The Life and Times of Albert Capo reveals the social, economic, and cultural atmosphere that existed during the latter two-thirds of the twentieth century. the immigrant population that lived through the Great Depression of the 1930s faced many challenges, the least of which was learning a new language as they slowly integrated themselves into American society. Most boys Albert's age did not encounter the peculiar situations or problems that confronted Albert. the streets of New York were Albert's playground during his formative years, as it was for most boys living in ethnic conclaves throughout the city. Living through the Depression and prewar years gave Albert a unique perspective on the rapid change in American society. the American landscape looked quite different prior to the nineteenth century; there were no electric illumination of homes, no telephones, radios, TVs, automobiles, or central heating of homes. the importance of the twentieth century cannot be overestimated. the folks who lived through the twentieth century witnessed more technological advancements, inventions, and discoveries than the entire past history of mankind. Along with scientific discoveries was the fight for civil rights for women as well as minorities, two world wars, the development of nuclear energy and the atomic bomb, the Korean and Vietnam wars, and the conquest of outer space by landing a man on the moon. It would take many volumes to describe that which has advanced the cause of civilization during the past one hundred years; and it would stagger the imagination to ponder the vicissitudes of technology for the next one hundred years and mdash;if we don't destroy ourselves in the process.

Having grown up under the threat of the Cuban Missile Crisis and annihilation through nuclear war, the author set out on a lifelong journey to discover why a nearly godly race known as human beings seems doomed to destroy the world. To solve this great dilemma, he tried to find a new way of living that he calls splendor. He pursued this elusive quality, like many of his time, through knowledge, adventure, spirituality, success and love. (And, of course, through sex, drugs and Rock 'n Roll). His quest would take him from the terror of death in the Grand Tetons to the wonder of life in the birth of his daughters to writing visionary fiction in celebration of both. Along the way, meetings with Robin Williams, Timothy Leary, Ken Wilber, and others famous, infamous and unknown, helped to shape him in different ways. This is the story of how a writer seeks experience and how that is translated into literature - and how writing itself can be an expression of splendor. It also tells how his work has been a dialogue with all the hopes, conceits, frustrations, failures and glories of the true Greatest Generation that some call the Baby Boomers. Whatever one thinks of the millions born beneath the shadow of the atomic blasts of Hiroshima and Nagasaki, the author argues, the fate of the earth now lies in their hands - and in those who come after them. For their uncompleted task of overcoming the destructive forces of power, pride, wealth and war holds a lesson for all of us: that only through returning to the great dream of our youth and reclaiming our essential splendor will we fulfil our destiny to lead the way into an almost unimaginably brilliant future.

"SPLENDOR is a simply remarkable, passionate, transcendent book which shines a light on our times, and on all of us. I absolutely loved it." - Jane Johnson, author of The Sultan's Wife "David Zindell's Splendor features many of the characteristics of courageous confessional autobiography, with much of the intelligent spiritual uplift of Thomas Merton's classic autobiography, The Seven-Storey Mountain. It also reads like compelling speculative anthropology, sociology, and history. All the while, its structuring theme - the life-affirming concept of splendor - gives it a philosophical touchstone that centers and unites all of Zindell's major concerns, from love to the recurrent inhumanity of our species, from the death of spirit in raw material pursuits to the star-driven quest for ultimate meaning. I can't say enough about the honesty, the thoughtfulness, or the power of this rare book. -Michael Bishop, author of No Enemy But Time

