclear hellhole Anarchia were cut from the show How Sid Haig appeared in four episodes, even though he died in the first two Patrick Jankiewicz is the author of You Wouldn't Like Me When I'm Angry: A Hulk Companion, and Just When You Thought It Was Safe: A Jaws Companion"

Since 1973, TEXAS MONTHLY has chronicled life in contemporary Texas, reporting on vital issues such as politics, the environment, industry, and education. As a leisure guide, TEXAS MONTHLY continues to be the indispensable authority on the Texas scene, covering music, the arts, travel, restaurants, museums, and cultural events with its insightful recommendations.

A riveting, panoramic look at “homegrown” Islamist terrorism from 9/11 to the present Since 9/11, more than three hundred Americans—born and raised in Minnesota, Alabama, New Jersey, and elsewhere—have been indicted or convicted of terrorism charges. Some have taken the fight abroad: an American was among those who planned the attacks in Mumbai, and more than eighty U.S. citizens have been charged with ISIS-related crimes. Others have acted on American soil, as with the attacks at Fort Hood, the Boston Marathon, and in San Bernardino. What motivates them, how are they trained, and what do we sacrifice in our efforts to track them? Paced like a detective story, United States of Jihad tells the entwined stories of the key actors on the American front. Among the perpetrators are Anwar al-Awlaki, the New Mexico-born radical cleric who became the first American citizen killed by a CIA drone and who mentored the Charlie Hebdo shooters; Samir Khan, whose Inspire webzine has rallied terrorists around the world, including the Tsarnaev brothers; and Omar Hammami, an Alabama native and hip hop fan who became a fixture in al Shabaab’s propaganda videos until fatally displeasing his superiors. Drawing on his extensive network of intelligence contacts, from the National Counterterrorism Center and the FBI to the NYPD, Peter Bergen also offers an inside look at the controversial tactics of the agencies tracking potential terrorists—from infiltrating mosques to massive surveillance; at the bias experienced by innocent observant Muslims at the hands of law enforcement; at the critics and defenders of U.S. policies on terrorism; and at how social media has revolutionized terrorism. Lucid and rigorously researched, United States of Jihad is an essential new analysis of the Americans who have embraced militant Islam both here and abroad. — Washington Post, Notable Non-Fiction Books in 2016

Why stick with plain old A, B, C when you can have Amelia (Earhart), Malala, Tina (Turner), Ruth (Bader Ginsburg), all the way to eXtraordinary You—and the Zillion of adventures you will go on? Instagram superstar Eva Chen, author of Juno Valentine and the Magical Shoes, is back with an alphabet board book depicting feminist icons in A Is for Awesome: 23 Iconic Women Who Changed the World, featuring spirited illustrations by Derek Desierto.

Connect to Google Maps. Use geolocation and turn-by-turn drive directions to find your way. Stay fit with S Health. Use this built-in app to keep track of fitness goals, walking, heart rate, blood pressure, and more.

This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services,

customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

A NATIONAL BESTSELLER This beloved memoir "is an extraordinary, honest, nuanced and compassionate look at adoption, race in America and families in general" (Jasmine Guillory, *Code Switch*, NPR) What does it mean to lose your roots—within your culture, within your family—and what happens when you find them? Nicole Chung was born severely premature, placed for adoption by her Korean parents, and raised by a white family in a sheltered Oregon town. From childhood, she heard the story of her adoption as a comforting, prepackaged myth. She believed that her biological parents had made the ultimate sacrifice in the hope of giving her a better life, that forever feeling slightly out of place was her fate as a transracial adoptee. But as Nicole grew up—facing prejudice her adoptive family couldn't see, finding her identity as an Asian American and as a writer, becoming ever more curious about where she came from—she wondered if the story she'd been told was the whole truth. With warmth, candor, and startling insight, Nicole Chung tells of her search for the people who gave her up, which coincided with the birth of her own child. *All You Can Ever Know* is a profound, moving chronicle of surprising connections and the repercussions of unearthing painful family secrets—vital reading for anyone who has ever struggled to figure out where they belong.

