Centuries of tactical wisdom distilled into one awesome e-book. Military Science has never been more thoroughly represented in one single volume. Strategy Six Pack brings together six essential texts for military theorists: Machiavelli's The Prince, The Art of War by Sun Tzu, Battle Studies by Ardant du Picq, Einhard's Life of Charlemagne, Julius Caesar's The Gallic Wars and On War by Carl von Clausewitz.

Johann David Heinichen (1683-1729) was a distinguished composer, a contemporary of Johann Sebastian Bach, and Cappellmeister at the court of August I in Dresden. His treatise, Der General-Bass in der Composition, is one of the most comprehensive sources for the late Baroque practice of figured-bass, or thorough-bass, accompaniment. It is a fund of information about many complex problems confronting musicians in the performance and interpretation of Baroque music, including meters, embellishments, dissonance, particular complications for recitative, and use of the figured bass. With a judicious combination of translation, interpretation, and commentary George J. Buelow makes Heinichen's famous treatise accessible for contemporary scholars and performers. Buelow provides translations of key sections of the treatise, explains its historical significance, clarifies Heinichen's obscurities, and relates the treatise to other musical theories and practices of the Baroque, including those of Gasparini, Mattheson, and the Bachs. Buelow, one of the world's premier experts on Baroque music, is a professor of musicology

at Indiana University.

Composed by two prominent statesmen-generals of classical China, this book develops the strategies of Sun Tzu's classic, *The Art of War*, into a complete handbook of organization and leadership. The great leaders of ancient China who were trained in Sun Tzu's principles understood how war is waged successfully, both materially and mentally, and how victory and defeat follow clear social, psychological, and environmental laws. Drawing on episodes from the panorama of Chinese history, *Mastering the Art of War* presents practical summaries of these essential laws along with tales of conflict and strategy that show in concrete terms the proper use of Sun Tzu's principles. The book also examines the social and psychological aspects of organization and crisis management. The translator's introduction surveys the

Chinese philosophies of war and conflict and explores in depth the parallels between The Art of War and the oldest handbook of strategic living, the I Ching (Book of Changes).

Sun Tzu's Art of War is the most famous, and the most thought-provoking, work of strategy ever written. The profound insights of this book have endured for over two thousand years, and they continue to reward careful study. Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

This engrossing anthology gathers together a remarkable collection of writings on the use of strategy in war. Gérard Chaliand has ranged over the whole of human history in assembling this collection—the result is an integration of the annals of military thought that provides a learned framework for understanding global political history. Included are writings from ancient and modern Europe, China, Byzantium, the Arab world, Persia, and the Ottoman Empire. Alongside well-known militarists such as Julius Caesar, Napoleon, Walter Raleigh, Rommel, and many others are "irregulars" such as Cortés, Lawrence of Arabia, and even Gandhi. Contrary to standard interpretations stressing competition between land and sea powers, or among rival Christian societies, Chaliand shows the great importance of the struggles between nomadic and sedentary peoples, and of the conflicts between Christianity and Islam. With the invention of firepower, a relatively recent occurrence in the history of warfare, modes of organization and strategic concepts—elements reflecting the nature of a society—have been key to how war is waged. Unparalleled in its breadth, this anthology will become the standard work for understanding a fundamental part of human history—the conduct of war. "This anthology is not only an unparalleled corpus of information and an aid to failing memory; it is also and above all a reliable and liberating guide for research. . . . Ranging "from the origins to the nuclear age," it compels us to widen our narrow perspectives on conflicts and strategic action and open ourselves up to the universal."—from the Foreword

A lot of times, when people think about success, they immediately start to think about their goals. They look at their life and start to measure their accomplishments. I then ask these people, of their goals, how many they would say they accomplish in a year or month. In most cases, they have set goals but they have no idea of the steps or work it takes to accomplish them. I tell you, although we set goals, the outcome we desire is a specific set of results. Let's look at the big picture: the reason why we set goals

is because we would like an immediate result, so instead of focusing on the goal, let's focus on the result we want. To me, when I hear the word "goal" I mainly think of wishful thinking. I have no idea how to make this goal a reality, and I know plenty of people who work hard and don't get the result they wanted. Is it possible that, in the process of working toward that goal, they lost sight of the result intended? Or is it possible that they didn't plan the necessary steps to reach the goal/result?

victorious.

Niccolo Machiavelli's *The Art of War* is essential reading for any student of military history, strategy, or theory. *The Art of War* was written in Socratic dialogue. Its purpose is "To honor and reward virtue, not to have contempt for poverty, to esteem the modes and orders of military discipline, to constrain citizens to love one another, to live without factions, to esteem less the private than the public good." To these ends, Machiavelli notes in his preface, the military is like the roof of a palazzo protecting the contents. *The Art of War* was first published in 1521 and was the only historical or political work printed during Machiavelli's lifetime. Niccolo Machiavelli's *The Prince* is a political treatise sometimes claimed to be one of the first works of modern philosophy, especially modern political philosophy, in which the effective truth is taken to be more important than any abstract ideal. It was also in direct conflict with the dominant Catholic and scholastic doctrines of the time concerning how to consider politics and ethics. The descriptions within *The Prince* have the general theme of accepting that ends of princes, glory, and survival, can justify the use of immoral means to achieve those ends. Niccolo di Bernardo dei was an Italian philosopher, humanist, and writer based in Florence during the Renaissance. He is one of the main founders of modern political science, was a diplomat, political philosopher, playwright, and a civil servant of the Florentine Republic. He also wrote comedies, carnival songs, poetry, and some of the most well-known personal correspondence in the Italian language.

