The present volume contains the proceedings of the Seventh International East-West Symposium of New Testament Scholars in Moscow 2016. Its contributions are devoted to different aspects of the question of the relation between history and theology in New Testament and extracanonical Gospel literature. They deal with problems regarding the impact of critical historical approaches for New Testament theology, the relation between the Gospels' claim for truth and historical facts, Orthodox receptions of the Gospel literature, and the presentation of "the" Gospel in Byzantine liturgy.

Fiction. The four chapbooks collected in *A PECULIAR FEELING OF RESTLESSNESS*, three of them finalists and one of them the winner of the Rose Metal Press first annual short short chapbook contest, all revel in the succinctness of their form, the underlying tension anchored beneath each story of 1,000 words or less. These stories are peculiar; they resonate with restlessness. They are deft, they are gritty, and they are lyrical. *Laughter, Applause. Laughter, Music, Applause* by Kathy Fish, *Wanting* by Amy L. Clark, *Sixteen Miles Outside of Phoenix* by Elizabeth Ellen, and *The Sky Is a Well* by Claudia Smith combine four multi-layered portrayals of beautiful uneasiness into a collection rich with wit,

Little Miss Contrary always says and does the opposite of what she really means, to the confusion of those around her.

Organized by specific reading skills, this book is designed to enhance students' reading comprehension. The focused, meaningful practice and entertaining topics motivate students to learn.

In Tom Kundig: Works, the celebrated Seattle-based architect presents nineteen new projects, from Hawaii to New York City. Kundig's award-winning houses, known for their rugged yet elegant and welcoming style, are showcased in lush photography with drawings and sketches, and appear alongside his commercial work—from multistory complexes to the Tacoma Art Museum to a line of hardware (handles, door pulls, hinges, and more). In firsthand accounts, Kundig describes the projects and his design process with many personal anecdotes, making Tom Kundig: Works as much memoir as monograph. The book also includes an introduction by design editor Pilar Viladas and in-depth conversations with Kundig's frequent collaborators—"gizmologist" Phil Turner and contractor Jim Dow (Schuchart/ Dow)—and clients (Bigwood Residence and Studhorse).

The twin epidemics of obesity and diabetes are a 21st-century time bomb. The Atkins organisation is renowned for their work on diabetes and this book sets out a controlled carb diet and nutrition regime to help people lose weight and prevent, treat and even reverse diabetes.

The primary goal of AutoCAD 2019 Tutorial First Level 2D Fundamentals is to introduce the aspects of Computer Aided Design and Drafting (CADD). This text is intended to be used as a training guide for students and professionals. This text covers AutoCAD 2019 and the lessons proceed in a pedagogical fashion to guide you from constructing basic shapes to making multiview drawings. This textbook contains a series of eleven tutorial style lessons designed to introduce beginning CAD users to AutoCAD 2019. It takes a hands-on, exercise-intensive approach to all the important 2D CAD techniques and concepts. This text is also helpful to AutoCAD users upgrading from a previous release of the software. The new improvements and key enhancements of the software are incorporated into the lessons. The 2D-CAD techniques and concepts discussed in this text are also designed to serve as the foundation to the more advanced parametric feature-based CAD packages such as Autodesk Inventor. The basic premise of this book is that the more designs you create using AutoCAD 2019, the better you learn the software. With this in mind, each lesson introduces a new set of commands and concepts, building on previous lessons. This book is intended to help readers establish a good basis for exploring and growing in the exciting field of Computer Aided Engineering. Video Training Included with every new copy of AutoCAD 2019 Tutorial First Level 2D Fundamentals

is access to extensive video training. The video training parallels the exercises found in the text and are designed to be watched first before following the instructions in the book. However, the videos do more than just provide you with click by click instructions. Author Luke Jumper also includes a brief discussion of each tool, as well as rich insight into why and how the tools are used. Luke isn't just telling you what to do, he's showing and explaining to you how to go through the exercises while providing clear descriptions of the entire process. It's like having him there guiding you through the book. These videos will provide you with a wealth of information and brings the text to life. They are also an invaluable resource for people who learn best through a visual experience. These videos deliver a comprehensive overview of the 2D tools found in AutoCAD and perfectly complement and reinforce the exercises in the book. AutoCAD 2019 Certified User Examination The content of AutoCAD 2019 Tutorial First Level 2D Fundamentals covers the performance tasks that have been identified by Autodesk as being included on the AutoCAD 2019 Certified User Examination. Special reference guides show you where the performance tasks are covered in the book. If you are teaching an introductory level AutoCAD course and you want to prepare your students for the AutoCAD 2019 Certified User Examination this is the only book that you need. If your students are not interested in the AutoCAD 2019 Certified User Examination they will still be studying the most important tools and techniques of AutoCAD as identified by Autodesk.

"An archaeological mystery, the story of young American Bruce Brandon, eager to

ascertain more about the graves of Egyptian gods, is set against a clearly focused background of the Land of the Pyramids. Bruce is determined to find mummified crocodiles, which he believes were spirited away by reactionary priests during the reign of the ruler Akhenaten, who tried to introduce monotheism into Egypt." --Preface.

There have been significant developments in the field of numerical methods for diffraction problems in recent years, and as a result, it is now possible to perform computations with more than ten million unknowns. However, the importance of asymptotic methods should not be overlooked. Not only do they provide considerable physical insight into diffraction mechanisms, and can therefore aid the design of electromagnetic devices such as radar targets and antennas, some objects are still too large in terms of wavelengths to fall in the realm of numerical methods. Furthermore, very low Radar Cross Section objects are often difficult to compute using multiple methods. Finally, objects that are very large in terms of wavelength, but with complicated details, are still a challenge both for asymptotic and numerical methods. The best, but now widely explored, solution for these problems is to combine various methods in so called hybrid methods. Asymptotic and Hybrid Methods in Electromagnetics is based on a short course, and presents recent developments in the field.

Sports Tourism: Participants, Policy and Providers is an unparalleled text that explains sports tourism as a social, economic and cultural phenomenon that stems from the unique interaction of activity, people and place. Unlike other texts, it establishes sports tourism as a unique area that produces its own unique issues, concerns and controversies. Extensively revised with cutting edge new material based on the latest research in the field, this edition uses recent international case studies to illustrate how theory is used in practice. The text tackles the complex and distinctive issues this sector faces from three viewpoints: participants: examining the profiles, motivations and behaviour patterns of sports tourists to create a participation model policy: analyzes the response by policy makers to this phenomenon and the problems of achieving integration between two sectors with historically different cultures providers: their motivations, aims, objectives and strategies. Now in its second edition, this book is an essential resource for those studying, teaching or working in sports tourism.

World-famous teacher Louise Hay has already helped millions of people to free themselves from the cycles of fear, stress and guilt that limit our lives. Now, in this first-ever affirmations colouring book, Louise combines the life-changing powers of affirmations with the profound positive effects of creativity. This unique combination will enable readers to start creating deep shifts in their lives. This stunning colouring book, in collaboration with Alberta Hutchinson, features 44 affirmations, each coupled with an exquisite illustration and decorative border. Colouring these in and focusing on the affirmation at the same time encourages our minds to put attention on what we truly desire in life. What's more, through creative right-brain activity, we tap into our subconscious, and therefore all transformations through this process are even more effective and long-lasting. For anyone who wants to take their work with affirmations to a new level through an enjoyable, relaxing and meditative activity.