Book 3 in the Second Chances Time Travel Romance Series Reverend Johnson is in the business of granting second chances to those deserving a new start, even if it means bending the rules of time travel on occasion. In Gabe McFarlain's case, he may have gone too far . . . Abandoned by his father, and raised in a Montana whorehouse, Gabe has grown bitter to the world. Fueled by revenge and hatred, his actions leave him facing the hangman's noose. Accepting certain death, he wakes up in a time and place that is as foreign as the tender touch of the woman who rescues him. Down to earth and level-headed, Morgan Bartlett isn't afraid to wear her heart on her sleeve. All she wants is independence from her overbearing mother, and the freedom to shape her own destiny. When she aids a badly beaten man along the side of the road, she may have found more than a dusty cowboy down on his luck. Morgan's unshakable belief that Gabe is a good man slowly chisels away the walls he's built around himself. As he comes to terms with living in the future, he must decide if losing his heart is worth more than holding on to the life he's led in the past. For six long years, she's waited and wondered if he would return. After the shocking murder of her parents, her brother is the only family she has left. Refusing to accept a betrothal to a man she doesn't love, she decides to take control of her destiny and confront her parents' killer. Growing up, Alexander Walker has known only violence at the hands of his cruel father. After the death of his mother, he embarks on a journey into the uncharted wilderness to test his resolve as a fur trapper and mountain man. Alex's memories of Evelyn are of a pesky little girl, but he can't deny his growing feelings for the beautiful and spirited woman she is now. The majestic beauty of Grand Teton National Park has moved people throughout time. Native Americans believed in the spiritual power of the towering mountain peaks and journeyed there to gain special powers. Early fur traders, who had just crossed less ominous mountain ranges, viewed with trepidation the massive obstacle that loomed before them on their passage to the Pacific Northwest. In others, the Tetons ignited vision and passion—a vision to preserve for all generations to come and a passion to protect the independent way of life known by the first settlers of this western frontier. The formation of Grand Teton National Park spanned the course of nearly 70 years. Although there were many people who shared the struggle before them, it was not until Stephen Mather and Horace M. Albright took up the fight in 1915 that steps towards success were taken. Albright's tenacity and ability to convey his vision to philanthropist John D. Rockefeller Jr. set in motion a very long journey that culminated with Pres. Harry S. Truman signing today's Grand Teton National Park into existence on September 13, 1950.

It's common knowledge that Eve gave Adam an apple. Everyone knows that George Washington was the first president of the United States. Cora Miller is fiercely independent and stubborn to a fault. Betrayed more than once by men she thought she could trust, she's learned to rely only on herself. As the oldest of four siblings, she feels responsible for leading her family safely on the Oregon Trail for a new start. Nathaniel Wilder is no stranger to the hardships and dangers of the wilderness. Raised with his brothers by a trapper in the remote mountains, he left behind the mistakes he's made in the past. He's been called reckless and irresponsible, but won't hesitate to help someone in need. A foolhardy mishap puts Nathaniel in the direct path of a stubborn, yet beautiful woman with fire in her eyes. Despite her refusal of help, he is determined to prove she can depend on him. When her pride puts her and her family in peril, Cora accepts that she can't do it on her own. If misgivings can turn to trust, or even love, both Cora and Nathaniel could come out stronger in the end.

Millions of years ago, the North American continent was dragged over the world's largest continental hotspot, a huge column of hot and molten rock rising from the Earth's interior that traced a 50-mile wide, 500-mile-long path northeastward across Idaho. Generating cataclysmic volcanic eruptions and large earthquakes, the hotspot helped lift the Yellowstone Plateau to more than 7,000 feet and pushed the northern Rockies to new heights, forming unusually large glaciers to carve the landscape. It also created the jewel of the U.S. national park system: Yellowstone. Meanwhile, forces stretching apart the western U.S. created the mountainous glory of Grand Teton National Park. These two parks, with their majestic mountains, dazzling geysers, and picturesque hot springs, are windows into the Earth's interior, revealing the violent power of the dynamic processes within. Smith and Siegel offer expert guidance through this awe-inspiring terrain, bringing to life the grandeur of these geologic phenomena as they reveal the forces that have shaped--and continue to shape--the greater Yellowstone-Teton region. Over seventy illustrations--including fifty-two in full color--illuminate the breathtaking beauty of the landscape, while two final chapters provide driving tours of the parks to help visitors enjoy and understand the regions wonders. Fascinating and informative, this book affords us a striking new perspective on Earth's creative forces.