Selected as a Financial Times Best Book of 2013 In Strategy: A History, Sir Lawrence Freedman, one of the world's leading authorities on war and international politics, captures the vast history of strategic thinking, in a consistently engaging and insightful account of how strategy came to pervade every aspect of our lives. The range of Freedman's narrative is extraordinary, moving from the surprisingly advanced strategy practiced in primate groups, to the opposing strategies of Achilles and Odysseus in The Iliad, the strategic advice of Sun Tzu and Machiavelli, the great military innovations of Baron Henri de Jomini and Carl von Clausewitz, the grounding of revolutionary strategy in class struggles by Marx, the insights into corporate strategy found in Peter Drucker and Alfred Sloan, and the contributions of the leading social scientists working on strategy today. The core issue at the heart of strategy, the author notes, is whether it is possible to manipulate and shape our environment rather than simply become the victim of forces beyond one's control. Time and again, Freedman demonstrates that the inherent unpredictability of this environment-subject to chance events, the efforts of opponents, the missteps of friends-provides strategy with its challenge and its drama. Armies or corporations or nations rarely move from one predictable state of affairs to another, but instead feel their way through a series of states, each one not quite what was anticipated, requiring a reappraisal of the original strategy, including its ultimate objective. Thus the picture of strategy that emerges in this book is one that is fluid and flexible, governed by the starting point, not the end point. A brilliant overview of the most prominent strategic theories in history, from David's use of deception against Goliath, to the modern use of game theory in economics, this masterful volume sums up a lifetime of reflection on strategy. In Potential Images Dario Gamboni explores ambiguity in modern art, considering images that rely to a great degree on a projected or imaginative response from viewers to achieve their effect. Ambiguity became increasingly important in late 19th- and

early 20th-century aesthetics, as is evidenced in works by such artists as Redon, Cezanne, Gauguin, Ensor and the Nabis. Similarly, the Cubists subverted traditional representational conventions, requiring their viewers to decipher images to extract their full meanings. The same device was taken up in the various experiments leading to abstraction. For example, it was Kandinsky's intention that his work could be interpreted in both figurative and non-figurative ways, and Duchamp's Readymades suggested the radical conclusion that 'it is the beholder who makes the picture'. These invitations to viewers to participate in the process of artistic communication had social and political implications, as they accorded artist and beholder symmetrical, almost interchangeable, roles.

A collection of over 170 quotes drawn straight from the ancient treatise by China's most famous warrior and philosopher, Sun Tzu. A lively, immersive history by an award-winning urbanist of New York City's transformation, and the lessons it offers for the city's future. Dangerous, filthy, and falling apart, garbage piled on its streets and entire neighborhoods reduced to rubble; New York's terrifying, if liberating, state of nature in 1978 also made it the capital of American culture. Over the next thirty-plus years, though, it became a different place—kinder and meaner, richer and poorer, more like America and less like what it had always been. New York, New York, New York, Thomas Dyja's sweeping account of this metamorphosis, shows it wasn't the work of a single policy, mastermind, or economic theory, nor was it a morality tale of gentrification or crime. Instead, three New Yorks evolved in turn. After brutal retrenchment came the dazzling Koch Renaissance and the Dinkins years that left the city's liberal traditions battered but laid the foundation for the safe streets and dotcom excess of Giuliani's Reformation in the '90s. Then the planes hit on 9/11. The shaky city handed itself over to Bloomberg who merged City Hall into his personal empire, launching its Reimagination. From Hip Hop crews to Wall Street bankers, D.V. to Jay-Z, Dyja weaves New Yorkers famous, infamous, and unknown—Yuppies, hipsters, tech nerds, and artists; community organizers and the immigrants who made this a truly global place—into a narrative of a city creating ways of life that would ultimately change cities everywhere. With great success, though, came grave mistakes. The urbanism that reclaimed public space became a means of control, the police who made streets safe became an occupying army, technology went from a means to the end. Now, as anxiety fills New Yorker's hearts and empties its public spaces, it's clear that what brought the city back—proximity, density, and human exchange—are what sent Covid-19 burning through its streets, and the price of order has come due. A fourth evolution is happening and we must understand that the greatest challenge ahead is the one New York failed in the first three: The cures must not be worse than the disease. Exhaustively researched, passionately told, New York, New York, New York is a colorful, inspiring guide to not just rebuilding but reimagining a great city.
