From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

An influential Army leader records his views of recent Army history with particular emphasis on the war in Vietnam and the Steadfast reorganization.

Considered one of most influential U. S. military officers of the twentieth century, William E. DePuy (1919--1992) developed the education and training program that regenerated the U.S. Army after the Vietnam War. Henry G. Gole draws from sources such as transcripts and letters in DePuy's personal papers, interviews with those who knew him best, and secondary literature to trace DePuy's life from child to decorated officer to commander of Training and Doctrine Command. General William E. DePuy: Preparing the Army for Modern War is the first book-length biography of the important figure who revolutionized military training and created a modern program for doctrine, education, and combat development that is still used today.

From Guillermo del Toro and DreamWorks Animation's Emmy® Award-winning Netflix series, comes a graphic novel with another quest for teenage Jim Lake, Jr., and his friends--human and Troll! The title of Trollhunter weighs heavy on the shoulders of Jim Lake, Jr.--as does his new title of "boyfriend"--and it has lead him to a crisis of identity. To help the young man grasp who he is, the Trolls, Vendel, Blinky, and AAARRRGHH!!!, and his best friend, Toby, look at the adventures and misadventures of six previous Trollhunters during times when they, too, questioned themselves. Through their stories Jim discovers how Trollhunters Deya the Deliverer and Kanjigar the Courageous--and others--used their different attributes to be the best they could be . . . And how he can try to do the same. Writer Richard Ashley Hamilton (How to Train Your Dragon: The Serpent's Heir) expands on the world of the Trollhunters along with Timothy Green II (Avengers Academy), Joe Silver (Animal Man), Omar Lozano (Ultra Duck), Wes Dzioba (Serenity), and Edgar Delgado (Ultra Duck)!

Selected by a team of top women historians from across the nation & the editors of Ladies' Home Journal, Ó the women in this book helped bring about a major transformation in the role of women in the 20th century. Narrowing the choice down to just 100 names was a daunting task. But some names practically suggested themselves: Eleanor Roosevelt, Rachel Carson, Betty Friedan, Margaret Sanger, Mary McLeon Bethune, & Gloria Steinem. Not everyone will agree with every choice made for this book, but these women will influence our lives for untold years to come. They are listed in 7 categories: activists & politicians, writers & journalists, doctors & scientists, entrepreneurs, artists & entertainers, athletes, & pioneers & adventurers. Photos.