Two friends have disappeared playing *Starfighter Training Academy*. No one cares because it's just a game. Right? I know something is wrong. Messed up. Completely off. And no one is paying attention. My BFFs went missing after beating the hottest new multi-player game on the planet, *Starfighter Training Academy*. They won. They celebrated. They vanished. So what's the girl left behind supposed to do? Beat the damn game, that's what. Find out the truth, even if that includes being recruited to fight in an alien war, lusting after the hottest alien I've ever seen, and marching into a battle there's little chance of winning. I will find my friends. I will learn what the heck is going on. And I will kiss the alien hunk I've been staring at for weeks. Watch me. **If you love romance in the style of Nalini Singh, Christine Feehan, J.R. Ward, Lara Adrian, S. E. Smith, and out-of-this-world outer space adventures like *The Expanse*, *Star Trek*, *Star Wars* and *Stargate*, be sure to read USAT Bestselling Author Grace Goodwin's exciting science fiction and paranormal book series! Wanted: Dating coach to help hot nerd win back the woman of his dreams... Picture this - I'm ready to win back the love of my life, and I'm going big this time. We're talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win

you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. *Unzipped is a standalone spinoff in the Lucky in Love series of standalones*

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This volume originates from the proceedings of a multidisciplinary conference, Techno-Societal 2016 in Maharashtra, India, that brings together faculty members of various engineering colleges to solve Indian regional relevant problems under the guidance of eminent researchers from various reputed organizations. The focus is on technologies that help develop and improve society, in particular on issues such as the betterment of differently abled people, environment impact, livelihood, rural employment, agriculture, healthcare, energy, transport, sanitation, water, education. This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region. On the other hand, technologies proposed by expert researchers may find applications in different regions. This back and forth process for local-global interaction will help in solving local problems by global approach and help in solving global problems by improving local conditions.

Amateur astronomers of all skill levels are always contemplating their next telescope, and this book points the way to the most suitable instruments. Similarly, those who are buying their first telescopes – and these days not necessarily a low-cost one – will be able to compare and contrast different types and manufacturers. This exciting and revised new guide provides an extensive overview of binoculars and telescopes. It includes detailed up-to-date information on sources, selection and use of virtually every major type, brand, and model on today's market, a truly invaluable treasure-trove of information and helpful advice for all amateur astronomers. Originally written in 2006, much of the first edition is inevitably now out of date, as equipment advances and manufacturers come and go. This second edition not only updates all the existing sections of "A Buyer's and User's Guide to Astronomical Telescopes and Binoculars" but adds two new ones: Astro-imaging and Professional-Amateur collaboration. Thanks to the rapid and amazing developments that have been made in digital cameras – not those specialist cool-chip astronomical cameras, not even DSLRs, but regular general-purpose vacation cameras – it is easily possible to image all sorts of astronomical objects and fields. Technical developments, including the Internet, have also made it possible for amateur astronomers to make a real contribution to science by working with professionals. Selecting the right device for a variety of purposes can be an overwhelming task in a market crowded with observing options, but this comprehensive guide clarifies the process. Anyone planning to purchase binoculars or telescopes for astronomy – whether as a first instrument or as an upgrade to the next level – will find this book a treasure-trove of information and advice. It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase.

Research on human beings saves countless lives, but has at times harmed the participants. To what degree then should government regulate science, and how? The horrors of Nazi concentration camp experiments and the egregious Tuskegee syphilis study led the US government, in 1974, to establish Research Ethics Committees, known as Institutional Review Boards (IRBs) to oversee research on humans. The US now has over 4,000 IRBs, which examine yearly tens of billions of dollars of research -- all studies on people involving diseases, from cancer to autism, and behavior. Yet ethical violations persist. At the same time, critics have increasingly attacked these committees for delaying or blocking important studies. Partly, science is changing, and the current system has not kept up. Since the regulations were first conceived 40 years ago, research has burgeoned 30-fold. Studies often now include not a single university, but multiple institutions, and 40 separate IRBs thus need to approve a single project. One committee might approve a study quickly, while others require major changes, altering the scientific design, and making the comparison of data between sites difficult. Crucial dilemmas thus emerge of whether the current system should be changed, and if so, how. Yet we must first understand the status quo to know how to improve it. Unfortunately, these committees operate behind closed doors, and have received relatively little in-depth investigation. Robert Klitzman thus interviewed 45 IRB leaders and members about how they make decisions. What he heard consistently surprised him. This book reveals what Klitzman learned, providing rare glimpses into the conflicts and complexities these individuals face, defining science, assessing possible future risks and benefits of studies, and deciding how much to trust researchers -- illuminating, more broadly, how we view and interpret ethics in our lives today, and perceive and use power. These committees reflect many of the most vital tensions of our time - concerning science and human values, individual freedom, government control, and industry greed. Ultimately, as patients, scientists, or subjects, the decisions of these men and women affect us all.
