all On July 27, 1996, a hapless former cop turned hypervigilant security guard named Richard Jewell spotted a suspicious bag in Atlanta's Centennial Olympic Park, the town square of the 1996 Summer Games. Inside was a bomb, the largest of its kind in FBI and ATF history. Minutes later, the bomb detonated amid a crowd of fifty thousand people. But thanks to Jewell, it only wounded 111 and killed two, not the untold scores who would have otherwise died. With the eyes of the world on Atlanta, the Games continued. But the pressure to find the bomber was intense. Within seventy-two hours, Jewell went from the hero to the FBI's main suspect. The news leaked and the intense focus on the guard forever changed his life. The worst part: It let the true bomber roam free to strike again. What really happened that evening during the Olympic Games? The attack left a mark on American history, but most of what we remember is wrong. In a triumph of reporting and access in the tradition of the best investigative journalism, former U.S. Attorney Kent Alexander and former Wall Street Journal reporter Kevin Salwen reconstruct all the events leading up to, during, and after the Olympic bombing from mountains of law enforcement evidence and the extensive personal records of key players, including Richard himself. The Suspect, the culmination of more than five years of reporting, is a gripping story of the rise of domestic terrorism in America, the advent of the 24/7 news cycle, and an

named Maurice Wilson conceives his own crazy, beautiful plan: he will fly a plane from England to Everest, crash-land on its lower slopes, then become the first person to reach its summit—completely alone. Wilson doesn't know how to climb. He barely knows how to fly. But he has the right plane, the right equipment, and a deep yearning to achieve his goal. In 1933, he takes off from London in a Gipsy Moth biplane with his course set for the highest mountain on earth. Wilson's eleven-month journey to Everest is wild: full of twists, turns, and daring. Eventually, in disguise, he sneaks into Tibet. His icy ordeal is just beginning. Wilson is one of the Great War's heroes, but also one of its victims. His hometown of Bradford in northern England is ripped apart by the fighting. So is his family. He barely survives the war himself. Wilson returns from the conflict unable to cope with the sadness that engulfs him. He begins a years-long trek around the world, burning through marriages and relationships, leaving damaged lives in his wake. When he finally returns to England, nearly a decade after he first left, he finds himself falling in love once more—this time with his best friend's wife—before depression overcomes him again. He emerges from his funk with a crystalline ambition. He wants to be the first man to stand on top of the world. Wilson believes that Everest can redeem him. This is the “rollicking” (The Economist) tale of an adventurer unlike any you have ever encountered:

complex, driven, wry, haunted, and fully alive. He is a man written out of the history books—dismissed as an eccentric and gossiped about because of rumors of his transvestism. The Moth and the Mountain restores Maurice Wilson to his rightful place in the annals of Everest and tells an unforgettable story about the power of the human spirit in the face of adversity.

Tom Holladay experienced a catastrophe first-hand when a sudden flood in California destroyed his home, his church, and the homes of many church members. Tom and his congregation had to rebuild, and they used the principles in the book of Nehemiah to get back on their feet. Now a teaching pastor at Saddleback Church, Tom will help you discover seven principles for putting it together again that will give you the direction you need to get rolling on that fresh start. Holladay will walk you through seeing every problem as an opportunity, facing the obstacles head on and taking your first step, knowing how to expect and reject opposition, build on your success, and dedicating yourself to the One who rebuilds our souls. The task of starting again can seem impossible. And sometimes you just need to rebuild your confidence and regain a sense of purpose. If you're trying to find the emotional energy, but you just don't have it in you, let Holladay encourage you. He understands how difficult and rewarding the business of rebuilding is. This book is your encouraging how-to guide to starting again and stepping into a better future.

At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, Learning Online provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. Learning Online synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas, and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work

concludes with a call for an online learning implementation research agenda, combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices.
